

Journal of
MATERIALS RESEARCH

VOLUME 31 • NO 16
AUGUST 29, 2016

A publication of the

MRS MATERIALS RESEARCH SOCIETY®
Advancing materials. Improving the quality of life.

CAMBRIDGE
UNIVERSITY PRESS

Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of *JMR* and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the *Journal of Materials Research* electronically via ScholarOne manuscripts, at the following website address: <http://mc.manuscriptcentral.com/jmr>. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ x 11 in. paper, and saved as .doc, .pdf, .rtf, or .ps files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the *JMR* keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in *Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006*. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to *JMR* who have related material under consideration or in press elsewhere should send a copy of the related material to *JMR* at the time of submission. While their manuscripts are under consideration at *JMR*, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: *Journal of Materials Research* occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. *JMR* will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will

be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Journal of Materials Research (ISSN: 0884-2914) is published twenty-four times a year by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006 for the Materials Research Society. Periodical Postage Paid in New York, NY and additional mailing offices. **POSTMASTER:** Send address changes to *Journal of Materials Research*, c/o Journals Dept., Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, *Journal of Materials Research*, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in *Journal of Materials Research* may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via the Cambridge Journals Online website. To determine availability, visit the appropriate page for the *JMR* back issue desired (www.journals.cambridge.org/jmr).

Individual member subscriptions are for personal use only.

Cover: SEM image of duplex brass. [S. Marichamy, M. Saravanan, M. Ravichandran, G. Veerappan: Parametric optimization of EDM process on α - β Brass using Grey relational analysis. p. 2531].

INVITED FEATURE PAPER

2363–2375 **Influence of chemical disorder on energy dissipation and defect evolution in advanced alloys**

Yanwen Zhang, Ke Jin, Haizhou Xue, Chenyang Lu, Raina J. Olsen, Laurent K. Beland, Mohammad W. Ullah, Shijun Zhao, Hongbin Bei, Dilpuneet S. Aidhy, German D. Samolyuk, Lumin Wang, Magdalena Caro, Alfredo Caro, G. Malcolm Stocks, Ben C. Larson, Ian M. Robertson, Alfredo A. Correa, William J. Weber

ARTICLES

2376–2383 **Formation mechanism and stability of the phase in the interface of tungsten carbide particles reinforced iron matrix composites: First principles calculations and experiments**

Zulai Li, He Wei, Quan Shan, Yehua Jiang, Rong Zhou, Jing Feng

2384–2391 **Residual stress analysis with stress-dependent growth rate and creep deformation during oxidation**

Yaohong Suo, Zhonghua Zhang, Xiaoxiang Yang

2392–2397 **Prediction of residual stress components and their directions from pile-up morphology: An experimental study**

Lei Shen, Yuming He, Dabiao Liu, Meng Wang, Jian Lei

2398–2406 **Electromagnetic wave absorption properties of FeCoNiCrAl_{0.8} high entropy alloy powders and its amorphous structure prepared by high-energy ball milling**

Peipei Yang, Ying Liu, Xiuchen Zhao, Jingwei Cheng, Hong Li

2407–2414 **Experimental investigation of phase equilibria in the Ni–Fe–Zr ternary system**

S.Y. Yang, J.B. Zhang, C.P. Wang, W.J. Yu, Z. Shi, X.J. Liu

2415–2429 **Improved dislocation density-based models for describing hot deformation behaviors of a Ni-based superalloy**

Y.C. Lin, Dong-Xu Wen, Ming-Song Chen, Yan-Xing Liu, Xiao-Min Chen, Xiang Ma

2430–2437 **New synthetic methodology and magnetic properties of fcc Co–Ni nanostructured alloys embedded in KIT-6 matrix**

Shankar B. Dalavi, Rabi N. Panda

2438–2444 **Evolutions of the texture and microstructure of a heavily cold-rolled Ni9W alloy during recrystallization**

Hui Tian, Yi Wang, Lin Ma, Min Liu, Hongli Suo

2445–2456 **Performance enrichment on tribological characteristics of powder metallurgy processed aluminium particulate composites by inclusion of rutile (TiO₂)**

C. Antony Vasantha Kumar, J. Selwin Rajadurai, S. Sundararajan

2457–2464 **Evaluation of the effect of ageing heat treatment on corrosion resistance of Al–Ag alloy using electrochemical methods**

Pooria Afzali, Mardali Yousefpour, Ehsan Borhani

2465–2472 **Characterization of the secondary phases in spray formed Al–Zn–Mg–Cu–Sc–Zr alloy during hot compression**

Z.L. Ning, S. Guo, M.X. Zhang, F.Y. Cao, Y.D. Jia, J.F. Sun

(Continued)

- 2473–2481 **Casting Fe–Al-based intermetallics alloyed with Li and Ag**
M. Villagomez-Galindo, G. Carbajal-De la Torre, J.C. Romo-Castañeda, A. Bedolla-Jacuinde, H.A. González-Rojas, M.A. Espinosa-Medina
- 2482–2492 **Alloy development and reheating process exploration of Al–Si casting alloys with globular grains for thixoforming**
Jiao Jiao Wang, Zhong Min Zhang, A.B. Phillion, Shu Zhen Shang, Gui Min Lu
- 2493–2505 **Electrochemical corrosion behaviors of a stress-aged Al–Zn–Mg–Cu alloy**
Y.C. Lin, Jin-Long Zhang, Ming-Song Chen, Ying Zhou, Xiang Ma
- 2506–2515 **Microstructure characteristics and mechanical properties of a 2A66 Al–Li alloy processed by continuous repetitive upsetting and extrusion**
Wenli Gao, Juan Xu, Jie Teng, Zheng Lu
- 2516–2523 **Effect of carbon equivalent on thermal and mechanical properties of compacted graphite cast iron**
Yangzhen Liu, Jiandong Xing, Yefei Li, Yong Wang, Lei Wang, Baochao Zheng, Dong Tao
- 2524–2530 **Effect of the pouring temperature by novel synchronous rolling-casting for metal on microstructure and properties of ZL104 alloy**
Xiaoqiang Luo, Qingzhi Yan, Zhengyang Li
- 2531–2537 **Parametric optimization of electrical discharge machining process on α – β brass using grey relational analysis**
S. Marichamy, M. Saravanan, M. Ravichandran, G. Veerappan
- 2538–2548 **Influence of different casting processes on high cycle fatigue behavior of Mg–10Gd–3Y–0.5Zr alloy**
Jimei Mao, Wencai Liu, Yanlei Li, Guangling Wei, Liang Zhang, Wenbing Zou, Ying Tian, Guohua Wu
