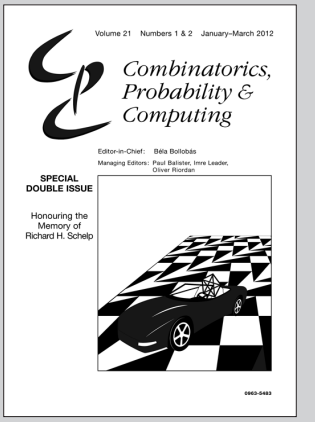
CAMBRIDGE JOURNALS

Combinatorics, Probability & Computing

Editor-in-Chief
Béla Bollobás, *DPMMS, Cambridge, UK; University of Memphis, USA*



Published bimonthly, *Combinatorics, Probability & Computing* is devoted to the three areas of combinatorics, probability theory and theoretical computer science. Topics covered include classical and algebraic graph theory, extremal set theory, matroid theory, probabilistic methods and random combinatorial structures; combinatorial probability and limit theorems for random combinatorial structures; the theory of algorithms (including complexity theory), randomised algorithms, probabilistic analysis of algorithms, computational learning theory and optimisation.

CAMBRIDGE JOURNALS

JFM ARCHIVE

Journal of Fluid Mechanics
Digital Archive
1956–1996

Vital research from the definitive source

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

CAMBRIDGE JOURNALS

JFM FAST TRACK HAS EVOLVED

JFM RAPIDS

- Faster publication
- Greater visibility for papers
- Freely available to all for the first year

For more information visit

CAMBRIDGE UNIVERSITY PRESS

https://doi.org/10.1017/jfm.2013.396 Published online by Cambridge University Press

584 Numerical calculations of two-dimensional large Prandtl number convection in a box
J. A. Whitehead, A. Cotel, S. Hart, C. Lithgow-Bertelloni & W. Newsome

603 DNS of a turbulent boundary layer with surface roughness
J. Cardillo, Y. Chen, G. Araya, J. Newman, K. Jansen & L. Castillo

638 Stability of film flow over inclined topography based on a long-wave nonlinear model
D. Tseluiko, M. G. Blyth & D. T. Papageorgiou

672 Localization of flow structures using ∞-norm optimization
D. P. G. Foures, C. P. Caulfield & P. J. Schmid

702 Generation of steady longitudinal vortices in hypersonic boundary layer
A. I. Ruban & M. A. Kravtsova

JFM Rapids (online only)

R1 Energy cascade and scaling in supersonic isothermal turbulence
A. G. Kritsuk, R. Wagner & M. L. Norman

R2 Bounds for Euler from vorticity moments and line divergence
R. M. Kerr

R3 Available potential energy in Rayleigh–Bénard convection
G. O. Hughes, B. Gayen & R. W. Griffiths

S indicates supplementary data or movies available online.

729 ISSN 0022-1120
Journal of Fluid Mechanics 25 August 2013

S 1 High frequency oscillatory flows in a slightly rarefied gas according to the Boltzmann–BGK equation
J. Nassios & J. E. Sader

47 Turbulence during the reflection of internal gravity waves at critical and near-critical slopes
V. K. Chalamalla, B. Gayen, A. Scotti & S. Sarkar

69 The Eliassen–Palm flux tensor
J. R. Maddison & D. P. Marshall

103 A bound on the vertical transport of heat in the 'ultimate' state of slippery convection at large Prandtl numbers
X. Wang & J. P. Whitehead

123 The primary instability of falling films in the presence of soluble surfactants
G. Karapetsas & V. Bontozoglou

151 Large eddy simulation of flow around a reverse rotating propeller
H. Jang & K. Mahesh

180 Spin-up of a two-component superfluid: analytic theory in arbitrary geometry
C. A. van Eysden & A. Melatos

214 Modelling spreading dynamics of nematic liquid crystals in three spatial dimensions
T.-S. Lin, L. Kondic, U. Thiele & L. J. Cummings

231 Flow physics and RANS modelling of oblique shock/turbulent boundary layer interaction
B. Morgan, K. Duraisamy, N. Nguyen, S. Kawai & S. K. Lele

285 Low-dimensional modelling of high-Reynolds-number shear flows incorporating constraints from the Navier–Stokes equation
M. J. Balajewicz, E. H. Dowell & B. R. Noack

309 Coherent structures and the saturation of a nonlinear dynamo
E. L. Rempel, A. C.-L. Chian, A. Brandenburg, P. R. Muñoz & S. C. Shadden

330 Range of validity of an extended WKB theory for atmospheric gravity waves: one-dimensional and two-dimensional case
F. Rieper, U. Achatz & R. Klein

364 Casimir cascades in two-dimensional turbulence
J. C. Bowman

S 377 Topology-induced effect in biomimetic propulsive wakes
V. Raspa, R. Godoy-Diana & B. Thiria

S 388 Measurements of the budgets of the subgrid-scale stress and temperature flux in a convective atmospheric surface layer
K. X. Nguyen, T. W. Horst, S. P. Oncley & C. Tong

423 Induced diffusion of tracers in a bacterial suspension: theory and experiments
G. L. Miño, J. Dunstan, A. Rousselet, E. Clément & R. Soto

445 Meridional trapping and zonal propagation of inertial waves in a rotating fluid shell
A. Rabitti & L. R. M. Maas

S 471 On the thinnest steady threads obtained by gravitational stretching of capillary jets
M. Rubio-Rubio, A. Sevilla & J. M. Gordillo

484 Dual role of friction in granular flows: attenuation versus enhancement of instabilities
P. P. Mitrano, S. R. Dahl, A. M. Hilger, C. J. Ewasko & C. M. Hrenya

S 496 The Faraday threshold in small cylinders and the sidewall non-ideality
W. Batson, F. Zoueshtiagh & R. Narayanan

524 High-speed boundary-layer transition induced by a discrete roughness element
P. S. Iyer & K. Mahesh

563 Interaction modes of multiple flexible flags in a uniform flow
E. Uddin, W.-X. Huang & H. J. Sung
