

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

Contents of Volume 13, Part 1, February 1971, include the following

- HILL, W. G. Investment appraisal for national breeding programmes.
- MORRISON, S. R. and MOUNT, L. E. Adaptation of growing pigs to changes in environmental temperature.
- FOWLER, V. R. and LIVINGSTONE, R. M. Some effects of alternating high and low levels of feed intake on the performance and composition of the growing pig.
- LOHSE, C. L., MOSS, F. P. and BUTTERFIELD, R. M. Growth patterns of muscles of Merino sheep from birth to 517 days.
- MARSH, R., CURRAN, M. K. and CAMPLING, R. C. The voluntary intake of roughages by pregnant and by lactating dairy cows.
- CRABTREE, J. R. and WILLIAMS, G. L. The voluntary intake and utilization of roughage concentrate diets by sheep. Parts I & II.
- HOLMES, C. W. Growth of pigs fed whey at two ambient temperatures.
- DAY, NORMAN, MCEWAN JENKINSON, D. and WALKER-LOVE, J. Freeze-branding of young beef animals.
- FAHMY, M. H., LALANDE, G. and HIDIROGLOU, M. Reproductive performance and growth of Shorthorn purebred and crossbred cows.
- KAY, M., MASSIE, R. and MACDEARMID, A. Intensive beef production. 12. Replacement of concentrates with chopped dried grass.
- HODGSON, J. The development of solid food intake in calves. Parts I & II.
- CHOPRA, S. C. and ACHARYA, R. M. Genetic and phenotypic parameters of body weights in Bikaneri sheep (Magra strain).
- TRAIL, J. C. M., SACKER, G. D. and FISHER, I. L. Cross-breeding beef cattle in Western Uganda. Parts I to V.
- CHAMBERLAIN, A. G. and COOKE, B. C. The nutritive value of separated milk for pigs. III. A note on the effects of supplementary lysine and methionine on performance to 55 kg live weight.
- JOUBERT, D. M. and UECKERMANN, L. A note on the effect of docking on fat deposition in fat-tailed sheep.
- LEDWARD, D. A. and SHORTHORSE, W. R. A note on the haem pigment concentration of lamb as influenced by age and sex.
- RATHORE, A. K. A note on the relations between scrotal wool cover, face cover, and cover on points in Merino rams.
- HASSAN, H. M. and MUKHTAR, A. M. S. A note on the utilization of urea by Sudan desert sheep.

The Journal is published quarterly in February, May, August and November. The annual subscription rate is £4.50 and in the U.S.A. \$14.00, single copy £1.35 and in the U.S.A. \$4.00. Orders and subscriptions may be sent to any Bookseller or direct to:

LONGMAN GROUP LTD—JOURNALS DIVISION
33 Montgomery Street, Edinburgh, EH7 5JX, Scotland

JOURNAL OF THE SOCIETY OF DAIRY TECHNOLOGY

17 Devonshire Street, London W1N 2BQ

A quarterly Journal containing full reports of the proceedings of the Society's General Meetings, selected papers presented at meetings of its Sections and Branches and original articles, book reviews and items of interest to those engaged in the dairy industry.

Some articles published in recent issues

- VOL. 22, 4
- Development in the Movement of Milk from Farms by *R. R. Ellemor*.
- Recent Developments in Milk Drying Techniques by *M. E. Knipschildt*.
- Recent Developments in the Evaporation of Milk and Milk Products by *R. M. Gray*.
- VOL. 23, 1
- Marketing—Introducing a New Product by *D. L. Armstrong*.
- Problems in the Marketing and Sales Promotion of Existing Dairy Products by *S. J. Cooke*.
- Lipase Taint by *E. B. Hemingway et al*.
- Milk Production en Masse by *A. J. Quick*.
- VOL. 23, 2
- Quality Control in the Ice Cream Industry by *S. M. Herschdoerfer*.
- Acidified Boiling Water Treatment of Pipeline Milking Installations by *A. C. Hunter and D. C. Jeffrey*.
- Acidified Boiling Water Treatment of Parlour Milking Installations by *D. C. Jeffrey and A. C. Hunter*.
- Levels of Airborne Bacteria in Milking Premises by *C. L. Benham and J. W. Egdell*.
- VOL. 23, 3
- Metrication in the Dairy Industry:
(i) Administrative Aspects by *H. Nicholson*.
(ii) Marketing Aspects by *A. Brooks*.
- The Contribution of Dairy Science to the Food Industries by *F. Aylward*.
- The Selection and Use of Some Micro-organisms for the Manufacture of Fermented and Acidified Milk Products by *G. Mocquot and C. Hurel*.
- The Control of the Water Content of Milk during UHT Sterilization by a Steam Injection Method by *A. G. Perkin and H. Burton*.
- Study Tour of the North German Dairy Industry by *B. S. Thompson*.
- Nutrition of the Dairy Cow by *M. Kay*.

£0.93 Single Numbers. £3.45 per volume of four parts.

