

# International Journal of Technology Assessment in Health Care

Official journal of Health Technology Assessment  
International (HTAi)

## Editor-in-Chief

Marjukka Mäkelä, *Finnish Office for Health Technology Assessment, Finland*

*International Journal of Technology Assessment in Health Care* serves as a forum for researchers, health policy makers, professionals and industry representatives interested in the medical, social, ethical and economic implications of the diffusion and use of both established and new health practices and technology. Health technology assessment covers essentially all issues of relevance to health policy and practice including systematic reviews; economic, social, ethical and legal analysis; methodological developments in evaluative research; and the impact of health technology on organisation and management of health care systems, as well as issues in public health. In addition to general essays and research reports, thematic sections are published.
