

INDEX OF PAPERS PUBLISHED IN THIS VOLUME ARRANGED ACCORDING TO NAMES OF AUTHORS

[*The numbers refer to pages.*]

- Buchdahl, H. A. On Eddington's higher order equations of the gravitational field, 89.
- Cherry, T. M. Expansions in terms of parabolic cylinder functions, 50.
- Copson, E. T. On the problem of the electrified disc, 14.
On the Riesz-Riemann-Liouville integral, 25.
- Edge, W. L. A plane quartic with eight undulations, 147.
- Erdélyi, A. Asymptotic representation of Laplace transforms with an application to inverse factorial series, 20.
On certain discontinuous wave functions, 39.
- Freeman, J. G. A generalization of minimal varieties, 66.
- Garding, L. Extension of a formula by Cayley to symmetric determinants, 73.
- Grace, J. H. A question concerning Aronhold's theorems on bitangents, 37.
- Makar, Ragy H. On the analysis of the Kronecker product of irreducible representations of the symmetric group, 133.
- Mohanty, R. The absolute Cesàro summability of the successively derived allied series of a Fourier series, 163.
- Quenouille, M. H. The evaluation of probabilities in a normal multivariate distribution, with special reference to the correlation ratio, 95.
- Rajagopal, C. T. On a Tauberian theorem of G. Ricci, 143.
- Rão, C. R. On a class of arrangements, 119.
- Robinson, A. On non-associative systems, 111.
- Schwerdtfeger, H. On the Pfaffian invariant of a skew-symmetric matrix, 106.
- Scott, T. A geometrical note on the binary cubic form, 87.
- Sircar H. On a system of equations, 101.
- Turnbull, H. W. Symmetric determinants and the Cayley and Capelli operators, 76.
- Varma, R. S. An inversion formula for the generalised Laplace transform, 126.
- Vermes, P. On γ -matrices and their application to the binomial series, 1.
The application of γ -matrices to Taylor series, 43.
- Wilson, R. Functions with dominant polar singularities on the circle of convergence, 177.
- Wintner, A. On absolute Lambert sums, 128.
- Wright, E. M. Equal sums of like powers, 138.
