

## New from Hart Publishing

### The Hart-Fuller Debate in the Twenty-First Century

*Edited by Peter Cane*

This book presents the papers and comments on those papers delivered at a colloquium held at the Australian National University in December 2008 to celebrate 50 years since the publication in the *Harvard Law Review* of the famous and wide-ranging debate between HLA Hart and Lon L. Fuller. These essays pick up on strands in the debate and re-think them in the light of social, political and intellectual developments in the past 50 years and changed ways of understanding law and other normative systems.

### Reappraising the Resort to Force

International Law, Jus ad Bellum and the War on Terror

*Lindsay Moir*

This book seeks to place the 'war on terror' within the context of international law, assessing how, or whether, it can be accommodated within the existing legal framework limiting the use of force. Through an examination of the lawfulness (or otherwise) of both Operation Enduring Freedom and Operation Iraqi Freedom, including the legal justifications advanced by those states involved and the reaction of the international community, and involving a detailed discussion of the most important developments (ie, the permissibility of self-defence against non-state, terrorist, actors and the 'Bush doctrine' of pre-emptive self-defence against terrorists as proclaimed in the 2002 US National Security Strategy) the book determines whether, and to what extent, the right to use force - or the acceptability of such military action - is currently undergoing a radical transformation.

### Repairing British Politics

A Blueprint for Constitutional Change

*Richard Gordon QC*

The constitutional crisis of 2009, sparked by the 'expenses scandal', led rapidly to the questioning of our entire political order, and to some fast responsive action. This book presents a bold new appeal for constitutional reform focused around a draft written Constitution underpinned by a new principle of constitutional supremacy in place of the traditional principle of Parliamentary sovereignty.

*Repairing British Politics* recognises that we are currently facing a constitutional moment and that these moments are extremely rare. Whichever party takes office in 2010, the questions raised in this book will remain for urgent debate.

### An Introduction to the Law of the United Nations

*Robert Kolb*

This work aims to fill a gap in the existing legal literature by presenting a compact, concise but nevertheless panoramic view of the law of the United Nations. Today the organisation is at the centre of all multilateral international relations and impossible to avoid. And of course the UN Charter is a foundational document without which modern international law cannot be properly understood. This book presents an overarching view of the significance of the UN organisation in general, the history of its origins in the League of Nations, the aims and principles of the Charter, governmental agencies, members of the Organisation, the non-use of violence and collective security, the peaceful settlement of disputes, and the question of amendments to the Charter.
