

- 438 Optimal Scheduling for Exposed Datapath Architectures with Buffered Processing Units by ASP
MARC DAHLEM, ANOOP BHAGYANATH AND KLAUS SCHNEIDER
- 452 Solving Horn Clauses on Inductive Data Types Without Induction
EMANUELE DE ANGELIS, FABIO FIORAVANTI, ALBERTO PETTOROSSO AND MAURIZIO PROIETTI
- 470 Shape Neutral Analysis of Graph-based Data-structures
GREGORY J. DUCK, JOXAN JAFFAR AND ROLAND H. C. YAP
- 484 Proof-relevant Horn Clauses for Dependent Type Inference and Term Synthesis
FRANTIŠEK FARKA, EKATERINA KOMENDANTSKYA AND KEVIN HAMMOND
- 502 Experimenting with robotic intra-logistics domains
MARTIN GEBSER, PHILIPP OBERMEIER, THOMAS OTTO, TORSTEN SCHAUB, ORKUNT SABUNCU,
VAN NGUYEN AND TRAN CAO SON
- 520 Routing Driverless Transport Vehicles in Car Assembly with Answer Set Programming
MARTIN GEBSER, PHILIPP OBERMEIER, TORSTEN SCHAUB, MICHEL RATSCH-HEITMANN AND
MARIO RUNGE
- 535 An ASP Methodology for Understanding Narratives about Stereotypical Activities
DANIELA INCLEZAN, QINGLIN ZHANG, MARCELLO BALDUCCINI AND ANKUSH ISRANEY
- 553 An iterative approach to precondition inference using constrained Horn clauses
BISHOKSAN KAFLE, JOHN P. GALLAGHER, GRAEME GANGE, PETER SCHACHTE, HARALD
SØNDERGAARD AND PETER J. STUCKEY
- 571 Exploiting Answer Set Programming with External Sources for Meta-Interpretive Learning
TOBIAS KAMINSKI, THOMAS EITER AND KATSUMI INOUE
- 589 Translating LPOD and CR-Prolog₂ into standard answer set programs
JOOHYUNG LEE AND ZHUN YANG
- 607 A Probabilistic Extension of Action Language *BC*+
JOOHYUNG LEE AND YI WANG
- 623 Incremental and Iterative Learning of Answer Set Programs from Mutually Distinct Examples
ARINDAM MITRA AND CHITTA BARAL
- 638 Constraint-Based Inference in Probabilistic Logic Programs
ARUN NAMPALLY, TIMOTHY ZHANG AND C. R. RAMAKRISHNAN
- 656 Phylotastic: An Experiment in Creating, Manipulating, and Evolving Phylogenetic Biology Workflows
Using Logic Programming
THANH HAI NGUYEN, ENRICO PONTELLI AND TRAN CAO SON
- 673 First-order Answer Set Programming as Constructive Proof Search
ALEKSY SCHUBERT AND PAWEŁ URZYCZYN
- 691 Specifying and Verbalising Answer Set Programs in Controlled Natural Language
ROLF SCHWITTER
- 706 Top-down and Bottom-up Evaluation Procedurally Integrated
DAVID S. WARREN

INSTRUCTIONS TO AUTHORS

Aims and scope

Theory and Practice of Logic Programming is an international journal that publishes refereed papers covering both the theory and the practice of logic programming. Among the topics covered are AI applications that use logic programming, logic programming methodologies, specification, analysis and verification of systems, inductive logic programming, multi-relational data mining, natural language processing, knowledge representation, nonmonotonic reasoning, semantic web reasoning, databases, implementations and architectures and constraint logic programming.

TPLP is the sole official journal of the Association for Logic Programming (<http://logicprogramming.org/>) and is offered to its members at a preferential rate. It is also endorsed by SPARC, the Scholarly Publishing & Academic Resources Coalition (URL: www.arl.org/sparc).

Submission of manuscripts

Electronic submissions: The preferred form of submission is to send two email messages, the first one with the information containing the title, the author(s), and the abstract of the submission, and the second one with a PDF or a Postscript file. Both emails should be sent to the appropriate Area Editor with a copy to the Editor-in-Chief. If in doubt about the most appropriate area, contact the Editor-in-Chief.

