

**Journal of Developmental Origins of Health and Disease**  
**Volume 4, Supplement 1, March 2013**  
**Proceedings of the founding meeting of SF-DOHaD**  
**8-9 November 2012**  
**Paris, France**

**Guest Editors:** Marie-Aline Charles, Isabelle Le Huerou-Luron and Claudine Junien

Publication of this supplement was supported by the Société Francophone pour la recherche et l'éducation sur les Origines Développementales, Environnementales et Epigénétiques de la Santé et des Maladies.

Abstracts of oral and poster presentations from the founding meeting of SF-DOHaD included in this supplement have been assessed by the Scientific Committee. They were reviewed by Editor-in-Chief of the Journal prior to publication, and may be cited.

# Table of Contents

<b>EDITORIAL</b>	S1
<b>STATE OF THE ART</b>	S3
<b>1 - Developmental origins of health and disease: moving from biological concepts to interventions and policy</b> Mark Hanson	S3
<b>2 - Environmental Stressors in the Developmental Origins of Disease: Evidence and Mechanisms</b> Moshe Szyf	S3
<b>3 - Developmental Origins of Non-Communicable Diseases and Dysfunctions: Implications for Animal production</b> Pascale Chavatte Palmer	S3
<b>KEYNOTE SPEAKER</b>	S4
<b>Neuroendocrine Origins of Obesity and Diabetes</b> Sébastien.G. Bouret	S4
<b>GROWTH PATTERNS AND LONG TERM CONSEQUENCES</b>	S5
ORAL N°9 Growth trajectories and body composition. influence of nutrition	S5
ORAL N°53 The association between body silhouettes before 20 years old and type 2 diabetes in adulthood	S5
POSTER N°17 The “CECA” retrospective study: childhood growth and adult nutritional status	S6
POSTER N°55 Weight and height growth modeling to study the determinants of growth and later health outcomes and to assess BMI trajectories	S6
POSTER N°8 Weight and height growth velocity during the first years of life and infant bone status at 3 years	S7
POSTER N°50 Elfe: The French longitudinal study of children	S7
<b>METABOLIC, VASCULAR AND CANCER PROGRAMMING</b>	S7
ORAL N°65 Childhood adversity as a risk for cancer: findings from the 1958 British Birth Cohort Study	S8
ORAL N°46 Perinatal programming of the endocrine pancreas by maternal diabetes: impact on the development of the $\beta$ -cell mass and glucose homeostasis in the offspring	S8
ORAL N°34 Maternal prenatal undernutrition programs adipose tissue gene expression in adult male rat offspring	S9
ORAL N°4 Short- and long-term influences of intrauterine growth restriction on muscle and adipose tissue properties and metabolic flexibility	S9
POSTER N°13 Angiogenesis and the programming of hypertension: developmental changes in the methylation profile of the <i>AMOT</i> gene in cord blood endothelial progenitor cells	S10
POSTER N°49 Vascular endothelium and early markers of adult cardiovascular disease	S10
POSTER N°75 Abnormal vascular programming of acid arachidonic metabolism could explain hypertension in rats exposed <i>in utero</i> to maternal diabetes	S11
POSTER N°21 Does high protein neonatal feeding program metabolic syndrome in adulthood? A study in a rodent model of intrauterine growth restriction	S11
POSTER N°48 Early exposure to a high-fat diet has more drastic consequences on metabolism compared with exposure during adulthood in rats	S12
POSTER N°51 Effect of perinatal undernutrition in Merinos D’Arles ewes on physiology and reproductive function	S12
POSTER N°66 Sleep longitudinal study among French children and the impact on adiposity and overweight risks in the EDEN cohort	S13

