

# QUATERNARY RESEARCH

*Quaternary Research* is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its nearly 50-year history in advancing the understanding of earth and human history through interdisciplinary study of the last 2.7 million years. Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

**Submit manuscripts** online at <http://editorialmanager.com/qr>. See instructions for submitting your manuscripts at <https://www.cambridge.org/core/journals/quaternary-research/information/guide-for-authors>.

**Subscription Information:** *Quaternary Research* published two volumes per year with three issues each. The journal is published on behalf of Quaternary Research Center by Cambridge University Press, One Liberty Plaza, 20<sup>th</sup> Floor, New York, NY 10006, USA. Annual subscription rates for Volumes 91 and 92 (2019): Institutional rate, print only: \$1,447.00 (£1026.00 + VAT). Institutional rate, online only: \$1,420.00 (£1008.00 + VAT). Institutional rate, print and online: \$1,506.00 (£1070.00 + VAT). For subscriptions, renewals, and address changes, please visit <https://www.cambridge.org/core/journals/quaternary-research/subscribe>. Email [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) if you are in the Americas or [journals@cambridge.org](mailto:journals@cambridge.org) for the rest of the world.

**ISSN:** 0033-5894

## RESEARCH ARTICLES

- 273–287 **Response of Chironomidae to environmental disturbances in a high mountain lake in Patagonia during the last millennium**  
*Natalia Williams, Diego Añón Suárez, María Rieradevall, Andrea Rizzo, Romina Daga, María A. Arribère and Sergio Ribeiro Guevara*
- 288–303 **Two twentieth-century  $M_{LH} = 7.5$  earthquakes recorded in annually laminated lake sediments from Sary Chelek, western Tian Shan, Kyrgyzstan**  
*Stefan Lauterbach, Jens Müngam, Georg Schettler and Sagynbek Orunbaev*
- 304–322 **Past human populations and landscapes in the Fuegian Archipelago, southernmost South America**  
*Ivana Laura Ozán and María Cecilia Pallo*
- 323–339 **Iron Age landscape changes in the Benoué River Valley, Cameroon**  
*David K. Wright, Scott MacEachern, Stanley H. Ambrose, Jungyu Choi, Jeong-Heon Choi, Carol Lang and Hong Wang*
- 340–351 **Decadal- to centennial-scale climate changes over the last 2000 yr recorded from varved sediments of Lake Kusai, northern Qinghai-Tibetan Plateau**  
*Weihan Jia and Xingqi Liu*
- 352–364 **A record of mid- and late Holocene paleohydroclimate from Lower Pahrnagat Lake, southern Great Basin**  
*Kevin M. Theissen, Thomas A. Hickson, Ashley L. Brundrett, Sarah E. Horns and Matthew S. Lachniet*
- 365–380 **Postglacial vegetation dynamics at high elevation from Fairy Lake in the northern Greater Yellowstone Ecosystem, Montana, USA**  
*James V. Benes, Virginia Iglesias and Cathy Whitlock*
- 381–387 **Paleoecological implications of the first prehistoric record of water vole (*Microtus richardsoni*) from Washington state, USA**  
*R. Lee Lyman*
- 388–407 **Late Quaternary vertebrates from the Upper Gunnison Basin, Colorado, and small-mammal community resilience to climate change since the last glacial maximum**  
*Steven D. Emslie and David J. Meltzer*
- 408–415 **Investigating (a)symmetry in a small mammal's response to warming and cooling events across western North America over the late Quaternary**  
*Meghan A. Balk, Julio L. Betancourt and Felisa A. Smith*
- 416–429 **Late Quaternary lake-level and climate changes in arid central Asia inferred from sediments of Ebinur Lake, Xinjiang, northwestern China**  
*Jianchao Zhou, Jinglu Wu, Long Ma and Mingrui Qiang*
- 430–449 **Postglacial paleoceanography and paleoenvironments in the northwestern Barents Sea**  
*Elena Ivanova, Ivar Muddmaa, Anne de Vernal, Björg Risebrobakken, Alexander Peyve, Camille Brice, Elvira Seitkalieva and Sergey Pisarev*
- 450–468 **Strata sequence and paleochannel response to tectonic, sea-level, and Asian monsoon variability since the late Pleistocene in the South Yellow Sea**  
*Liyan Wang, Guangxue Li, Jishang Xu, Yong Liu, Lulu Qiao, Dong Ding, Fichao Yang, Olusegun A. Dada and Qian Li*
- 469–482 **Beryllium-10 dating of the Foothills Erratics Train in Alberta, Canada, indicates detachment of the Laurentide Ice Sheet from the Rocky Mountains at ~15 ka**  
*Martin Margold, John C. Gosse, Alan J. Hidy, Robin J. Woywitka, Joseph M. Young and Duane Froese*
- 483–496 **Aminochemistry and time averaging of Quaternary land snail assemblages from colluvial deposits in the Madeira Archipelago, Portugal**  
*Evan Neus, Yirena Yanes, Robert A.D. Cameron, Joshua H. Miller, Dinarte Teixeira and Darrell S. Kaufman*
- 497–518 **An 18 ka to present pollen- and phytolith-based vegetation reconstruction from Hall's Cave, south-central Texas, USA**  
*Carlos E. Cordova and William C. Johnson*
- 519–529 **Grass habitat analysis and phytolith-based quantitative reconstruction of Asian monsoon climate change in the sand-loess transitional zone, northern China**  
*Hanlin Wang, Huayu Lu, Hongyan Zhang, Shuangwen Yi, Yao Gu and Chenghong Liang*
- 530–548 **Ice Complex formation on Bol'shoi Lyakhovskiy Island (New Siberian Archipelago, East Siberian Arctic) since about 200 ka**  
*Sebastian Wetterich, Natalia Rudaya, Vladislav Kuznetsov, Fedor Maksimov, Thomas Opel, Hanno Meyer, Frank Günther, Anatoly Bobrov, Elena Raschke, Heike H. Zimmermann, Jens Strauss, Anna Starikova, Margret Fuchs and Lutz Schirrmeister*
- 549–569 **Bio- and lithostratigraphy of lower Pleistocene marine successions in western Emilia (Italy) and their implications for the first occurrence of *Arctica islandica* in the Mediterranean Sea**  
*Gaia Crippa, Michele Azzarone, Cinzia Bottini, Stefania Crespi, Fabrizio Felletti, Mattia Marini, Maria Rose Petrizzo, Daniele Scarponi, Sergio Raffi and Gianluca Raineri*
- 570–582 **Age determination of glacially-transported boulders in Ireland and Scotland using Schmidt-hammer exposure-age dating (SHD) and terrestrial cosmogenic nuclide (TCN) exposure-age dating**  
*Peter Wilson, Paul Dunlop, Chris Millar and Frances A. Wilson*
- 583–597 **The potential to strengthen temperature reconstructions in ecoregions with limited tree line using a multispecies approach**  
*M. Ross Alexander, Jessie K. Pearl, Daniel A. Bishop, Edward R. Cook, Kevin J. Anchukaitis and Neil Pederson*

