

WESFARMERS has joined its sister company to form  
**SOUTH WEST CHARTERING**

continuing to specialize in Polar Chartering  
Over 40 years providing ice-strengthened ships for expeditions to the Arctic and  
Antarctic — for charter — for purchase  
Our service includes all other types of survey vessels

Contact: Polar Department, South West Chartering (UK) Limited, Suite Five, Lloyds Wharf, Mill  
Street, London SE5 2BA Tel 01 231 8565 Telex 886819 Fax 01 231 3712

## ANNOUNCEMENTS

*POLAR RECORD* BACK NUMBERS 1931-87 (1-147)  
are available from Bluntisham Books, Oak House, East  
Street, Bluntisham PE17 3LS, UK, Tel (1487) 840 449.  
Prices: Pre-1982 (1-129) £2.50 each; 1982-85  
(130-141) £5.00 each; 1986-87 (142-47) £10.00  
each. Postage extra.

### ADVERTISING IN *Polar Record*

Quarter page (118 x 81 mm) : £50.00 (US\$90.00)  
Half page (240 x 81 mm or 118 x 165) : £70.00  
(US\$130.00)  
Whole page (240 mm x 165 mm): £100.00  
(US\$180.00)  
Flier (A4 or A5): £100.00 (US\$180.00)  
Announcements: £2.00 per column line.

VAT of 15% is payable on all UK orders. Please send  
payment or an official order form with your order. There  
are negotiable discounts for running the same advertise-  
ment in three successive issues. We make up adver-  
tisements (from £20.00) and print fliers (from £50.00) by  
arrangement.

Cambridge CB2 1ER, UK.

## ERSKINE EXPEDITIONS

We have been organizing small, short-term  
expeditions to Svalbard, various parts of Green-  
land and Arctic Canada for ten years. The  
expeditions are mostly summer ones aimed at  
observing wildlife, but we also run adventure  
holidays — ski-touring, dog-sledging, river-raft-  
ing, mountaineering and hiking. Besides camp-  
ing trips, we charter a 24-passenger vessel in  
Svalbard, and we arrange for persons to stay at  
Wilderness Lodges in the Canadian sub-Arctic.  
We visit historical sites and old expedition huts,  
and where appropriate, meet the Inuit. Our  
leaders are naturalists with many years' experi-  
ence in the North. Our Director, Commander  
Angus Erskine, was on the British North Green-  
land Expedition 1951-54, and has travelled ex-  
tensively in high latitudes since then.

Write for our 1989 Programme.  
**ERSKINE EXPEDITIONS, 1/8 Ferryfield,  
Edinburgh EH5 2PR**

## THE CANADIAN NORTH IS CHANGING - -

*Devolution of power from Ottawa to territorial governments is proceeding rapidly. Extensive native land claims are being settled. But the pace of change depends largely on factors affecting the development of the Arctic oil and gas reserves, particularly technological needs, environmental concerns, and financing considerations.*

*Recognizing this, the Government of Canada and the Government of the Northwest Territories recently sponsored a major conference, held in Yellowknife and Calgary and supported by oil, gas and pipeline companies. Leaders of government, industry, aboriginal groups and of other sectors gave clear and highly topical statements interpreting the dynamic northern scene.*

*The proceedings of these meetings are now edited in book form —*

### **NORTHERN HYDROCARBON DEVELOPMENT IN THE NINETIES: A GLOBAL PERSPECTIVE** 32 contributors, 250 pages.

Available now from: Conference Secretariat, Geotechnical Science Laboratories, Carleton University, Ottawa K1S 5B6 Canada. Price \$75.00 plus postage \$5.00.

This is *the* book for those who wish to have an up-to-date, highly authoritative, yet clearly-presented account of the changing Canadian North.

## **SCOTT POLAR RESEARCH INSTITUTE UNIVERSITY OF CAMBRIDGE Opportunities in Graduate Studies**

### **M.Phil in Polar Studies**

A one-year post-graduate course leading to the degree of Master of Philosophy, providing a broad background of polar knowledge and opportunity to study one topic in depth. Some 60 seminars cover the natural environment, peoples, history, resources, development and administration of the Arctic and Antarctic regions.

### **Ph.D and M.Sc studies**

Courses leading to Ph.D and M.Sc are available. Many programmes relate to current research areas within the Institute. Options include glaciology, polar oceanography, marine biology, geophysics, remote sensing, history, anthropology, native rights and northern affairs.

### **Visiting scholars**

The Institute provides facilities for advanced scholars wishing to pursue their own courses of study and research for periods of between a few weeks and one year.

### **Facilities**

The Institute's research facilities include the world's finest polar library, outstanding archival collections and specialized laboratories, including two cold rooms (-40°C).

### **Cambridge University**

The University now accommodates some 12,000 undergraduate and graduate students and has a long tradition of excellence in teaching and research.

