Nutrition Research Reviews

Volume 24, 2011 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at <http://www.cambridge.org/nrr>

Editorial Board

Editor-in-Chief

Dr Graham C Burdge, *University of Southampton, UK*

Address for correspondence

Dr Graham C Burdge, *Editor-in-Chief, Nutrition Research Reviews, Institute of Human Nutrition / DOHaD Division, Institute of Developmental Sciences Building, Mail point 887, Southampton General Hospital, Tremona Road, Southampton SO16 6YD, UK*

Tel: +44(0)23 80798663 Fax: +44(0)23 80795255 Email: G.C.Burdge@soton.ac.uk

US Editor

Professor C M Weaver, *Purdue University, USA*

Editors

Dr N Binns, *NMB Consulting Limited, Ireland*

Dr D Dardevet, *INRA, France*

Dr M Pufulete, *University of Bristol, UK*

Editorial Advisors

Professor P J Aggett, *UK*

Dr M Ashwell, *Baldock, UK*

Dr D A Bender, *University College London, UK*

Dr J L Black, *Warrimoo, Australia*

Dr C Edwards, *Glasgow University, UK*

Dr S French, *Mars UK Ltd. Slough, UK*

Dr J Houdijk, *SAC, UK*

Professor D J Millward, *University of Surrey, UK*

Dr P Rogers, *University of Bristol, UK*

Professor N W Solomons, *CESSIAM, Guatemala*

Professor M Verstegen, *Wageningen University, Netherlands*

Dr K M Younger, *Dublin Institute of Technology, Ireland*

Editorial staff

C Goodstein (*Publications Manager*), C Jackson (*Deputy Publications Manager*),

C T Hughes, L Weeks and H Zdravics (*Publications Officers*), S Hui (*Publications Assistant*)

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Tel: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756, Email: edoffice@nutsoc.org.uk

Publisher: Katy Christomanou

Nutrition Research Reviews is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

Subscription information:

Volume 24 2011 (2 issues)
Internet/print package: £99/\$88 American only/€309 EU only
Internet only: £153/\$274 Americas only/€388 EU only
Print only: £87/\$63 Americas only/€286 EU only

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Information for Authors: The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Dr Graham C Burdge,
Editor-in-Chief, Nutrition Research Reviews,
Institute of Human Nutrition / DOHaD Division,
Institute of Developmental Sciences Building,
Mail point 887, Southampton General Hospital,
Tremona Road,
Southampton SO16 6YD, UK
Tel: +44(0)23 80798663
Fax: +44(0)23 80795255
Email: G.C.Burdge@soton.ac.uk

Directions to Contributors: if not printed in this issue, are available from the Editor-in-chief.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Vol. 24 No. 2 December 2011

Intestinal gene expression in pigs: effects of reduced feed intake during weaning and potential impact of dietary components	
<i>E. Bauer, B. U. Metzler-Zebeli, M. W. A. Verstegen & R. Mosenthin</i>	
Introduction	155
The weaning transition: a brief summary	156
Changes in intestinal gene expression due to reduced feed intake	157
Digestive function and nutrient metabolism	157
Immune function	158
Growth factors	159
Influence of dietary components on intestinal gene expression	160
Protein and amino acids	160
Digestive function and nutrient metabolism	160
Immune function	161
Lipids	161
Digestive function and nutrient metabolism	161
Immune function	162
Carbohydrates	163
Digestive function and nutrient metabolism	163
Fermentable carbohydrates	163
Digestive function and nutrient metabolism	163
Immune function	163
Growth factors	165
Bacterial community and metabolites	165
Microbiota–host interactions	165
SCFA	166
Polyamines	166
Limitations and strengths of gene expression to determine implications of nutrition during weaning	167
Implications for pig nutrition	167
Conclusions	169
Acknowledgements	169
References	169
Role of the rumen in copper and thiomolybdate absorption	
<i>L. Gould & N. R. Kendall</i>	
What does TCA-soluble and -insoluble copper measure?	176
Are thiomolybdates produced in the rumen?	177
Do thiomolybdates transfer into the animal and how?	178
What effects do absorbed thiomolybdates have in the animal?	179
The role of iron: how does it react in the rumen?	180
Sources of copper, molybdenum, sulfur and iron	180
Summary	181
Acknowledgements	181
References	181
Comparative effects of processing methods on the feeding value of maize in feedlot cattle	
<i>R. A. Zinn, A. Barreras, L. Corona, F. N. Owens & A. Plascencia</i>	
Introduction	183
Components of maize grain that limit digestion	184
Seed coat	184
Germ size	184
Vitreous endosperm	184
Amylose content	185
Resistant starch	185
Effects of processing on site and extent of starch digestion by cattle	186

