# THE JOURNAL OF HYGIENE

EDITED BY

GEORGE H. F. NUTTALL, M.D., PH.D., Sc.D., F.R.S.

QUICK PROFESSOR OF BIOLOGY IN THE UNIVERSITY OF CAMBRIDGE

IN CONJUNCTION WITH

JOHN S. HALDANE, M.D., LL.D., F.R.S.,  
Reader in Physiology in the University of Oxford.

ARTHUR NEWSHOLME, C.B., M.D.,  
Medical Officer to the Local Government Board.

CHARLES J. MARTIN, M.B., D.Sc., F.R.S.,  
Director of the Lister Institute, London.

J. C. G. LEDINGHAM, M.B., D.Sc.,  
Bacteriologist-in-Chief, Lister Institute, London.

G. S. GRAHAM-SMITH, M.D.,  
University Lecturer in Hygiene, Cambridge.

## Artificial Parthenogenesis and Fertilization.

By JACQUES LOEB,

Member of the Rockefeller Institute for Medical Research.

318 pages. 12mo. Cloth. 10s. net.

This new work presents the first complete treatment of the subject of artificial parthenogenesis in English. Professor Loeb published four years ago a book in German under the title *Die chemische Entwicklungserregung des tierischen Eies*. Mr W. O. R. King, of the University of Leeds, translated the book into English, and the translation has been revised, enlarged, and brought up to date by Professor Loeb. It gives, as the author says in the preface, an account of the various methods by which unfertilized eggs can be caused to develop by physico-chemical means, and the conclusions which can be drawn from them concerning the mechanism by which the spermatozoon induces development. Since the problem of fertilization is intimately connected with so many different problems of physiology and pathology, the bearing of the facts recorded and discussed in the book goes beyond the special problem indicated by the title.

"The subject of the book is an analysis of the mechanism by which the male sex cell—the spermatozoon—causes the animal egg to develop. The author has gained a world-wide reputation for his achievements in artificial fertilization, and this work shows how, according to his observations, the action of well-known chemical and physical agencies may be substituted for that of the living spermatozoon."—*British Medical Journal*

## Contributions to Medical Science.

By HOWARD TAYLOR RICKETTS,

Formerly Assistant Professor of Pathology in the University of Chicago.

Published as a tribute to his memory by his colleagues under the auspices of the Chicago Pathological Society.

508 pages. 8vo. Cloth. 20s. net.

Dr Ricketts died of typhus fever in the City of Mexico, May 3, 1910. He was at that time prosecuting researches into the nature of typhus and but a few days before had announced the discovery of a micro-organism which is believed to be the cause of the disease. He had also shown that the infection may be carried by an insect, and thus pointed out the way for preventive measures. These achievements, together with earlier work on Rocky Mountain spotted fever, give Dr Ricketts a high and honourable place on the records of medical research.

The present volume contains thirty papers on these and allied topics. It is rich in information of immediate value and in suggestions to future investigators. It is also an impressive memorial to a man whose life was deliberately laid down in the service of humanity.

The publications of the University of Chicago Press, a full catalogue of which will be sent on application, are sold in the United Kingdom and the British Colonies by THE CAMBRIDGE UNIVERSITY PRESS, Fetter Lane, London, E C.

# CONTENTS

No. 1 (April).

	PAGE
MASTERMAN, E. W. G. Notes on some Tropical Diseases in Palestine. (With Plate I and 1 Chart) . . . . .	1
COOPER, E. A. On the Protective and Curative Properties of certain Foodstuffs against Polyneuritis induced in Birds by a Diet of Polished Rice. Part II . . . . .	12
HINDLE, EDWARD and MERRIMAN, GORDON. The Range of Flight of <i>Musca domestica</i> . Report upon Experiments. (With 13 Charts) . . . . .	23
HINDLE, EDWARD. Note on the Colour-preference of Flies . . . . .	46
LEWIS, FREDERICK C. An Electro-chemical Apparatus for the Disinfection and Cleansing of Cultures and Slides for use in Bacteriological and Pathological Laboratories. (With Plate II and 1 Text-figure) . . . . .	48
DUDGEON, LEONARD S. A Contribution to the Study of the Complement Fixation Reaction in Tuberculous Animals. (With 12 Charts) . . . . .	52
DUDGEON, LEONARD S., MEEK, W. O. and WEIR, H. B. The Complement Fixation Reaction in Tuberculosis . . . . .	72
MEEK, W. O. Observations on the Immune-body Content of the Blood Serum in Pulmonary Tuberculosis, as determined by Means of the Complement Fixation Reaction . . . . .	76
GREENWOOD, M., JUNR. and WOOD, FRANCES. The Relation between the Cancer and Diabetes Death-rates . . . . .	83
BARR, WILLIAM. The Influence of Ocean Spindrift and Blown Spray on the Chlorine Content of Inland Ground Waters. (With 3 Maps) . . . . .	119