<b>PLACENTA: A PROGRAMMING TISSUE</b>		S13
ORAL N°31	Evaluation of diabetes' effects on placental fetal macrophages	S14
ORAL N°36	Maternal lipid and cholesterol-enriched diet disrupts fetal development and placental function in a rabbit model	S14
ORAL N°54	Hyperlipidic hypercholesterolemic maternal diet affects early embryonic gene expression and trophoblast function	S14
POSTER N°30	Transcriptomic analysis demonstrated a placental dysfunction during maternal diabetes	S15
POSTER N°32	Mild gestational hyperglycemia in rat induces fetal overgrowth and modulates placental growth factors and nutrient transporters expression	S15
POSTER N°37	Characterization of the placental development in the intrauterine growth-retarded piglet	S16
POSTER N°45	Maternal food-restriction leads to a drastic downregulation of H4K16 acetylation in IUGR rat placentas	S16
<b>FOOD PREFERENCES, EATING BEHAVIOUR AND COGNITIVE DEVELOPMENT</b>		S17
ORAL N°24	Early nutrition: impact on the development of food preferences and eating behavior	S17
POSTER N°3	Rho-kinase inhibition during late-gestation programs hyperphagia and overweight in adult male rats	S18
POSTER N°20	Impact of nutritional programming on first meal pattern and gastro-intestinal peptides following energy restriction in adult rat	S18
POSTER N°73	Nutritional regulation of ghrelin signaling during neonatal life	S19
ORAL N°1	Polyunsaturated fatty acids intake during pregnancy and child psychomotor development: results from the EDEN mother-child cohort study	S19
ORAL N°33	Perinatal high-fat diet attenuates anxiety-like behaviour in adult offspring exposed to maternal separation	S20
POSTER N°80	Grandmother' transgenerational transmission of the prenatal stress phenotype in rats	S20
ORAL N°43	Effects of early proteinrestriction on the plastic epigenetic responses associated with learning and memory	S21
ORAL N°47	Early postnatal leptin blockade predisposes rats to overweight and modifies hypothalamic microRNA expression pattern	S21
<b>ENDOCRINE DISRUPTORS AND OTHER TOXIC SUBSTANCES</b>		S22
ORAL N°57	Effects of pregnancy exposure to non-persistent endocrine disruptors on foetal development and post-natal growth: overview of recent results from mother-child cohorts and perspectives	S22
ORAL N°69	Low-dose effects of Endocrine disruptors: towards metabolomics-based phenotypic biomarkers?	S22
POSTER N°18	Behavioural modifications in rat pups following early exposure to organophosphorus chlorpyrifos	S23
POSTER N°56	Pregnancy urinary phenol concentrations in relation to postnatal growth of male offspring	S23
<b>MECHANISMS OF PROGRAMMING</b>		S24
ORAL N°19	Folate deficiency impairs hippocampal progenitor differentiation and synaptic plasticity	S24
ORAL N°42	Evidence for the involvement of the nutrient sensors mTOR and AMPK as a common tissue system underlying the nutritional programming of metabolic disorders	S25
ORAL N°29	Endothelial progenitor cells dysfunction in low birth weight infants: involvement of circulating inhibitors	S25
ORAL N°6	Genome-wide analysis of epigenetic signatures induced by exposure to high glucose concentrations in endothelial cells supports the implication of epigenetic phenomena in diabetic endothelial dysfunction	S26
POSTER N°16	Effect of citrulline supplementation on fetal growth, and protein synthesis in a rodent model of intrauterine growth restriction (IUGR)	S26

