

# NOTES FOR AUTHORS

## Submitting a paper

Full details on submitting a paper, including the style guide and L<sup>A</sup>T<sub>E</sub>X class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

*Proceedings of the Royal Society of Edinburgh: Section A* considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- *Proceedings A* has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit [https://rse.msp.org/submit\\_new.php?jpath=rse\\_proc\\_a\\_math](https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math) and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

## Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here:

<https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

## Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

## Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£1780/US\$2835 (in 2017), the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

## CONTENTS

GIUSEPPE MARIA COCLITE AND LORENZO DI RUVO Existence results for the Kudryashov–Sinelnshchikov–Olver equation	425–450
MIHAI MIHĂILESCU The spectrum of the mean curvature operator	451–463
MALKHAZ SHASHIASHVILI Nonasymptotic bounds for the quadratic risk of the Grenander estimator	464–472
KAMIL KOSIBA AND FILIP RINDLER On the relaxation of integral functionals depending on the symmetrized gradient	473–508
WOLFGANG PITSCH AND JÉRÔME SCHERER Realizing doubles: a conjugation zoo	509–524
RAMON ANTOINE, FRANCESC PERERA, LEONEL ROBERT AND HANNES THIEL Edwards’ condition for quasitraces on $C^*$ -algebras	525–547
CLAUDIANOR O. ALVES, ZIQING YUAN AND LIHONG HUANG Existence and multiplicity of solutions for discontinuous elliptic problems in $\mathbb{R}^N$	548–572
NING WANG, ZHI-CHENG WANG AND XIONGXIONG BAO Transition waves for lattice Fisher-KPP equations with time and space dependence	573–600
VINCENZO AMBROSIO, TERESA ISERNIA AND VICENTIU D. RADULESCU Concentration of positive solutions for a class of fractional $p$ -Kirchhoff type equations	601–651
E. SOFOS The size of the primes obstructing the existence of rational points	652–704
DARIO PIEROTTI, NICOLA SOAVE AND GIANMARIA VERZINI Local minimizers in absence of ground states for the critical NLS energy on metric graphs	705–733
L. PAOLI AND M. SHILLOR A dynamic thermo-mechanical actuator system with contact and Barber’s heat exchange boundary conditions	734–760
QILIN XIE AND XU ZHANG Semi-classical solutions for Kirchhoff type problem with a critical frequency	761–798
YURI KONDRATIEV, YULIYA MISHURA AND GEORGIY SHEVCHENKO Limit theorems for additive functionals of continuous time random walks	799–820
WENBIN LV AND QINGYUAN WANG An $n$ -dimensional chemotaxis system with signal-dependent motility and generalized logistic source: global existence and asymptotic stabilization	821–841
DA-WEN DENG AND SZE-MAN NGAI Estimates for sums and gaps of eigenvalues of Laplacians on measure spaces	842–861
