LOGITECH LTD

Geological Magazine

is one of 49 learned journals published by Cambridge University Press.

A descriptive catalogue of Cambridge journals with details of back volumes is available from the London and New York Offices of the Press.

Cambridge journals may be ordered from a bookseller or direct from the publishers.

Cambridge University Press

Bentley House, 200 Euston Road
London, NW1 2DB

American Branch: 32 East 57th Street
New York, N.Y. 10022

NOTES FOR CONTRIBUTORS

Articles submitted for publication in the *Geological Magazine* should be addressed to the editors at the Sedgwick Museum, Downing Street, Cambridge CB2 3EQ, England, and sent in duplicate. Publications for notice and review should be marked for the review editor at the same address.

Contributions, including reference lists, should be typewritten, double-spaced, and should be carefully revised. Where typing errors are corrected or minor alterations made, they should be done neatly in the typescript, leaving the margins clear. Marginal marks should be used only when correcting proofs. Illustrations should be drawn to allow reduction to a maximum size of 165mm × 110mm; originals must not exceed 495mm × 330mm and must be sent in a flat package. Lettering must allow for legibility after reduction (i.e. equivalent to 1mm as a minimum on reduction). Duplicates of illustrations may be prints or, preferably, reductions. Metric units of the SI system are preferred. Illustrations in the text will be referred to as figures (Fig. 2, 2a, etc.), and halftone plates will be referred to (also in arabic) as Plates 2, 2a, etc. Folding plates will not be accepted. Captions must be typed on separate sheets.

The typescript must be accompanied by a short summary. Contributors should follow the rules in the Geological Society of London's *Notes to Authors* (*Proc. geol. Soc. Lond.*, No. 1627, Oct. 1965), with the following exceptions. The total length of a paper should not in general exceed 20 pages of the *Geological Magazine*; preference and priority are given to short papers. Primary headings should be in lower case, at margin, with arabic numeral. Secondary headings should be in *lower case italics (underlined)*, at margin, with Section number followed by lower case letter (1.a, 1.b, etc.). Tertiary headings should be in *lower case italics (underlined)*, at margin, with Section number, lower case letter, and number of sub-section (1.a.1, 1.a.2, etc.).

No cross-references by page should be given to other parts of the text, but 'above' and 'below' used (with the section specified, e.g. 'Section 2 a 1.'). References should be abbreviated in the form of the *World List of Scientific Periodicals* (4th edit., 1963-65) as far as possible. e.g. Lapworth, C. 1878. The Moffat Series. *Q. Jl geol. Soc., Lond.*, **34**, 240-343. Books should be cited briefly as: Burns, R. G. 1970. *Mineralogical applications of crystal field theory*. 224 p., C.U.P., London. Unpublished work, e.g. from theses, should normally be referred to in the text in parentheses and not included in the reference list unless already in the press. 'In the interests of authors, copyright is assigned to Cambridge University Press.'

Twenty-five offprints of each article will be provided free of charge. Additional offprints may be purchased according to an agreed scale of charges.

Geological Magazine

Volume 109, Number 1, January 1972

	<i>pages</i>
LAFFITTE, R. <i>et al.</i>	
Some international agreement on essentials of stratigraphy.	1-15
MÖRNER, N.-A.	
Time scale and ice accumulation during the last 125,000 years as indicated by the Greenland δ^{18} curve.	17-24
JEANS, P.J.F.	
The junction between the Skiddaw Slates and Borrowdale Volcanics in Newlands Beck, Cumberland.	25-28
HORSFIELD, W.T.	
Glaucofane schists of Caledonian age from Spitsbergen.	29-36
COORAY, P.G.	
Hornblende-garnet granulites from Hatton, Ceylon.	37-44
ASHWORTH, J.R.	
Myrmekites of exsolution and replacement origins.	45-62
CORRESPONDENCE	
Phases of deformation in North Wales: B.D.T. Lynas.	63-64
An alternative to the 'Clastic Trap' interpretation of oolitic ironstone facies: M. Brookfield.	65-66
Stages of the Llandovery Series: T.N. George and L.R.M. Cocks & P. Toghill.	67-68
REVIEWS	69-77
PUBLICATIONS RECEIVED	78-80
NOTICE	80
