

Pesticide Drift and the Pursuit of Environmental Justice

Jill Lindsey Harrison

"Jill Harrison explores extensive pesticide health hazards and flawed regulation in one of the nation's biggest industries, where hard-working farm laborers suffer on a daily basis. This is a great contribution to scholarship on environmental justice, environmental health,

and social movements. Harrison brilliantly handles the complexity of the many involved players and the underlying social currents."

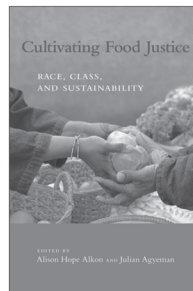

— Phil Brown, Brown University

Food, Health, and the Environment series • 296 pp., 12 illus., \$23 paper

Cultivating Food Justice

Race, Class, and Sustainability

edited by Alison Hope Alkon and Julian Agyeman

"Race, class, and history aren't foodie strong-points. Yet to turn the food movement into one that fully embraces justice, some difficult discussions lie ahead. The chapters in this splendid and rigorously researched book will help those conversations be better

informed, and their outcomes wiser."

— Raj Patel, author of *Stuffed and Starved* and *The Value of Nothing*

Food, Health, and the Environment series • 376 pp., 16 illus., \$27 paper

JOURNALS

Journal of Dairy Research

Published for the Institute of Food Research and the Hannah Research Institute

Executive Editors

D. G. Chamberlain, *Hannah Research Institute, UK*

E. C. Needs, *Hannah Research Institute, UK*

Journal of Dairy Research publishes original scientific research on all aspects of mammary biology and dairy science including: the physiology, biochemistry, cell biology and endocrinology of lactation; animal husbandry, milk production, composition, preservation, processing and separation; biotechnology and food science; properties of milk proteins and other components; dairy products such as cheese, fermented milks and spreads; relevant studies in bacteriology, enzymology and immunology, the use of milk products in other foods; and the development of methods relevant to these subjects.

Experimental Agriculture

Editor

Dave Harris, *ICRISAT, Kenya*

Experimental Agriculture publishes the results of original research from any source on the agronomy of field, plantation and herbage crops grown for human or animal food; for industrial purposes; and on systems of agricultural production, particularly in the warmer regions of the world. It is especially concerned with experimental work designed to explain agronomic results in biological and environmental terms. The journal publishes accounts of new experimental techniques, new methods of crop production and discusses problems in countries where production is developing rapidly. There are regular book reviews and occasional, often invited, reviews of research.

Nutrition Research Reviews

Published on behalf of The Nutrition Society

Editor-in-Chief

Graham C. Burdige, University of Southampton, UK

Nutrition Research Reviews offers a comprehensive overview of nutritional science today. By distilling the latest research and linking it to established practice, the journal consistently delivers the widest range of in-depth articles in the field of nutritional science and has done so for the past twenty-one years. It presents up-to-date, concise and critical reviews of key topics in nutrition science, advancing new concepts and hypotheses that encourage the exchange of fundamental ideas on nutritional well-being in both humans and animals.

Plant Genetic Resources

Published on behalf of the
National Institute of Agricultural Botany (NIAB)

Editor-in-Chief

Robert Koebner, *CropGen International, UK*

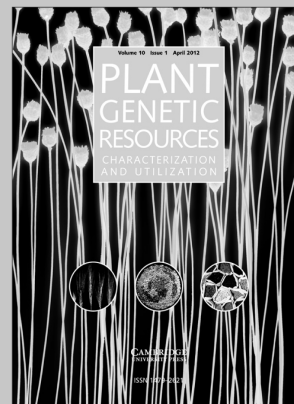

Plant Genetic Resources is an international journal that brings together the many diverse topics concerned with plant genetic resources. Each issue provides access to peer-reviewed research papers on genetic variation in plants, both crop and non-crop, as well as on the technical, socio-economic, legal and geo-political aspects of PGR. Many papers feature research directed to endangered non-crop and medicinal plants. The journal is of interest to researchers and scientists involved in the plant genetic resources community, including: breeders, all those with an interest in germplasm, policy makers, consultants and research students.

Environmental Conservation

International Journal of Interdisciplinary Environmental Science

Published for the Foundation for Environmental Conservation

Editor

Nicholas V. C. Polunin, University of Newcastle, UK

Environmental Conservation is one of the longest-standing, most highly-cited of the interdisciplinary environmental science journals. It includes research papers, reports, comments, subject reviews, and book reviews addressing environmental policy, practice, and natural and social science of environmental concern at the global level, informed by rigorous local level case studies. The journal's scope is very broad, including issues in human institutions, ecosystem change, resource utilisation, terrestrial biomes, aquatic systems, and coastal and land use management. *Environmental Conservation* is essential reading for all environmentalists, managers, consultants, agency workers and scientists wishing to keep abreast of current developments in environmental science. Selected papers are made freely available online as part of **EC Perspectives**.

CAMBRIDGE
UNIVERSITY PRESS

Renewable Agriculture and Food Systems

Volume 27 Number 4 December 2012

Preliminary Report

- Frequent cultivation prior to planting to prevent weed competition results in an opportunity for the use of arbuscular mycorrhizal fungus inoculum
David D. Douds, Gerald Nagahashi, and John E. Shenk 251

Research Papers

- Water infiltration and surface-soil structural properties as influenced by animal traffic in the Southern Piedmont USA
Alan J. Franzluebbers, John A. Stuedemann, and Dorcas H. Franklin 256
- Profitability of organic and conventional soybean production under 'green payments' in carbon offset programs
Ariel Singerman, Kathleen Delate, Craig Chase, Catherine Greene, Michael Livingston, Sergio Lence, and Chad Hart 266
- Effects of harvest period, nitrogen fertilization and mycorrhizal fungus inoculation on triticale (*x Triticosecale Wittmack*) forage yield and quality
E. Cazzato, V. Laudadio, and V. Tufarelli 278
- Urine as an alternative fertilizer in agriculture: Effects in amaranths (*Amaranthus caudatus*) production
O.O. AdeOluwa and O. Cofie 287
- Insecticide use and crop selection in regions with high GM adoption rates
Scott W. Fausti, Tia Michelle McDonald, Jonathan G. Lundgren, Jing Li, Ariel Ruth Keating, and Mike Catangui 295
- Introduction of domestic buffalo (*Bubalus bubalis*) into Ethiopia would be feasible
Takele Taye Desta 305
- ## Review Articles
- The role of green roof technology in urban agriculture
Leigh J. Whittinghill and D. Bradley Rowe 314
- A European perspective for developing modern multifunctional agroforestry systems for sustainable intensification
Jo Smith, Bruce D. Pearce, and Martin S. Wolfe 323
