Nietzsche and Modern Times

A Study of Bacon, Descartes, and Nietzsche
Laurence Lampert

This book explores the character of modernity through a consideration of Bacon, Descartes, and Nietzsche. It argues that Bacon and Descartes, in their positive claims for science, played the fundamental role in the development of the modern world view; that they used the Platonic art of dissimulative writing as the means to achieve their ends by making their revolutionary aims appear compatible with Christianity; and that Nietzsche understood both their ends and their means and set out to ground an antimodern world view. 480pp. £22.50

Intuition and Construction

The Foundation of Normative Theory
T. K. Seung

Many normative theorists have advocated constructivism as a way of overcoming scepticism and nihilism. T.K. Seung here examines three types of constructivism and shows that the only viable type is ideal rationality, which accepts Kantian ideals as its basis. Unlike Rawls, however, Seung traces Kantian ideals to Platonic Forms and argues that these objects of normative intuition must be articulated into a system of concrete normative standards in order to provide a secure foundation for normative theories. 240pp. Illus. £22.50

Stanley Rosen
