International Journal of Technology Assessment in Health Care

Official Journal of Health Technology Assessment International

Editor-in-Chief

Marjukka Mäkelä, M.D., Ph.D., M.Sc.

Research Professor, FINOHTA (Finnish Office for Health Technology Assessment)
at THL (National Institute for Health and Welfare)

P.O. Box 30

00271 Helsinki, Finland

Telephone: +358 20 610 7290; Fax: +358 20 610 7278

Email: marjukka.makela@thl.fi

Aims and Scope: The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Publishing, Advertising, and Subscription Offices: Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK (for U.K. and elsewhere).

2012 Subscription Information: *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623) is published quarterly in January, April, July, and October by Cambridge

University Press, 32 Avenue of the Americas, New York, NY 10013-2473; Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual institutional subscription rates for Volume 28 (2012): Print and online US \$580.00, online only US \$485.00, and print only US \$545.00 in the U.S.A., Canada, and Mexico; Print and online UK £327.00, online only UK £278.00, and print only UK £303.00 elsewhere. Individual rates: Print and online US \$281.00 and print only US \$255.00 in the U.S.A., Canada, and Mexico; Print and online UK £164.00 and print only UK £144.00 elsewhere. Prices include postage; air mail or registered mail is extra. Single part: US \$152.00 in the U.S.A., Canada, and Mexico; UK £86.00 elsewhere. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

CONTENTS

EDITORIAL

- 1 Volume 27: Statistics and thanks
Marjukka Mäkelä and Terhi Ilonen

ASSESSMENTS

- 3 Cost effectiveness of peer support for type 2 diabetes
Paddy Gillespie, Eamon O'Shea, Gillian Paul, Tom O'Dowd, and Susan M. Smith
- 12 Incidence-based cost-of-illness model for metastatic breast cancer in the United States
Sonja V. Sorensen, Jo Wern Goh, Feng Pan, Connie Chen, Denise Yardley, Miguel Martín, Kevin Knopf, Ágnes Benedict, Carla Giorgetti, and Shrividya Iyer
- 22 Effectiveness and cost-effectiveness of supplemental glutamine dipeptide in total parenteral nutrition therapy for critically ill patients: A discrete event simulation model based on Italian data
Lorenzo Pradelli, Sergio Iannazzo, Orietta Zaniolo, Maurizio Muscaritoli, and Mario Eandi

METHODS

- 29 Updating clinical practice recommendations: Is it worthwhile and when?
Georgios Lyratzopoulos, Steven Barnes, Heather Stegenga, Suzi Peden, and Bruce Campbell
- 36 Clinical heterogeneity in systematic reviews and health technology assessments: Synthesis of guidance documents and the literature
Gerald Gartlehner, Suzanne L. West, Alyssa J. Mansfield, Charles Poole, Elizabeth Tant, Linda J. Lux, and Kathleen N. Lohr
- 44 A model for assessment of telemedicine applications: MAST
Kristian Kidholm, Anne Granstrøm Ekeland, Lise Kvistgaard Jensen, Janne Rasmussen, Claus Duedal Pedersen, Alison Bowes, Signe Agnes Flottorp, and Mickael Bech
- 52 Linking the evidence: Intermediate outcomes in medical test assessments
Lukas P. Staub, Suzanne Dyer, Sarah J. Lord, and R. John Simes
- 59 A comparison of two search methods for determining the scope of systematic reviews and health technology assessments
Louise Forsetlund, Ingvild Kirkehei, Ingrid Harboe, and Jan Odgaard-Jensen
- 65 Brazilian health technology assessment bulletin: Editorial process, dissemination strategies, critical appraisal, and initial impact
Marcus Tolentino Silva, Rosimary Terezinha de Almeida, Cintia Maria Gava, Taís Freire Galvão, Edina Mariko Koga da Silva, Vania Cristina Canuto Santos, Misani Akiko Kanamota Ronchini, Aline Monte de Mesquita, Flávia Tavares Silva Elias, Alexandre Lemgruber Portugal d'Oliveira, and Álvaro Nagib Atallah

POLICIES

- 70 Health technology assessment in Poland and Scotland: Comparison of process and decisions
Katarzyna Kolasa and Radek Wasiak
- 77 The impact of health technology assessment reports on decision making in Austria
Ingrid Zechmeister and Ines Schumacher