## No. 2 (July).

	PAGE
STRICKLAND, C. The Biology of <i>Ceratophyllus fasciatus</i> Bosc., the Common Rat-Flea of Great Britain . . . . .	129
ROBERTSON, T. BRAILSFORD. On the Conditions under which Discontinuous Events may be employed as a Measure of Continuous Processes, with Especial Reference to the killing of Bacteria by Disinfectants . . . . .	143
FREMLIN, H. S. Further Observations on Nitroso-bacteria . . . . .	149
PATRICK, ADAM. Agglutination Experiments with Typhoid Bacilli isolated from the Body . . . . .	163
GREEN, A. B. The Resistance of the Vaccine Virus to Filtration . . . . .	182
BROWN, J. W. and MOHAN LAL. An Inquiry into the Relation between Social Status and Cancer Mortality . . . . .	186
SCHÜTZE, H. Studies in Spontaneous Phagocytosis . . . . .	201
PENFOLD, WILLIAM JAS. On the Nature of Bacterial Lag. (With 5 Charts) . . . . .	215
LEDINGHAM, J. C. G. and PENFOLD, W. J. Mathematical Analysis of the Lag-phase in Bacterial Growth. (With 9 Charts and 1 Text-figure) . . . . .	242
ARKWRIGHT, J. A. Experiments on the Agglutination of Watery Extracts of <i>B. typhosus</i> . . . . .	261

## No. 3 (November).

EASTWOOD, A. and GRIFFITH, F. Report to the Local Govern- ment Board on an Enquiry into Rat Plague in East Anglia during the period July—October, 1911. (With Map) . . . . .	285
MACALISTER, G. H. and BROOKS, R. ST JOHN. Report upon the Post-Mortem Examination of Rats at Ipswich . . . . .	316
BRADDON, W. L. and COOPER, E. A. The Influence of Metabolic Factors in Beri-Beri. Part I. The Effect of increasing the Carbohydrate Ration on the Development of Polyneuritis in Birds fed on Polished Rice . . . . .	331

	PAGE
GÓZONY, LAJOS, HINDLE, EDWARD and ROSS, PHILIP H. Serological Tests . . . . .	354
WARNER, CHARLOTTE E. The Thermoprecipitin Method in the Diagnosis of Bubonic Plague in Cadavers . . . . .	360
GLENNY, A. T. On Suggested Formulae connecting Dosage and Death Time. (With Four Charts) . . . . .	371
RITCHIE, JOHN. Note on the Non-Lactose Fermenters in Fresh Milk . . . . .	393
MCCRAE, J. The Phosphoric Oxide Content of Maize Flour . . . . .	395
SCHMIDT, HANS. Studies on the Effect exerted by Shaking on Serum . . . . .	399

---

No. 4 (December).

SCHMIDT, HANS. Studies on the Inactivation of Complement by Shaking . . . . .	417
SCHMIDT, HANS. Studies on the Berkefeld-filtration of Complement . . . . .	437
EWART, R. J. The Influence of the Age of the Parent on the Vitality of the Child—a First Study . . . . .	453
HEWLETT, R. TANNER and REVIS, CECIL. On the Presence of so-called "Complement" in Milk . . . . .	481
BACOT, A., PETRIE, GEORGE F. and TODD, Captain RONALD E. The Fleas found on Rats and other Rodents, living in Association with Man, and trapped in the Towns, Villages and Nile boats of Upper Egypt. (With Map) . . . . .	498
HORT, EDWARD C. The Sterility of Normal Urine in Man . . . . .	509
INDEX OF AUTHORS . . . . .	517
INDEX OF SUBJECTS . . . . .	519
