

VOLUME 106 SUPPLEMENT 1993

Parasitology

Symposia of the British Society for Parasitology Volume 30

The impact of global change on disease

EDITED BY W. HOMINICK

CO-ORDINATING EDITOR L. H. CHAPPELL

CAMBRIDGE UNIVERSITY PRESS

Subscriptions may be sent to any bookseller or subscription agent or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 10011-4211. All orders must be accompanied by payment. The subscription price of volumes 106 and 107, 1993 is £225 (US \$440 in the USA, Canada and Mexico), payable in advance, for ten parts plus supplements; separate parts cost £20 or US \$40 each (plus postage). Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo. Second class postage paid at New York, NY and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to *Parasitology*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573-9864.

Contents

<i>Preface</i>	S1	Trends in stratospheric ozone	S41
<i>List of contributions</i>	S3	Trends in UV radiation	S42
Global warming: trends and effects	S5	Ultraviolet doses to humans	S43
Summary	S5	Quantitative predictions of health impacts	S44
Introduction	S5	Conclusions	S45
Variability	S5	References	S45
IPCC findings	S6	Mankind and plants: the need to conserve biodiversity	S47
Uncertainties	S6	Summary	S47
Human impact: refugees and health	S8	Introduction	S47
UNCED	S9	Plants as the ultimate source of food and oxygen	S48
Conclusion	S9	Essential nutrients of plant origin	S48
Atmospheric change: effect on plant pests and diseases	S11	Plants as causes of disease	S49
Summary	S11	Pharmaceuticals from plants	S50
Introduction	S11	Plant drugs yet to be discovered	S50
Impacts of air pollution on invertebrate pests	S13	The logic of looking for drugs in plants	S51
An integrated study into the impacts of SO ₂ and NO ₂ on agricultural aphid pests	S13	Isolation versus synthesis	S51
Impacts of O ₃ on aphids	S16	New approaches to the production of plant-derived drugs	S51
Impacts of CO ₂ on insects	S17	(a) Tissue culture	S51
Impacts of air pollutants on fungal pathogens	S18	(b) Genetic engineering	S52
Potential interactions involving air pollution and plant diseases and pests	S20	The need for conservation	S52
Conclusion	S22	Conclusions	S53
References	S22	References	S53
Aquatic pollution: effects on the health of fish and shellfish	S25	Deforestation: effects on vector-borne disease	S55
Summary	S25	Summary	S55
Introduction	S25	Introduction	S55
Historical records on fish and shellfish diseases	S26	Viruses: arboviruses	S56
Past evidence for a pollution/disease relationship	S27	Malaria	S57
Pollution-related diseases	S29	Chagas' disease	S60
(a) Effects of water acidification on fish	S29	Leishmaniasis	S61
(b) Cancers in fish and shellfish	S29	Loiasis	S63
How does environmental change affect fish and shellfish?	S32	Lymphatic filariasis	S64
Conclusions	S33	Onchocerciasis	S64
References	S34	Schistosomiasis	S68
Depletion of the ozone layer: consequences for non-infectious human diseases	S39	Discussion	S69
Summary	S39	Acknowledgements	S69
Introduction	S39	References	S70
Ultraviolet radiation and human health	S40	Monitoring trypanosomiasis in space and time	S77
		Summary	S77
		Introduction	S77
		Variation in space	S77
		Variation in time	S85
		Effect of climate	S85
		Effect of tsetse susceptibility	S86
		Effect of host population susceptibility	S87

Effect of trypanosome strain variation	S88	Epidemiological transition: health change	
Effect of history	S89	with urbanization and modernization	S97
Discussion and conclusions	S90	Epidemiological change in middle-income	
Acknowledgements	S91	countries	S98
References	S91	Health impacts of urbanization: a summary	
		view	S103
Urbanization and human health	S93	Urban health determinants	S103
Summary	S93	Urban health impacts	S103
Introduction	S93	Constraints on improving urban health	S104
Problems of definition	S94	Conclusions	S105
Urbanization = modernization = better		References	S105
health?	S95