POSTER N°35	The apelinergic system is implicated in fetoplacental development and is a target in developmental nutritional programming	S27
POSTER N°39	Nutritional epigenetics: considering maternal dietary and fetal programming	S27
POSTER N°44	MicroRNA expression profiling of hypothalamic arcuate and paraventricular nuclei from single rats using Illumina sequencing technology	S28
POSTER N°77	RNA-mediated inheritance of acquired metabolic disorders	S28
POSTER N°79	Consequences of protein malnutrition during prenatal and early postnatal stages	S29
POSTER N°78	Transposable element regulation under stress condition	S29
POSTER N°60	Searching for prediabetes markers: comparison of muscle methylome of lean and obese women with or without type 2 diabetes	S30
POSTER N°76	Fetal programming of $\beta$ -cell dysfunction in type 2 diabetes: implication of the glucocorticoids and their signalling pathway	S30
POSTER N°70	Alterations of postnatal nutrition permanently disrupt the neural pathways controlling reproductive function in female mice.	S31
POSTER N°71	Epigenetic regulation by DNA methylation in fetal membranes: the actors of the phenomenon and the consequences of its deregulation	S31
POSTER N°74	Epigenetics and bacterial infectious diseases	S32
<b>GUT AND MICROBIOTA</b>		S32
ORAL N°22	Can intestinal microbiota be involved in nutritional programming?	S33
ORAL N°38	Early antibiotic-induced alteration of gut microbiota colonization affects gut adaptation in adult offspring	S33
ORAL N°7	Effects of early postnatal undernutrition on intestinal maturation in mouse	S34
POSTER N°12	Short- and long-term alterations in colonic permeability, absorptive-secretory physiology and heat shock proteins in pigs born to antibiotic-treated mothers	S34
POSTER N°15	Intrauterine growth retardation induces alterations of colonic epithelial barrier and increases the risk of colonic diseases in adult rats	S35
POSTER N°26	Short-time maternal separation in early neonate rats markedly increases intestinal permeability, induces bacterial translocation and impacts gene expression in the liver	S35
<b>CHRONOBIOLOGY</b>		S36
ORAL N°14	Long-lasting effect of perinatal exposure to L-tryptophan on circadian clock of primary cell lines established from male offspring born from mothers fed on dietary protein restriction	S36
ORAL N°23	Environmental influence on biliary atresia assessed by a 30-year whole-population-based study	S36
<b>SEXUAL DIMORPHISM</b>		S37
ORAL N°62	Maternal diets trigger sex-specific divergent trajectories of gene expression and epigenetic systems in mouse placenta	S37
ORAL N°5	Gender differences in the aggravation of metabolic disorders induced by food contaminants in offspring of obese mice	S38
ORAL N°25	Maternal methionine-restricted diet, epigenetics and offspring development: the case of force-fed ducks for 'foie gras' production	S38
ORAL N°10	Lessons in epigenetics from the human parasite <i>Schistosoma mansoni</i> : sexual differentiation under environmental stress	S39
POSTER N°58	Sexual dimorphism of hepatic epigenetic marks and machinery in offspring of obese and diabetic mothers fed a control diet during periconceptional/gestation/lactation period	S39
POSTER N°68	Exposure to the diabetic intrauterine environment, growth in infancy and childhood and development of adiposity at 7 years	S40
<b>ALLEVIATION OF PROGRAMMING DYSFUNCTIONS</b>		S40
ORAL N°40	Role of postnatal leptin on organ maturation and development	S40

ORAL N°64	Feeding patterns over the 1st year of life: relations with child growth and late fruit and vegetables intake	S41
ORAL N°41	Adoption prevents metabolic alterations in male rats with intrauterine growth restriction resulting from maternal undernutrition	S42
ORAL N°59	Locus-specific epigenetic changes associated with peripheral leptinresistance in increased resistance to a high-fat diet in mice born to obese mothers fed a control diet during gestation	S42
POSTER N°61	Transcriptional and epigenetic signatures of adaptive increased resistance to diet-induced obesity by dietary alleviation of malprogramming by maternal obesity during gestation	S43
<b>TOWARD DIETARY AND THERAPEUTIC RECOMMENDATIONS?</b>		S43
ORAL N°52	Long-term consequences of neonatal pain and analgesia on growth, behavior and corticotroph axis in rat	S43
ORAL N°11	Long-term alterations of intestinal key enzymes – alkaline phosphatase and peptidases – after perinatal disturbances in two animal models	S44
ORAL N°27	Consequences of a diet-induced obesity during infancy on the peripheral intrinsic nervous systems control of gut and pancreatic functions	S44
ORAL N°67	Are the first days of life a critical window for programming? A study of neonatal weight loss	S45
ORAL N°63	Increased blood pressure and susceptibility to type 2 diabetes in adulthood can be linked during postnatal life: an implication of oxidative stress	S45
ORAL N°28	Intake of bioactive molecules from milk during an early post-natal critical window and development of premature newborn	S46
ORAL N°2	Impact of curent prenatal Vitamin D-recommended supplementation on cord blood level: a French cohort	S46
