

## Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Executive Editor on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at <https://mc.manuscriptcentral.com/apjournals>. All submissions will be acknowledged on receipt.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/19

## Volume 57 Number 4

### *Research Papers*

- 1029 SVANTE JANSON. Rate of convergence for traditional Pólya urns
- 1045 MATIJA VIDMAR. A temporal factorization at the maximum for certain positive self-similar markov processes
- 1070 DOHYUN AHN, KYOUNG-KUK KIM AND YOUNGHOON KIM. Small-time smile for the multifactor volatility heston model
- 1088 EDWARD HOYLE AND LEVENT ALI MENGUTURK. Generalised Liouville processes and their properties
- 1111 DOROTTYA FEKETE, JOAQUIN FONTBONA AND ANDREAS E. KYPRIANOU. Skeletal stochastic differential equations for superprocesses
- 1135 MAHER BOUDABRA AND GREG MARKOWSKY. Maximizing the  $p$ th moment of the exit time of planar Brownian motion from a given domain
- 1150 HYUNJU LEE. On a New Stochastic Model for Cascading Failures
- 1162 ADRIAN GONZALEZ CASANOVA AND CHARLINE SMADI. On  $\Lambda$ -Fleming–Viot processes with general frequency-dependent selection
- 1198 CLAIRE LAUNAY, BRUNO GALERNE AND AGNÈS DESOLNEUX. Exact sampling of Determinantal Point Processes without Eigendecomposition
- 1222 OFFER KELLA AND ONNO BOXMA. Synchronized Lévy queues
- 1234 SHUYANG BAI. Representations of Hermite processes using local time of intersecting stationary stable regenerative sets
- 1252 DAVID CHEEK AND SEVA SHNEER. The empirical mean position of a branching lévy process
- 1260 CELESTE R. PAVITHRA AND T. G. DEEPAK. Multivariate finite-support phase-type distributions
- 1276 RICARDO T. FERNHOLZ AND ROBERT FERNHOLZ. Zipf’s law for Atlas Models
- 1298 MARTINDIRRLER, CHRISTOPHER DÖRR AND MARTIN SCHLATHER. A generalization of matérn hard-core processes with applications to max-stable processes
- 1313 YUANYUAN LIU, WENDI LI AND XIUQIN LI. On geometric and algebraic transience for block-structured Markov chains
- 1339 IDIR ARAB, MILTO HADJIKYRIAKOU AND PAULO EDUARDO OLIVEIRA. Non-comparability with respect to the convex transform order with applications
