# CONTENTS

JORGE ALMEIDA On finite simple semigroups 205

BOOK REVIEWS 167, 333, 497

BRUNO BOSBACH Representable divisibility semigroups 45

K. A. BROWN, A. HAGHANY AND T. H. LENAGAN Reflexive ideals and injective modules over Noetherian *v-H* orders 31

K. A. BROWN, H. MARUBAYASHI AND P. F. SMITH Group rings which are *v-HC* orders and Krull orders 217

C. CHARITOS AND P. PAMFILOS Surfaces with isometric geodesics 359

NIGEL J. CUTLAND On large deviations in Hilbert space 487

JUAN C. DÍAZ AND JUAN A. LÓPEZ MOLINA On the projective tensor product of Fréchet spaces 169

NGUYEN V. DUNG Modules whose closed submodules are finitely generated 161

D. M. E. FOSTER A lower bound for a remainder term associated with the sum of digits function 121

B. J. GARDNER AND P. N. STEWART Prime essential rings 241

PAT GILMER AND CHARLES LIVINGSTON An algebraic link concordance group for $(p, 2p-1)$-links in $S^{2p+1}$ 455

EMILIA GIRALDES AND JOHN M. HOWIE Embeddings into finite idempotent-generated semigroups: some arithmetical results 259

A. HAGHANY, see K. A. BROWN

JOHN HANNAH Regular bisimple rings 89

YASUYUKI HIRANO Some characterizations of $\pi$-regular rings with no infinite trivial subring 1

JOHN M. HOWIE, see EMILIA GIRALDES

ARNOLD KNOPFMACHER The length of the continued fraction expansion for a class of rational functions in $\mathbb{F}_q(X)$ 7

KONIN KOUA Similarité entre l'algèbre de Volterra et un quotient d'algèbre uniforme 383

P. H. KROPHOLLER AND B. MOSELLE A family of crystallographic groups with 2-torsion in $K_0$ of the rational group algebra 325

S. L. LEE AND W. S. TANG Approximation and spectral properties of periodic spline operators 363

https://doi.org/10.1017/S0013091500005125 Published online by Cambridge University Press

T. H. LENAGAN, see K. A. BROWN

INESSA LEVI Normal semigroups of one-to-one transformations 65

CHARLES LIVINGSTON, see PAT GILMER

JUAN A. LÓPEZ MOLINA, see JUAN C. DÍAZ

J. H. McCABE, see A. SRI RANGA

R. G. McLEAN On a problem of Barnes and Duncan 321

H. MARUBAYASHI, see K. A. BROWN

A. W. MASON Subnormal subgroups of $E_n(R)$ have no free, non-abelian quotients, when $n \geqq 3$ 113

DRAGOSLAV S. MITRINOVIĆ AND JOSIP E. PEČARIĆ On inequalities of Hilbert and Widder 411

B. MOSELLE, see P. H. KROPHOLLER

TAKAHIKO NAKAZI Existence of solutions of extremal problems in $H^1$ 99

L. O'CARROLL On bounding the Stückrad–Vogel multiplicity 251

L. PÄIVÄRINTA AND T. RUNST Multiplicity results for semilinear elliptic boundary value problems in Besov and Triebel-Lizorkin spaces 393

P. PAMFILOS, see C. CHARITOS

JOSIP E. PEČARIĆ, see DRAGOSLAV S. MITRINOVIĆ

JAAK PEETRE Some observations on algorithms of the Gauss–Borchardt type 415

MARIO PETRICH Congruence lattices of regular semigroups related to kernels and traces 179

RAINER H. PICARD Hilbert spaces of tempered distributions, Hermite expansions and sequence spaces 271

ALAN W. REID Totally geodesic surfaces in hyperbolic 3-manifolds 77

JAMES RENSHAW Subsemigroups of free products of semigroups 337

J. E. ROBERTS Groups which satisfy a weak form of Poincaré duality 463

T. RUNST, see L. PÄIVÄRINTO

R. Y. SHARP, see H. ANSARI TOROGHY

P. F. SMITH, see K. A. BROWN

A. SRI RANGA AND J. H. McCABE On the extensions of some classical distributions 19

P. N. STEWART, see B. J. GARDNER

W. S. TANG, see S. L. LEE

https://doi.org/10.1017/S0013091500005125 Published online by Cambridge University Press

H. ANSARI TOROGHY AND R. Y. SHARP Asymptotic behaviour of ideals relative to injective modules over commutative Noetherian rings 155

A. ÜLGER Some stability properties of Arens regular bilinear operators 443

L. VAN WYK The 2-primitive ideals of structural matrix near-rings 229

J. R. L. WEBB AND WEIYU ZHAO On the maximal monotonicity and the range of the sum of nonlinear maximal monotone operators 143

DAVID L. WILKENS Invariants and examples of group actions on trees and length functions 313

YONGZHI XU An injective far-field pattern operator and inverse scattering problem in a finite depth ocean 295

MOHAMMAD YAMIN Relative relation modules of finite groups 433

WEIYU ZHAO, see J. R. L. WEBB

# THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for "the promotion and extension of Mathematical Science, Pure and Applied".

Nominations for Ordinary Membership are received at any one Ordinary Meeting and voted upon at the next. Members receive notices of all meetings and may subscribe to the Proceedings at a reduced rate. Further information about membership can be obtained from the Secretary.

The Society's Proceedings, containing papers embodying the results of research that is original in matter or manner, are published in parts. Three parts complete a volume. One volume is issued each year. Series I comprised forty-four volumes published from 1884 to 1926. Series II commenced in 1927.

Papers to be considered for publication should be sent to the Secretary or to an Editor. Manuscripts (**2 copies**) should be typewritten on A4 paper with double spacing and generous margins. The style and arrangement should conform to current practice in the Proceedings. Each manuscript should contain a short abstract of not more than 200 words and also a primary classification number from the American Mathematical Society's 1985 Mathematics Subject Classification Scheme. References, including titles of papers, should be given in the form adopted by Mathematical Reviews, footnotes being avoided if possible. Figures should be separated from the text and lettered, ready for photographic reduction; their intended location should be clearly indicated. Manuscripts which are not suitable for submission to the printer will not be accepted. Authors are advised to retain a copy of any material submitted, as the Society cannot accept responsibility for any loss.

A proof is supplied once. Authors are particularly requested to correct and return the proof promptly. Excessive corrections may be charged to authors. Fifty free offprints, and additional copies at cost, will be supplied if ordered on a form returned with the proof.

The *Proceedings* are published at the price of £60.00 ($150) for a volume of three parts.

Enquiries regarding purchase of back numbers should be addressed to

Kraus Reprint Ltd.
Route 100
Millwood
N.Y. 10546
U.S.A.

for volumes of Series I and up to Volume 14 of Series II, and to Oxford University Press

Journals Marketing Department
Oxford University Press
Southfield Road
Eynsham
Oxford OX8 1JJ
England

for subsequent issues.

The Society's address is

The Edinburgh Mathematical Society
James Clerk Maxwell Building
The King's Buildings
Edinburgh EH9 3JZ

Communications concerning the Library should be addressed to the Librarian.

All other correspondence should be addressed to the Secretary.