## LETTER TO THE EDITOR

- 598–600 **Lake-level changes and hominin occupations in the arid Turkana basin during volcanic closure of the Omo River outflows to the Indian Ocean – comment on the published paper by Boës et al. Quaternary Research (2018), Vol. 91.2, 892–909**  
*Mathieu Schuster and Alexis Nutz*
- 601–604 **Lake-level changes and hominin occupations in the arid Turkana Basin during volcanic closure of the Omo River outflows to the Indian Ocean – Response to comments by Schuster and Nutz, Quaternary Research 92(2), pp. 598–600**  
*Xavier Boës, Sandrine Prat, Vincent Arrighi, Craig Feibel, Bereket Haileab, Jason Lewis and Sonia Harmand*

## CORRIGENDUM

- 605 **Response of Chironomidae to environmental disturbances in a high mountain lake in Patagonia during the last millennium – Corrigendum**  
*Natalia Williams, Diego Añón Suárez, María Rieradevall, Andrea Rizzo, Romina Daga, María A. Arribère and Sergio Ribeiro Guevara*
- 606–607 **Postglacial vegetation dynamics at high elevation from Fairy Lake in the northern Greater Yellowstone Ecosystem, Montana, USA – Corrigendum**  
*James V. Benes, Virginia Iglesias and Cathy Whitlock*