Contents

Effects of processing on growth performance and net energy value of maize	186
Optimising processing conditions	188
Example of assessment of maize processing method	189
The problem	189
The evaluation	189
The result	189
The solution	189
Conclusions	189
Acknowledgements	189
References	189
Protein hydrolysates and tissue repair	
<i>R. L. Thomson & J. D. Buckley</i>	
Introduction	191
Protein hydrolysates	191
Potential effects on tissue repair	192
Effect on post-surgical recovery	192
Effect on severe burn recovery	192
Effect on gastric repair	192
Effect on pressure ulcer recovery	193
Effect on preventing the development of atopic dermatitis-like skin lesions	193
Effect on recovery from muscle damage	193
Proposed mechanisms of action	194
Enhanced availability	194
Increase in levels of insulin	195
Bioactive properties	195
Conclusion	195
Acknowledgements	195
References	196
Epigenetic mechanisms elicited by nutrition in early life	
<i>R. Berni Canani, M. Di Costanzo, L. Leone, G. Bedogni, P. Brambilla, S. Cianfarani, V. Nobili, A. Pietrobelli & C. Agostoni</i>	
Introduction	198
Epigenetic mechanisms elicited by nutritional factors	199
Effects of nutritional factors on DNA methylation	199
Effects of nutritional factors on histone modifications	200
Effects of nutritional factors on microRNAs	200
Epigenetic mechanisms elicited by maternal diet during pregnancy	201
Microbiota, epigenetics and early postnatal nutrition	202
Conclusions	203
Acknowledgements	204
References	204
Human health effects of conjugated linoleic acid from milk and supplements	
<i>T. A. McCrorie, E. M. Keaveney, J. M. W. Wallace, N. Binns & M. B. E. Livingstone</i>	
Introduction	206
Methods	207
Conjugated linoleic acid and cancer	207
Conjugated linoleic acid and body composition	209
Conjugated linoleic acid, lipid metabolism and atherosclerosis	213
Conjugated linoleic acid, inflammation and immune effects	216
Conjugated linoleic acid, insulin resistance and diabetes	218
Conjugated linoleic acid and bone health	221
Overall conclusions	222
Acknowledgements	222
References	222

Contents

A novel model to explain dietary factors affecting hypocalcaemia in dairy cattle	
<i>J. Martín-Tereso & M. W. A. Verstegen</i>	
Introduction	228
Teleological background of milk fever	228
Definition of milk fever	229
Calcium homeostasis	229
General definition	229
Adaptive mechanisms of calcium homeostasis	230
Transepithelial transport processes	230
Tissue remodelling	232
Conclusion on adaptive mechanisms	233
Dietary-induced modulation of calcium metabolism	233
Non-nutritional supply of vitamin D metabolites	233
Low-calcium diets	234
Reduction of the dietary cation–anion difference	234
Dietary inclusion of calcium antagonists	235
Mechanistic analysis of the adaptation of calcium homeostasis at calving	235
Estimation of blood calcium clearance	236
Gastrointestinally available pool	237
Prediction of metabolic adaptation from the ratio between calcium clearance and gastrointestinally available calcium	238
Conclusions	239
