Language and Linguistics

Books and Journals from Cambridge University Press

We are the world's leading publisher in language and linguistics, with a wide-ranging list of journals and books covering the scope of this discipline.

Our publishing encompasses theoretical, applied and sociolinguistics, and represents a breadth of subfields, including grammar and syntax, phonetics and phonology, semantics and pragmatics, historical linguistics, discourse and conversation analysis, psycholinguistics and neurolinguistics, and first and second language acquisition.

Our acclaimed book list includes state-of-the-art monographs as well as major reference works, guides to research methods, and textbooks at all levels.

STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the SSLA website at http://journals.cambridge.org/sla. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,00 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 11,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are shorter empirical studies motivated by a previously published study (not necessarily one published in SSLA). The background and motivation sections will necessarily be shorter compared to research articles as the maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 11,000-word limit of regular research articles; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in SSLA.

INTRODUCTION TO THE SPECIAL ISSUE

TBLT and L2 Pronunciation: Do the Benefits of Tasks Extend beyond Grammar and Lexis?
Laura Gurzynski-Weiss, Avizia Yim Long, and Megan Solon 213

ARTICLES

Pronunciation in Face-to-Face and Audio-Only Synchronous Computer-Mediated Learner Interactions
Shawn Loewen and Daniel R. Isbell 225

The Impact of Recasts on the Development of Primary Stress in a Synchronous Computer-Mediated Environment
Özgür Parlak and Nicole Ziegler 257

TBLT Instructional Effects on Tonal Alignment and Pitch Range in L2 Spanish Imperatives versus Declaratives
Sean McKinnon 287

The Role of Task Repetition in Learning Word-Stress Patterns through Auditory Priming Tasks
YeonJoo Jung, YouJin Kim, and John Murphy 319

Task Complexity, Language-Related Episodes, and Production of L2 Spanish Vowels
Megan Solon, Avizia Y. Long, and Laura Gurzynski-Weiss 347

EPILOGUE TO THE SPECIAL ISSUE

Task-Based Pronunciation Teaching and Research: Key Issues and Future Directions
Joan C. Mora and Mayya Levkina 381
