"Deserves the greatest respect and admiration." MD (NEW YORK)

"Excellent volume." JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION

The authors trace the development of medicine from primitive times to the present day, with biographical notes on outstanding medical figures and a consideration of the properties and uses of some of the better known drugs.

The first part of the book, "Medicine and the Individual", deals with the doctor's relation to his patient and the development of knowledge and understanding of the structure and function of the body; the second part, "Medicine and the Community", discusses the growth of preventive and social medicine as agents in the promotion of a healthy society.

ARIEL

ESSAYS ON THE ARTS AND THE HISTORY AND PHILOSOPHY OF MEDICINE

by *FELIX MARTI-IBAÑEZ, M. D.*

*Editor-in-Chief of the Medical Newsmagazine, MD;
Former Professor and Chairman, Department of the
History of Medicine, New York Medical College*

This new collection of articles and essays traverses the vast expanse of human experience to present a fresh and exciting view of the world of medicine and the arts. **ARIEL: ESSAYS ON THE ARTS AND THE HISTORY AND PHILOSOPHY OF MEDICINE** combines new concepts, original observations, and imaginative thinking in a book that will give many hours of reading pleasure. One of the outstanding features of this collection of 42 essays and articles is the inclusion of the author's 13 original expanded versions of his introductions to the installments of **THE EPIC OF MEDICINE**, which originally appeared in the medical newsmagazine, *MD*. As a unit they provide a dramatic and cogent preface to the history of medicine. The other essays and articles in this volume cover a wide range of both historical and contemporary subjects.

ARIEL is a book for those who choose to explore the wondrous paths of the human mind. It is a book for physicians, philosophers, sociologists, educators, students—all who know the excitement of discovery and seek new ideas. 292 PAGES/CLOTH BOUND/\$6.50

CHEMISTRY IN THE SERVICE OF MEDICINE

Edited by

F. N. L. POYNTER

The twelve papers that appear in this book were first heard at the Second British Congress on the History of Medicine and Pharmacy, organised by the Faculty of the History of Medicine and Pharmacy of the Worshipful Society of Apothecaries, held in London in September 1961.

Certainly medicine has come a long way from the potions of the Renaissance "chymists" to the "wonder" drugs of the present day, but considering the limitations imposed by primitive facilities for research, the degree of both practical and theoretical progress in chemistry was astonishing. The papers give an absorbing account of the bitter rivalries and wrangling between the various schools of thought—particularly between the Aristotelian-Galenic and the Neoplatonic-Paracelsian partisans, from which the latter emerged triumphant; they tell of the great philosophers, religious antagonism with which early scientists had to contend, the emergence of analytical methods and experimental investigation, the remarkable discoveries of Lavoisier, van Helmont, Wöhler, Fludd, Boerhaave and others, and the spectacular advances in chemistry and medicine since the nineteenth century.