Paper submissions: These are also acceptable, but their handling may be delayed (four copies to the appropriate Area Editor and one copy to the Editor-in-Chief).

The submitted manuscripts should not be published or simultaneously submitted to another journal or to a conference. Full versions of important conference papers are welcome. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to Cambridge University Press.

Book Reviews

Books for review, or suggestions for reviews, should be sent to the book reviews editor.

Technical notes

Technical notes should not exceed 5000 words in length, excluding tables, figures, and the bibliography. They are given quick turnaround and should be submitted, preferably electronically, to the Technical Notes editor. Submissions should include an abstract and a reasonable accurate word count for the paper (excluding tables and figures, and the bibliography).

Electronic manuscripts

The publisher encourages the submission of final manuscripts written in LaTeX which can be used for direct typesetting. Authors can download style files from the CUP anonymous ftp site in a packed or unpacked form. The packed form is available from: <ftp://ftp.cambridge.org/pub/texarchive/journals/latex/tp-cls> and the unpacked files are in a directory /unpacked.

Layout

Manuscripts should begin with an abstract of not more than 300 words at the end of which are 4 or 5 keywords. Avoid footnotes whenever possible. Papers should conform to a good standard of English prose; please consult a style guide such as 'The Elements of Style' by Strunk and White, Macmillan, New York. Presenting Programs in one of the following two styles is encouraged: either with identifiers in italic and keywords in bold or entirely in a fixed-width teletype font. Do not begin a sentence with a symbol or identifier name.

Illustrations

Supply these as eps files as the publisher cannot use original TeX files of illustrations. A hardcopy printout needs to be supplied of each illustration.

References

The Harvard system of references should be used. See style files.

Proofreading

Be sure to submit papers in their final form. Typographical and factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for extensive changes to their paper. No page charge is made. The spelling policy of the journal is to follow author's American or British spelling as long as it is consistent within the paper.

Offprints

A free pdf of the published article will be supplied to each first named author.

Please contact the editors for additional information or clarification of anything above.

COPYING

The journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA, 01923, USA. Organisations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 1471-0684/17 \$16.00. Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorised to supply single copies of separate articles for private use only. For all other use, permission should be sought from Cambridge UK or the American Branch of Cambridge University Press.

Theory and Practice of Logic Programming

VOLUME 18 PART 3-4 MAY-JULY 2018

Contents

Regular papers

- 296 Introduction to the 34-th international conference on logic programming special issue
ALESSANDRO DAL PALÙ AND PAUL TARAU
- 301 Shared aggregate sets in answer set programming
MARIO ALVIANO, CARMINE DODARO AND MARCO MARATEA
- 319 Cautious reasoning in ASP via minimal models and unsatisfiable cores
MARIO ALVIANO, CARMINE DODARO, MATTI JÄRVISALO, MARCO MARATEA AND
ALESSANDRO PREVITI
- 337 Constraint Answer Set Programming without Grounding
JOAQUIN ARIAS, MANUEL CARRO, ELMER SALAZAR, KYLE MARPLE,
AND GOPAL GUPTA
- 355 A Trajectory Calculus for Qualitative Spatial Reasoning Using Answer Set Programming
GEORGE BARYANNIS, ILIAS TACHMAZIDIS, SOTIRIS BATSAKIS, GRIGORIS ANTONIOU,
MARIO ALVIANO, TIMOS SELLIS AND PEI-WEI TSAI
- 372 Certified Graph View Maintenance with Regular Datalog
ANGELA BONIFATI, STEFANIA DUMBRAVA AND EMILIO JESÚS GALLEGO ARIAS
- 390 Functional ASP with Intensional Sets: Application to Gelfond-Zhang Aggregates
PEDRO CABALAR, JORGE FANDINNO, LUIS FARIÑAS DEL CERRO AND DAVID PEARCE
- 406 Temporal Answer Set Programming on Finite Traces
PEDRO CABALAR, ROLAND KAMINSKI, TORSTEN SCHAUB AND ANNA SCHUHMANN
- 421 Approximation Fixpoint Theory and the Well-Founded Semantics of Higher-Order
Logic Programs
ANGELOS CHARALAMBIDIS, PANOS RONDOGIANNIS AND IOANNA SYMEONIDOU

(Contents continued facing inside back cover)