# GEOFORUM

Managing Editor: **JUDITH A REES**, *Department of Geography, London School of Economics and Political Science, Houghton Street, London WC2A 2AE, UK*

Executive Editors: **DAVID K C JONES & DEREK DIAMOND**, *London School of Economics and Political Science, Houghton Street, London WC2A 2AE, UK*

*Geoforum* is concerned with all aspects of the management of the human environment; an area of study broadly defined to encompass urban and regional planning, industrial development, resource allocation and the management of physical environmental systems. It is an international, multi-disciplinary journal, global in outlook, integrative in approach and policy oriented.

*Geoforum* provides *rapid publication* of original research papers, reports and reviews. The editors concentrate on publishing results of applied research of an international and interdisciplinary character, particularly that which promotes better *understanding of the complex interrelationships that exist within and between the physical and socio-economic systems*, and which helps forge links between the natural and social sciences. There are also special theme issues designed to provide a full treatment of topical, contentious and important questions.

## A Selection of Papers

**DANIEL TODD** (Canada) & **YI-CHUNG HSUEH** (Taiwan), Taiwan: some spatial implications of rapid economic growth.

**R M AUTY** (UK), Internal constraints on prudent oil windfall deployment for resource-based industrialisation: Nigeria and Cameroon.

**ANTHONY G HOARE** (UK), High and low wages: some experiments with the geography of wage rates in the New Zealand economy.

**AHARON KELLERMAN** (Israel), US nationwide trends in metropolitan retail trade: a perspective of the mid 1980s.

**GEOFFREY C SMITH** (Canada), The spatial shopping behaviour of the urban elderly: a review of the literature.

**G J ASHWORTH** (The Netherlands), **P E WHITE** & **H P M WINCHESTER** (UK), The red-light district in the West European city: a neglected aspect of the urban landscape.

**D P SHAW** (Malawi), *The need for more overt integrated rural planning: the case of Malawi.*

**SUSAN LABS** (Canada), The limits of 'rational' planning: a study of the politics of coastal mineral extraction.

**BARRY SMIT**, **MICHAEL BRKLACICH**, **RAY McBRIDE**, **YIN YONGYUAN** & **DEBORAH BOND** (Canada), Assessing implications of soil erosion for future food production: a Canadian example.

**Indexed/Abstracted in:** *Current Contents/Social & Behavioral Sciences, Social Sciences Citation Index, Automatic Subject Citation Alert and CABS*

# ANTARCTIC Science

**BLACKWELL SCIENTIFIC PUBLICATIONS**

As the only continent entirely dedicated to scientific use, Antarctica occupies a special place in international relations. In recent years scientific activities in and around the continent have markedly increased, resulting in a rapidly growing but increasingly diffuse literature. **Antarctic Science**, to be launched in 1989, is conceived both as a response to this trend and as an attempt to provide a focus for many of the interdisciplinary interests that characterize Antarctic studies.

**Editor in Chief:**David W H Walton *Life Sciences & Oceanography***Editors:**Michael J Rycroft *Atmospheric Sciences*Michael R A Thomson *Earth Sciences & Glaciology***Editorial Office:**

All articles should be sent to the Editorial Assistant at the Editorial Office, British Antarctic Survey. All submissions must be in English. Authors whose first language is not English are advised to seek assistance with their articles before submission. Articles submitted should not be under consideration for publication elsewhere. There is no fixed length for contributions but all should be as concise as possible. The acceptance of all articles will be subject to comments from two independent reviewers.

**Subscription Information**

Antarctic Science will be published quarterly from March 1989. Institutional subscription rates for 1989 are: £50.00 (UK), US\$109.00 (USA & Canada) and £62.50 (elsewhere). Personal subscription rates for 1989 are: £30.00 (UK), US\$65.00 (USA & Canada) and £37.50 (elsewhere). All rates include postage plus accelerated delivery to subscribers in all areas of the world outside Europe. All orders and requests for specimen copies should be sent to Blackwell Scientific Publications Ltd., PO Box 88, Oxford, UK.

University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

Claims for missing issues can be considered only if made immediately after receipt of the subsequent issue.

### **Back issues**

For vols 1-23 inclusive apply to Bluntisham Books, Oak House, East Street, Bluntisham, Huntingdon, PE17 3LS, UK. For vols 24 onward apply to Cambridge University Press, UK or USA.

### **Advertising**

Prices appear in the advertisements section; for details apply to the Editor or to the publishers.

### **Advice to contributors**

*Polar Record* publishes original articles (2000 to 8000 words) and notes (usually less than 2000 words) of current and historic polar interest. Manuscripts, maps and photographs are accepted on the understanding that they are original, do not infringe copyright, and are not currently being offered elsewhere. Receipt is acknowledged; manuscripts are submitted to referees and any rejected will normally be returned to the author within six to eight weeks. Where the subject matter is appropriate, the Editor is usually prepared to advise authors on ways of making their material acceptable.

### **Presentation**

Typescripts should be double-spaced with 3 cm margins, on one side only of A4 or similar paper. Send two copies and keep one for reference. Give name, affiliation and address of each author on the title page, noting which author the Editor corresponds with. Follow the style of articles and notes in the most recent issue of *Polar Record*.

