

# NOTES FOR AUTHORS

## Submitting a paper

Full details on submitting a paper, including the style guide and L<sup>A</sup>T<sub>E</sub>X class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

*Proceedings of the Royal Society of Edinburgh: Section A* considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- *Proceedings A* has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit [https://rse.msp.org/submit\\_new.php?jpath=rse\\_proc\\_a\\_math](https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math) and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

## Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here: <https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

## Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

## Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£1780/US\$2835 (in 2017), the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

CONTENTS

EZEQUIEL BARBOSA AND FRANCIELE CONRADO	
Discs area-minimizing in mean convex Riemannian $n$ -manifolds	1361–1382
B. B. V. MAIA AND O. H. MIYAGAKI	
Existence and nonexistence results for a class of Hamiltonian Choquard-type elliptic systems with lower critical growth on $\mathbb{R}^2$	1383–1410
YI HE AND XIAO LUO	
Concentrating standing waves for Davey–Stewartson systems	1411–1450
MATTEO DALLA RIVA, RICCARDO MOLINAROLO AND PAOLO MUSOLINO	
Existence results for a nonlinear nonautonomous transmission problem via domain perturbation	1451–1476
PETER LEWINTAN AND PATRIZIO NEFF	
$L^p$ -trace-free generalized Korn inequalities for incompatible tensor fields in three space dimensions	1477–1508
PIGONG HAN	
Decay properties for the incompressible Navier–Stokes flows in a half space	1509–1532
YUMING QIN AND BIN YANG	
Existence and regularity of time-dependent pullback attractors for the non-autonomous nonclassical diffusion equations	1533–1550
ELOISA DETOMI AND PAVEL SHUMYATSKY	
On the commuting probability for subgroups of a finite group	1551–1564
BAISHUN LAI AND YIFAN YANG	
On the energy equality for very weak solutions to 3D MHD equations	1565–1588
JIA WEI HE AND YONG ZHOU	
On a backward problem for nonlinear time fractional wave equations	1589–1612
WEICHAO GUO, YONGMING WEN, HUOXIONG WU AND DONGYONG YANG	
Variational characterizations of weighted Hardy spaces and weighted $BMO$ spaces	1613–1632
