THE LATEST FROM GREGORY SHAFFER

Victorious after World War II and the Cold War, the United States and its allies largely wrote the rules for international trade and investment. Yet, by 2020, it was the United States that became the great disrupter – disenchanted with the rules' constraints. Paradoxically, China, India, Brazil, and other emerging economies became stakeholders in and, at times, defenders of economic globalization and the rules regulating it. *Emerging Powers and the World Trading System* explains how this came to be and addresses the micropolitics of trade law – what has been developing under the surface of the business of trade through the practice of law, which has broad macro implications.

“A superb analysis of the crisis in the legal order governing world trade.”

MARTIN WOLF, FINANCIAL TIMES

“If you want to understand the past and the future of the transnational legal order for trade, read this book!”

JENNIFER HILLMAN, SENIOR FELLOW AT THE COUNCIL ON FOREIGN RELATIONS

“Eloquently illuminates a complex but vital subject – the law's power to shape a more inclusive model of transnational trade.”

ROBERTO AZEVÊDO, FORMER DIRECTOR-GENERAL OF THE WORLD TRADE ORGANIZATION

WHAT CAPITALISM NEEDS

Forgotten Lessons
of Great Economists

John L. Campbell and John A. Hall

There is no inevitable logic of capitalism. Capitalism's stability depends on how well nation-states manage it and on social cohesion.

"Inspired by the insights of six key economists, Campbell and Hall offer a masterful interpretation of the global political economy from the early 20th-century until today. What political and economic conditions enabled the golden era of prosperity after the trauma of the Second World War? Why did this period end as economic inequality combined with slower growth, greater instability and resurgent intolerance? And what lies ahead, as China assumes a leading role in the world's economy? In a compelling and carefully researched analysis, the authors identify the critical conditions upon which the viability of global capitalism depends and map out ways to meet the challenges of the future." Bruce G. Carruthers, *Northwestern University*

"This superb book reminds us of one enduring insight. Economists like Smith, Hirschman, List, Keynes, Schumpeter and Polanyi understood what modern economics has forgotten. Capitalism does not flourish when markets are fully free. It thrives when they are socially embedded and politically well governed. A turbulent 20th century has made this pandemic moment ripe for this timeless reminder." Peter J. Katzenstein, *Cornell University*

"A capitalist economy is never pure capitalism. Its operation is, as John Campbell and John Hall show us so clearly and effectively, both supported and impeded by an array of institutions and government policies, and it produces consequences that themselves affect the economy's functioning." Lane Kenworthy, *University of California, San Diego*

The editors invite submission of research articles and review articles bearing upon problems in international relations and comparative politics. Manuscripts should be double-spaced and submitted through the Web-based submission system, ScholarOne Manuscripts, at <http://mc.manuscriptcentral.com/wp>. Articles may be up to 12,500 words in length, including notes and references. Tables, figures, appendices, and supplementary materials need not be included in the word count. Word count should be indicated. Manuscripts that exceed the limit *will not be considered*. Guidelines for articles and special issues, abstracts of forthcoming and recently published articles, and other information can be found on the *World Politics* Web page, at piirs.princeton.edu/wpj; digital versions of articles can be found at cambridge.org/wpo.

Authors can expect to receive decisions on their submissions within four months. Procedures for reviewing manuscripts are based on the anonymity of the author and the confidentiality of readers' and editors' reports; author anonymity is preserved, as well, during the editorial decision-making process. Self-references should therefore be removed. Referees are drawn from Princeton and other institutions; published articles have usually been reviewed by at least two non-Princeton reviewers and often, but not in all instances, one of the editors. Referees for the previous calendar year are acknowledged annually in issue 4 of the journal. In the case of an article deemed to be inappropriate for *World Politics*, the editors strive to notify the author within a month of submission that the article has been withdrawn from consideration.

World Politics does not consider material that has already been published (including in a foreign language), has been concurrently submitted elsewhere, or is already slated for publication even in a somewhat different form, such as a chapter of a book. This policy applies to both print and online formats. For these purposes, an online format that would preclude consideration by the journal refers to a refereed presentation and/or a copyrighted working paper. Examples of pre-published materials that may be considered are print working papers and online papers on an author's own homepage or Web site. Certain material already scheduled for publication, such as a chapter of a book, may be considered by *World Politics* if it is to appear no earlier than nine months after the likely date of publication in the journal. Dual submission and dual publication are not permitted while a piece is under consideration at *World Politics*. These restrictions apply to all copyrighted publications (including book chapters, journal articles, and/or working papers). Statements of fact and opinion appearing in the journal are the responsibility of the authors alone and do not imply endorsement of the editors or publisher. The journal does not publish communications to the editor or rejoinders to specific articles. Scholars who believe they have been challenged are encouraged to submit an article that will advance the scholarly debate.
