Philips Electronic Instruments and Chase Manhattan Leasing Company Announce a New Leasing Program

Philips Electronic Instruments Company and Chase Manhattan Leasing Company have jointly announced the development of a new lease program which provides up to 100% financing, at competitive rates, on Philips analytical instrumentation.

The Philips/Chase financing program now provides analytical instrumentation users the opportunity to select and finance their equipment from a single source, Philips. The new program allows users to stay current with new technological breakthroughs while protecting their capital equipment purchases from obsolescence.

Other benefits of the new program include; improved cash flow, conservation of credit lines and inflation protection.

The Philips/Chase financing program is currently offering leasing packages for scanning and transmission electron microscopes, X-ray diffraction and X-ray fluorescence systems, and energy dispersive X-ray systems. Several types of lease packages are available including; finance leases, tax leases, municipal leases, and federal government leases.

A brochure detailing various lease programs and answering commonly-asked questions regarding leasing is being offered, free of charge, from Philips Electronic Instruments Company.
