

DESIGN/STRESS ENGINEERING

An expanding international corporation, making provision for present and future succession in the managerial/technical spheres, requires:

DEPUTY CHIEF DESIGNER: probably aged 40-50, C.Eng, ideally with wide range of aeronautical or associated design experience, but above all a manager who can accept full delegation for the development to autonomy of an expanding self-contained Design unit covering major variations; to set-up systems, develop and organise resources, and co-ordinate design, customer and manufacture liaison.

Salary—around £4500. Ref. No. *AJ/470/1

CHIEF STRESSMAN: probably aged 35-45, C.Eng, ideally with 10 years experience in aircraft structures and familiar with computer usage; to provide effective services to Design by use of competent managerial and technical skills in organising and motivating his department and developing subordinates to accept responsibility and authority.

Salary—£4000-£4500. Ref. No. *AJ/470/2

DEPUTY CHIEF STRESSMAN: to take responsibility for overall programme and performance, forward loading, work-flow, and sub-contracting for Structures section, covering total load and detailed stress analysis.

Salary—£3500-£4000. Ref. No. *AJ/470/3

The department is involved in initial design and all modifications; a knowledge of fatigue aspects would be advantageous, and a keen awareness of commercial and production viability is expected.

STRESS ENGINEERS—the long term expansion provides openings for men with some relevant experience.

Ref. No. *AJ/470/4

Superior conditions include attractive pension scheme, re-location expenses, etc.

Applications—quoting ref. no: AJ/470/—initially by requesting Personal History Form from J. Dagnall, in writing or by telephoning Bristol 30255 (24-hour answering service outside of business hours).

* Insert reference numbers as appropriate.

Lasting beauty

Classical good looks means design in aluminium and its alloys...
shaping up to things to come. The lightweight that outclasses
trad heavyweights... the great conductor of heat and electricity...
the malleable metal that resists corrosion. Economical, too.
Name your need: light alloy forgings, die castings and extrusions.
Get HDA technology and experience behind your product.
