Published in 4 parts per year

Subscription £11.00 per annum

PROTOZOOLOGY III

FESTSCHRIFT IN HONOUR OF C.A. HOARE ON THE OCCASION OF HIS 85TH BIRTHDAY

Twenty-five contributions are included, with a world-wide representation of Dr. Hoare's colleagues and friends. Original accounts of work on trypanosomatids include: the cell surface of trypanosomes; a new trypanosome of the cayman in Brazil; routes of infection in Chagas' disease; trypanosomes of a monkey; and interactions between trypanosomes and piroplasms. Reviews are included of the species problem in trypanosomes; terminology of trypanosomatids; intraspecific populations; dyskinetoplasty, nagana in Nigeria; and epizootiology of American surra; amongst others.

Delayed patency and relapses in vivax malaria; a new malaria parasite of a monkey; ecology of toxoplasms; an annotated catalogue of the adeleid coccidia; a new genus and species of amoebo-flagellates; amoebic dysentery with special reference to the genesis of the disease; and an account of Dr. Hoare's contribution to parasitic protozoology, with complete bibliography, are amongst other contributions.

PROTOZOOLOGY, Volume III, 1977 is published by the London School of Hygiene and Tropical Medicine, with the generous assistance of the Wellcome Foundation.

ISSN 0309 - 2607

Volume I in four parts, 1925-1928, and volume II, 1967, were published by the School as supplements to the Journal of Helminthology.

All volumes are distributed for the School by:
William Dawson & Sons Ltd., Cannon House, Folkestone,
Kent, England.

Price £5.00 for each volume, postal charges extra.