*Articles* should start with an abstract of 150-250 words and a table of major headings; secondary and tertiary headings are not listed. Indicate in margins where tables and illustrations fit. Footnotes are discouraged; places where they are considered essential are marked in text with a superscript number, and the footnotes are listed at the end before the References.

*Notes* are short articles, generally of less than 2000 words. They do not require an abstract or table of headings, but either the first or the final paragraph should summarize the content.

*References* (essential ones only, please) are cited in text; full references appear in the listing under References at the end; for forms of citations and references see the most recent issue of *Polar Record*. *Authors alone are responsible for the accuracy of their references*. References to privately printed or other unpublished reports and data are not accepted unless copies of the material are freely available from a named library or similar repository. *Tables* should be kept as simple as possible and typed on separate sheets. They will normally be fitted across the single- or double-column page, only exceptionally lengthwise.

*Illustrations*. Drawings, maps and diagrams must be of professional standard, with lettering and numbers pencilled in clearly. Authors may be charged for re-drawing if an illustration is inadequate. They should if possible allow for about one-third reduction in width to fit a column (7.8 cm) or page (16.4 cm). Photographs (black and white only) that add substantially to the material are welcome. Glossy prints with high contrast, about one-third oversize, generally reproduce well.

### **Contributions on disc**

The Editor welcomes contributions on floppy discs. The most suitable format is Apple Macintosh 3.5" disc. Output from a wide variety of word processing packages can be accepted, but in case of doubt, a MacWrite-compatible document should be produced. Diagrams also can be transferred on Macintosh discs. Discs from other microcomputers may be acceptable if the text is in the form of an ASCII file, with no word processing codes. TAB characters are acceptable. Currently, *Polar Record* can accept discs from Acorn BBC and Torch microcomputers, Amstrad PCW series microcomputers and, less readily, IBM PC compatible machines (5.25" discs only). If in doubt, please consult the Editor.

**ISSN 0032-2474**

# POLAR RECORD

VOLUME 25 NUMBER 153 APRIL 1989

## CONTENTS

### ARTICLES

- Economic status and role of hunters in a modern Inuit village T. G. Smith and H. Wright p 93
- Forty million years of Antarctic glacial history yielded by Leg 119 of the Ocean Drilling Program. M. J. Hambrey, B. Larsen and others p 99
- Stomach contents of autumn-feeding marine vertebrates from Hornsund, Svalbard. C. Lydersen, I. Gjertz and J. M. Weslawski p 107
- Beyond boom and bust: a strategy for sustainable development in the North. M. Pretes and M. Robinson p 115
- A bibliography of terrestrial ecosystems on Iles Crozet, Indian Ocean. Y. Frenot, Ph. Vernon and A. Bellido p 121
- Land usage conflict in Alaska: the case of mental health lands. G. D. Copus and J. McLain p 131
- The 'open door' into Antarctica: an explanation of the Hughes doctrine. H. R. Hall p 137

### NOTES

- Inauguration of King Sejong, Korean Antarctic research station. H. T. Huh, B. K. Park and others p 141
- Convention for the Conservation of Antarctic Seals: 1988 review of operations. A. Marchal p 142
- Sixth Inuit Study Conference, Copenhagen 1988. W. Arundale p 144
- International symposium on Antarctic geology and biology. B. K. Park, S. H. Lee and M. W. Han p 145
- Summary report of the Dutch South Georgia Expedition 1986/87. H. D. van Bohemen, D. A. G. Buizer and others p 146
- Leningrad conference on coordination of Arctic research. P. Vitebsky p 148
- Siberian conference on the cradle of mankind. P. Vitebsky p 149

### CORRECTION p 150

### REVIEWS

- Building databases for global science. H. Mounsey and R. F. Tomlinson (editors). *Colin Harris* p 150. The Amundsen photographs. R. Huntford. *H. G. R. King* p 150. Mawson's Antarctic diaries. F. Jacka and E. Jacka (editors). *H. G. R. King* p 151. The skin boats of St Lawrence Island, Alaska. S. R. Braund. *M. Nuttal* p 152. Man in the Antarctic: the scientific work of the International Biomedical Expedition to the Antarctic (IBEA). J. Rivolier and others (editors). *B. Shoemaker* p 152. Reindeer on South Georgia. N. Leader-Williams. *B. Stonehouse* p 152. Polar bears. I. Stirling. *B. Stonehouse* p 153. Kinship and the drum dance in a northern Dene community. M. Asch. *P. Vitebsky* p 153. Brief reviews p 153

### IN BRIEF

- Soviet help for injured Australians in Antarctica; Climate and climate-related datasets for the Canadian Arctic; Geological, Quaternary and aeromagnetic maps of Greenland; New Zealand Antarctic scientists say no to Antarctic mining; Australian Antarctic stations refurbished; New look for Cormorant; Expedition transport ships lost in Antarctica; p 154.

### OBITUARY

- Prof R. H. N. Bulmer; R. B. Freeman; Dr G. W. Marsh; p 156
