Soviet Semiotics

An Anthology

*edited, translated, and with an introduction by
Daniel P. Lucid*

Semiotics, the science of signs, is now the fastest-growing and most lively *structuralist* discipline. Writing on general concepts, modeling systems, communications studies, text analyses, art and literature, and the typology of culture, a number of distinguished Soviet scholars add a fresh and exciting dimension to Western thinking in this field. Fortuntelling by cards and moves in a game of chess, folk myths, cybernetic codes, and rules of social etiquette . . . such phenomena, they show, must all be interpreted according to the conventions of a specific sign language. \$16.00
