SOCIAL FORMATIONS AND POWER IN LATIN AMERICA

edited by **JORGE GRACIANRENA** and **ROLANDO FRANCO**,
United Nations Economic Commission for Latin America,
Santiago, Chile

Two perspectives are presented concerning the political development of Latin America over the last three decades—the political process in relation to inherent values and ideological frames of reference, and as it has been reflected in the social sciences—through a discussion of regional contributors.

LATIN AMERICA AND WORLD ECONOMY

A Changing International Order

edited by JOSEPH GRUNWALD

How do nations of Latin America interact with other countries in the world community? This anthology approaches the region's relations with the outside world from both an economic and a political perspective, examining Latin America's desire to integrate with the world economy, as well as its struggle for self-reliance. Latin American and non-Latin American contributors discuss a range of subjects including the character of the "special relationship" between Latin America and the United States, and the ambiguous nature of Latin America's relations with other countries of the Third World.

Notes on SELA, GABRIEL VALDES S.

"As long as the notion persists that Latin America is unimportant for the United States and other developed countries, it will be difficult to persuade Latin American countries that they are living in an interdependent world. One-sided importance creates a one-sided dependency relationship. Such a perception results in demands, not cooperation. Cooperation for development becomes meaningful only when there is a recognition of interdependence on both sides of the North-South relationship."

Manchester and São Paulo

Problems of Rapid Urban Growth

Edited by John D. Wirth & Robert L. Jones. Nineteenth-century Manchester, the first great industrial city, and twentieth-century São Paulo, the premier industrial city of the Third World, are the two great paradigms of explosive urban growth under industrial capitalism. The nine papers in this book examine similarities and differences in the forces that shaped the two cities, in the process providing general insights into the conditions and consequences of rapid urbanization and industrialization. \$17.50

Class Conflict and Economic Development in Chile, 1958-1973

Barbara Stallings. This account of the interplay of politics and economics throughout three successive Chilean regimes (ending with the 1973 coup) documents the vital role played by social class in determining not only the types of economic policies followed in Latin America, but their outcome as well. The regimes are compared in terms of property relations, government expenditure, credit investment, wages, prices, employment, and foreign investment. \$18.50

Oil and Nationalism in Argentina

A History

Carl E. Solberg. A case study of YPF, the world's first state-owned oil company, this work traces the development of Argentina's nationalistic petroleum policy from the discovery of oil on state-owned land in 1907 to the present. The focus is on the period prior to 1930, when the institutions and ideologies that shaped Argentine petroleum affairs became firmly established. \$15.00

LEADERS OF REVOLUTION

by MOSTAFA REJAI with KAY PHILLIPS

"Professor Rejai's Leaders of Revolution is a comprehensive report of a major research undertaking. It is the first general comparative study of revolutionary elites; no one to my knowledge has tried anything so broad in scope and historical depth. The empirical work is solid, given the limitation of the sources. The comparative evidence on the life experiences and ideological orientations of revolutionary leaders is a particularly valuable contribution. The 'situational theory' of revolutionary leadership is plausible, especially in the light of the evidence which gives it substance. The clarity of style is exemplary. A distinguished addition to the empirical literature on revolutionary movements."

— Ted Robert Gurr, Northwestern University

"LEADERS OF REVOLUTION fills a long-standing void in the literature of revolution and violence. The study presents a remarkable and ingenious comparative analysis of revolutionary elites, using quantified data. At times I had thought it impossible to get any quantifiable comparability between leaders. LEADERS OF REVOLUTION has changed my mind. A bold and pioneering venture."

METROPOLITAN LATIN AMERICA: The Challenge and the Response

Latin American Urban Research, Volume 6

edited by WAYNE A. CORNELIUS, *Massachusetts Institute of Technology*
ROBERT V. KEMPER, *Southern Methodist University*

This volume focuses on the most critical problems confronting nine major Latin American and Caribbean cities, and the actual responses of local and national governments to these problems. Each chapter provides a comprehensive overview of urban development problems and government performance in dealing with them in a single metropolitan area. Contributors also discuss the role of the metropolitan area in regional and national development, and the tensions between government policies aimed at the problems of the metropolitan area and policies for national and regional development. The volume provides indispensable source material for scholars doing research on specific cities as well as an empirical base for comparative urban studies. It also includes a 1,600-item bibliography of studies on urban Latin America published during the 1974-1976 period.

EVALUATION RESEARCH AND DEVELOPMENT ACTIVITIES

by FRANCIS W. HOOLE

This study concerns the methodology used to evaluate the impact of development activities. The book presents the methodology of the evaluation research approach, illustrates its use in the development field, and discusses its advantages and limitations. These topics have significant practical importance today as it becomes apparent that numerous development programs of national governments are ineffective and as various technical assistance agencies undergo crises concerning their abilities to accomplish objectives. The book concludes by summarizing the implications which result from this discussion, and makes suggestions for further research.
