The geometric figure on the cover, a four-dimensional polytope, was redrawn from the inside cover page of the celebrated book 'Regular Polytopes' by Harold Scott MacDonald Coxeter (1907–2003), one of the greatest geometers of the 20th century. Coxeter, a Fellow of the Royal Society of Canada and a Fellow of the Royal Society (London), joined the University of Toronto in 1936 and worked there enthusiastically for 60 years. Since 1978, the Canadian Mathematical Society has awarded the Coxeter-James Prize in his honor.

La figure géométrique sur la couverture, un polytope en dimension quatre, a été reprise du plat intérieur du célèbre ouvrage Regular Polytopes de Harold Scott MacDonald Coxeter (1907–2003), l'un des plus grands géomètres du XXe siècle. Membre de la Société royale du Canada et de la Royal Society (Londres), H.M.S. Coxeter s'est joint au corps professoral de l'Université de Toronto en 1936, où il a travaillé avec enthousiasme pendant 60 ans. Depuis 1978, la Société mathématique du Canada décerne le prix Coxeter-James en son honneur.

2023, 66/1

1	Special curves in modular surfaces	*Matteo Tamiozzo*
19	On the homotopy and strong homotopy type of complexes of discrete Morse functions	*Connor Donovan, Maxwell Lin, and Nicholas A. Scoville*
38	Revisiting G-Dedekind domains	*M. Zafrullah*
53	Quantum projective planes finite over their centers	*Ayako Itaba and Izuru Mori*
68	Torsion properties of modified diagonal classes on triple products of modular curves	*David T.-B. G. Lilienfeldt*
87	A characterization of the product of the rational numbers and complete Erdős space	*Rodrigo Hernández-Gutiérrez and Alfredo Zaragoza*
103	Packable hyperbolic surfaces with symmetries	*Maria Dostert and Alexander Kolpakov*
114	On unavoidable families of meromorphic functions	*Thierry Meyrath*
124	Generalization of Klain's theorem to Minkowski symmetrization of compact sets and related topics	*Jacopo Ulivelli*
142	On smooth perturbations of Chebyshëv polynomials and $\bar{\partial}$-Riemann–Hilbert method	*Maxim L. Yattselev*
156	On a topological Ramsey theorem	*Wiesław Kubiś and Paul Szeptycki*
166	Integers that are sums of two rational sixth powers	*Alexis Newton and Jeremy Rouse*
178	Sur la lissité du schéma Quot ponctuel emboîté	*Sergej Monavari and Andrea T. Ricolfi*
185	On the average value of $\pi(t) - \mathrm{li}(t)$	*Daniel R. Johnston*
196	Hilbert rings with maximal ideals of different heights and unruly Hilbert rings	*Y. Azimi*
204	Model spaces invariant under composition operators	*P. Muthukumar and Jaydeb Sarkar*
218	A refined nc Oka–Weil theorem	*Kenta Kojin*
225	Terms of Lucas sequences having a large smooth divisor	*Nikhil Balaji and Florian Luca*
232	Hyperbolic Coxeter groups of minimal growth rates in higher dimensions	*Naomi Bredon*
243	Limiting Betti distributions of Hilbert schemes on n points	*Michael Griffin, Ken Ono, Larry Rolen, and Wei-Lun Tsai*