DIRECTIONS TO CONTRIBUTORS

GENERAL

Papers submitted for publication should be sent to Dr J. E. Ford (*The Journal of Dairy Research*), National Institute for Research in Dairying, Shinfield, Reading, England. Submission of a paper will be held to imply that it reports unpublished original work, that it is not under consideration for publication elsewhere, and that if accepted for the *Journal* it will not be published elsewhere in English or in any other language, without the consent of the Editors.

FORM OF PAPERS

The onus of preparing a paper in a form suitable for sending to press lies in the first place with the author who, in his own interests, should follow these directions carefully, and consult a current issue of the *Journal* for guidance on details of typographical and other conventions.

Every paper should be headed with its title, the names and initials of the authors (women supplying one given name) and the name and address of the laboratory where the work was done.

Papers should be in English, the spelling being that of the *Shorter Oxford English Dictionary*. They should be typed with double spacing, on one side only of the sheets, and with ample margins for editorial annotations.

Papers should in general be divided into the following parts in the order indicated: (a) Summary, brief and self-contained; (b) Introductory paragraphs, briefly explaining the object of the work but without giving an extensive account of the literature; (c) Experimental or Methods; (d) Results; (e) Discussion and Conclusions; (f) Acknowledgements without a heading; (g) References. Only with some exceptional types of material will headings different from (c), (d) and (e) be necessary.

The use of footnotes should be avoided if possible. Underlining should be used only to indicate italics. Proper nouns, including trade names, should be given a capital initial letter. Wherever possible numerals should be used unless this leads to ambiguity. The typescript should carry the name and address of the person to whom the proofs are to be sent, and give a shortened version of the paper's title, not exceeding 45 letters and spaces, suitable for a running title in the published pages of the work.

TABLES

Tables should be numbered and should carry headings describing their content. They should be comprehensible without reference to the text. They should be typed on separate sheets and their approximate positions in the text indicated.

ILLUSTRATIONS

Line drawings, which must be originals, should be numbered as Figures and photographs as Plates, in Arabic numerals. Drawings should be in Indian ink, on Bristol board or cartridge paper. However, a technique which may be more convenient to authors is to use a double-sized piece of tracing paper, or translucent graph paper faintly lined in blue or grey, folded down the centre with the drawing on one half and the other half acting as a flyleaf.

Attached to every figure and plate there should be a translucent flyleaf cover on the outside of which should be written legibly: (a) title of paper and name of author; (b) figure or plate number and explanatory legend;

(c) the figures and lettering, which are intended to appear on the finished block, in the correct positions relative to the drawing underneath. For each paper there should be also a separate typed sheet listing figure and plate numbers with their legends, and the approximate positions of illustrations should be indicated in the text.

As a rule the photographs and diagrams should be about twice the size of the finished block and not larger over-all than the sheets on which the paper itself is typed. For general guidance in preparing diagrams, it is suggested that for a figure measuring 9 in. × 6 in. all lines, axes and curves should have a thickness of 0.4 mm, thus ————. Graph symbols in order of preference should be ○ ●, △ ▲, □ ■, × +, and for a 9 in. × 6 in. graph the open circles should be $\frac{1}{2}$ in. in diam. The open triangles should be large enough to contain circles of $\frac{3}{8}$ in. diam. and the open square circles of $\frac{1}{2}$ in. diam. The crosses should have lines $\frac{1}{2}$ in. long. The black symbols should be slightly smaller than the corresponding open symbols. Scale marks on the axes should be on the inner side of each axis and should be $\frac{1}{2}$ in. long.

REFERENCES

In the text, references should be quoted by whichever of the following ways is appropriate: Arnold & Barnard (1900); Arnold & Barnard (1900a); Arnold & Barnard (1900a, b); (Arnold & Barnard, 1900). Where there are more than 2 authors all the surnames should be quoted at the first mention, but in subsequent citations only the first surname should be given, thus: Brown *et al.* (1901). If there are 6 or more names, *et al.* should be used in the first instance. Also, if the combinations of names are similar, e.g. Brown, Smith & Allen (1954); Brown, Allen & Smith (1954), the names should be repeated each time. Reference to anonymous sources is not acceptable.

References should be listed alphabetically at the end of the paper, titles of journals being abbreviated as in the *World List of Scientific Periodicals*. Authors' initials should be included, and each reference should be punctuated in the typescript thus: Arnold, T. B., Barnard, R. N. & Compound, P. J. (1900). *J. Dairy Res.* 18, 158. References to books should include names of authors, names of editors, year of publication, title, town of publication and name of publisher in that order, thus: Arnold, T. B. (1900). *Dairying*. London: Brown and Chester.

It is the duty of the author to check all references and to ensure that the correct abbreviations are used.

SYMBOLS AND ABBREVIATIONS

The symbols and abbreviations used are those of British Standard 1991: Part 1: 1967, *Letter Symbols, Signs and Abbreviations*.

DESCRIPTIONS OF SOLUTIONS

Normality and molarity should be indicated thus: N-HCl, 0.1 M-NaH₂PO₄. The term '%' means g/100 g solution. For ml/100 ml solution the term '% (v/v)' should be used and for g/100 ml solution the correct abbreviation is '% (w/v)'.

REPRINTS

Order forms giving quotations for reprints are sent to authors with their proofs.
