

STEREOLOGY AND IMAGE ANALYSIS

In honour of Professor L. A. Santaló

Since 1981 the International Workshop on Stochastic Geometry, Stereology and Image Analysis has been held every other year. On previous occasions it has been held at Århus, Berne, Amsterdam and Oberwolfach; the sixth meeting took place in Valencia, Spain, on 21–24 September 1993 at the Universidad Internacional Menéndez Pelayo, and issues of SGSA in 1995 will contain papers which were presented there.

Professor L. A. Santaló

These meetings have increased in scale and impact with each consecutive edition, and the strength of the Workshop held in Valencia can be judged by the quality of the papers to be published in *Advances*. This quality was increased by the contributors' desire to pay homage to Professor Santaló, in whose honour this sixth edition of the IWSGSIA was celebrated.

I would like to add my best remembrances of Wim Vervaat, who participated with enthusiasm in what was probably his last meeting. This publication must also be our memorial to him.
