

JOURNAL OF PLASMA PHYSICS

To accommodate the increasing number of papers of high standard received by the editor, the number of pages in each issue of the journal will be considerably increased in 1969. The editor and publishers regret that there will be a corresponding increase in the price of the journal. The subscription to Volume 3 will be £10 net (\$32.50) and single parts will cost 60s. net (\$9.00).

**JOURNAL OF
PLASMA PHYSICS**

The JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications. The JOURNAL is issued in quarterly parts forming one volume.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy
University of Manchester, Manchester 13, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92038, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The subscription price for a volume of four parts is £7 net, post free, payable in advance; separate parts £2 10s. net, plus postage. Subscriptions may be sent to any bookseller, or to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

Subscribers in the United States and Canada should send their orders to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022. The subscription price per volume is \$24.50, post free, payable in advance; separate parts \$8.50, plus postage (U.S. dollars).

CONTENTS TO VOLUME 2

PART 1 FEBRUARY 1968

On the A.C. electrical conductivity of a Lorentz gas. J. H. M. FU and R. S. B. ONG	page 1
On the propagation of cylindrical waves in a magnetized self-gravitating collisionless plasma. G. MATTEI	9
Transport coefficients of partially ionized helium. R. S. DEVOTO and C. P. LI	17
On the kinetic theory of stable and weakly unstable plasma. Part 1. A. ROGISTER and C. OBERMAN	33
Time-dependent motions of the capacity formed when a uniform corpuscular flux is incident on the magnetic field of a line current. R. C. HEWSON-BROWNE and D. N. BURGHEES	51
On gyroresonance. M. J. LAIRD	59
Skin-depth effect of a cylindrical shock-produced plasma. T. O. ARO and D. WALSH	65
Surface waves of a magnetoactive plasma. K. JUNGWIRTH and V. A. PETRŽÍLKA	73
A note on the two-stream instability. P. C. CLEMMOW	85
The origin of the plasma in an electromagnetic shock-tube. D. G. FEARN	93
REVIEWS	102
<i>Interferometry, by W. H. Steel</i>	102
<i>Electrons, Ions and Waves, by W. P. Allis</i>	102

PART 2 JUNE 1968

Propagation of nonlinear waves in a plasma in a magnetic field. JEFFREY P. FREIDBERG	105
Collision and ionization effects in a plasma sheath. PUNG NIEN HU and SIGI ZIERING	119
Nyquist diagrams for low-frequency oscillations in a non-uniform magnetoplasma. BRUNO BERTOTTI and ALDO NOCENTINI	135
The structure and propagation of ionizing wave fronts. D. L. TURCOTTE and R. S. B. ONG	145
Stability of an anisotropic relativistic plasma in a magnetic field. J. SKILLING	157
Transition from ambipolar to free diffusion in a decaying plasma. C. D. MALDONADO	167

Slipping stream instability in anisotropic plasma with magnetic shear. S. S. RAO, G. L. KALRA and S. P. TALWAR	page 181
Time-dependent motions of the cavity formed when a uniform corpuscular flux is incident on the magnetic field of n line currents. D. N. BURGHEES and R. C. HEWSON-BROWNE	189
Structure of the Bernstein modes for large values of the plasma parameter. R. W. FREDRICKS	197
Boundary-layer structure in a shock-generated plasma flow. Part 1. Analysis for equilibrium ionization. STELLAN KNÖÖS	207
Boundary-layer structure in a shock-generated plasma flow. Part 2. Experiments using a new quantitative schlieren technique. STELLAN KNÖÖS	243
Relativistic formulation for non-linear waves in a non-uniform plasma. D. S. BUTLER and R. J. GRIBBEN	257
The dispersion and attenuation of helicon waves in a cylindrical plasma-filled wave-guide. R. L. FERRARI and J. P. KLOZENBERG	283
CORRIGENDA	290
PART 3 AUGUST 1968	
New boundary conditions in the transition régime. C. CERCIGNANI and G. TIRONI	293
Kinetic theory of the diocotron instability. A. NOCENTINI, H. L. BERK and R. N. SUDAN	311
Measurement of the radio frequency admittance of a plane grid capacitor in a plasma. I. L. FREESTON	329
Radio frequency properties of a plane grid capacitor immersed in a hot collision-free plasma. R. BUCKLEY	339
Non-linear scattering of electromagnetic waves near the ion cyclotron frequency in an inhomogeneous plasma. J. TEICHMANN	353
Structure of generalized ion Bernstein modes from the full electromagnetic dispersion relation. R. W. FREDRICKS	365
Reflection of waves at an interface in a streaming plasma. P. C. CLEMMOW and E. OTT	381
A computer simulation of the plasma resonance probe. M. A. HELLBERG	395
On oscillating electric dipoles immersed in a hot plasma. S. R. WATSON	437
Evolutionary conditions for shock waves in a collisionless plasma and stability of the associated flow. S. MORIOKA and J. R. SPREITER	449
Anomalous high-frequency conductivity of a turbulent plasma. B. BERTOTTI and O. DE BARBIERI	465

REVIEW

- Theoretical Methods in Plasma Physics*, by N. G. van Kampen and B. U. Felderhof 483

CORRIGENDUM

484

PART 4 DECEMBER 1968

- A model kinetic equation for an electron plasma. HOWARD R. BAUM *page* 485
- Alfvén waves in relativistic plasmas. F. C. HOH 509
- Electron interactions and quantum plasma physics. ELIZABETH A. RAUSCHER 517
- Stability of laminar magnetofluid flow along a parallel magnetic field. A. KENT. 543
- Interaction of a relativistic electron beam with an inhomogeneous plasma. G. DORMAN 557
- Effects of inelastic collisions in low-temperature, diffusion-dominated discharges. A. A. CRESCENTINI and C. MAROLI 581
- Propagation of electromagnetic waves normal to a magnetic field in a uniform anisotropic Maxwellian plasma. P. STEWART 591
- A converging, cylindrical, ionizing shock. D. M. SLOAN 597
- Rayleigh–Taylor problem for a Hall plasma. R. J. HOSKING 613
- Transport coefficients of partially ionized hydrogen. R. S. DEVOTO 617
- An experimental study of transverse ionizing MHD shock waves. CHARLES F. STEBBINS and GEORGE C. VLASES 633

REVIEW

- The Application of Plasmas to Chemical Processing*, edited by Raymond F. Baddour and Robert S. Timmins 653
