

THE IDEOLOGY OF THE ATHENIAN METIC

by DAVID WHITEHEAD

An essential feature of the classical Greek city-state was the presence of a large body of 'metics', more or less permanent immigrants, who played a large part in the economic, social and political life of the community but were excluded from citizenship. Dr. Whitehead discusses the ambiguity of their position, their rights and disabilities, and examines the history of the institution over two centuries.

TOWARDS A TEXT OF 'ANTHOLOGIA LATINA'

by D. R. SHACKLETON BAILEY

Alexander Riese's 'Anthologia Latina' (Teubner, 1894) is still the standard text for most of the poems it contains. But it is full of false readings due partly to corruption in the manuscripts and partly to injudicious conjectures by Riese and his predecessors. Professor Shackleton Bailey's notes are both emendatory and explanatory. They concern over 160 poems, many of which become intelligible for the first time. They make a considerable advance towards the new edition which is long overdue.

*NON-SLAVE LABOUR IN THE
GRECO-ROMAN WORLD*

ed. PETER GARNSEY

In Greco-Roman society the typical labourer was a peasant, not a slave. Yet, while specialized studies of ancient slavery abound, the subject of free labour, its incidence, status and economic significance, has received little attention. This volume of essays, originating in papers written for the Seventh International Economic History Congress (Edinburgh, 13-19 August 1978), provides a summary of the available evidence for non-slave labour in antiquity and a bibliographical guide, but in addition advances novel interpretations concerning, for example, the composition of the 'labouring class', the relation between slave and peasant systems of production, and the importance of free dependent labour in the Western Roman provinces.

*THE EUDEMIAN AND
NICOMACHEAN ETHICS*

*A STUDY IN THE DEVELOPMENT OF
ARISTOTLE'S THOUGHT*

by C. J. ROWE

In this study Dr. Rowe re-examines the authenticity of the *Eudemian Ethics* and its relation to the *Nicomachean*. His arguments are based on a detailed comparison of the structures of the two works, which shows that the *Nicomachean Ethics* presupposes the *Eudemian* and is essentially a re-working of it. He uses a similar method to throw light on the notorious problem of the 'common' books.
