
BEHAVIORAL and BRAIN SCIENCES

 Cambridge
Journals

EDITOR:

Stevan Harnad, *Princeton, NJ*

Behavioral and Brain Sciences publishes particularly significant and controversial "target articles." These have been successful in drawing out the leading investigators in a wide range of fields who discuss, debate and critically analyze topics of current interest to the entire biobehavioral science community. Fascinating and often surprising results come from the 20-30 open peer commentaries on each target article from psychologists, linguists, philosophers, neuroscientists, anthropologists, developmentalists and other specialists within and across these disciplines.

Selected Papers

Sex differences in human mate preferences:
Evolutionary hypothesis tested in 37 cultures,
D.M. Buss

The child's trigger experience: "Degree-O"
learnability, *D. Lightfoot*

Strategies for the control of voluntary movements
with one degree of freedom, *G.L. Gottlieb et al.*

Numerical competence in animals: Definitional
issues, current evidence and a new research agenda,
H. Davis, R. Perusse

Reconciling Fechner and Stevens: Toward a
unified psychophysical law, *L.E. Krueger*

Behavioral and Brain Sciences (ISSN 0140-525X) is
published quarterly. Subscription to Volume 12, 1989
(US and Canada only): \$154.00 for institutions; \$65.00
for individuals; single parts \$43.00.

Back Volumes: 1-11 (1978-1988) \$54.00 each.

APPLIED PSYCHOLINGUISTICS

EDITORS:

Catherine E. Snow, *Harvard University*
John L. Locke, *Massachusetts General Hospital*

Applied Psycholinguistics is required reading for everyone concerned with the psychological processes involved in language. The journal gathers together the best work from a variety of fields including linguistics, psychology, psychiatry, education, language learning, sociology, speech, hearing and neurology. Articles address the nature, acquisition and impairments of language expression and comprehension, both for oral and written language. In addition, each issue contains reviews of important or emergent areas, short notes, discussions of previously published papers and methodological notes.

Recent Articles:

Early action word acquisition in normal and language-impaired children, *R. G. Schwartz*

Subject-specific and task-specific characteristics of metalinguistic awareness in bilingual children, *S. J. Galambos and Kenji Hakuta*

Levels of representation in verbal number production, *S. M. Sokol and M. McCloskey*

Down the Garden Path: Inducing and correcting overgeneralization errors in the foreign language classroom, *M. Tomasello and C. Herron*

Applied Psycholinguistics (ISSN 0142-7164) is published quarterly. Subscriptions to Vol. 10, 1989 (US and Canada only): \$74.00 for institutions; \$38.00 for individuals; single parts \$21.00.

Back Volumes: 1-9 (1980-1988) \$85.00 each.

Send orders to:

32 East 57th Street, New York, NY 10022, USA; or
The Edinburgh Building, Cambridge, CB2 2RU, U.K.

required reading—

Psychological Medicine

**A Journal for Research in
Psychiatry and the Allied Sciences**

Editor: Michael Shepherd

“The high-caliber, technically sophisticated, and authoritative content of this journal . . . make it an important choice for medical libraries and advanced collections in the behavioral and social sciences. The large book review selections in each issue make it a valuable selection tool for subject specialists.”

CAMBRIDGE UNIVERSITY PRESS

32 East 57th Street, New York, NY 10022

Printed in USA

Development and Psychopathology strongly encourages contributions from a wide array of disciplines because an effective developmental approach to psychopathology necessitates a broad synthesis of knowledge. Manuscripts will be considered that address, for example, the causes and effects of genetic, ontogenetic, biochemical, cognitive, or socioeconomic factors in developmental processes with relevance to various risk or psychopathological conditions. The journal also seeks articles on the processes underlying the adaptive and maladaptive outcomes in populations at risk for psychopathology.

Manuscript Review Policy

Manuscripts will have a blind review by at least two scholars. Every effort will be made to notify authors within eight weeks of submission concerning the reviewers' recommendations and comments. Manuscripts will be promptly published upon acceptance. *Development and Psychopathology* has no page charges.

Manuscript Submission

Four copies of each manuscript should be submitted to:

Dante Cicchetti, PhD
Department of Psychology
Director, Mt. Hope Family Center
University of Rochester
187 Edinburgh Street
Rochester, NY 14608, U.S.A.

Manuscript Preparation and Style

General. All manuscripts must be typed on 8¹/₂" × 11" or A4 white bond paper with ample margins on all sides. The entire manuscript—including abstract, tables, and references—must be double-spaced. Manuscript pages must be numbered consecutively. Language of publication: English.

Style and Manuscript Order. Follow the general style guidelines set forth in the *Publication Manual of the American Psychological Association* (3rd ed.). The Editor may find it necessary to return manuscripts for reworking or retyping that do not conform to requirements. Manuscripts must be arranged in the following order:

Title Page (page 1). To facilitate blind review, all indication of authorship must be limited to this page; other pages must only show the short title plus page number at the top right. On the title page include (a) full article title; (b) name and affiliations of all authors; (c) the mailing address and telephone number of the lead author; (d) the address for reprint requests, if different from the lead author; (e) a short title of less than 50 characters.

Abstract Page (page 2). Include (a) the full article title; (b) an abstract of no more than 200 words; (c) up to 5 keywords for indexing and information retrieval.

Acknowledgments (page 2). These should be placed below the abstract. Use this section to indicate grant support, substantial assistance in the preparation of the article, or other author notes.

Text (page 3). Use a 5-character paragraph indent. Do not hyphenate words at the end of lines. Do not justify right margins.

References. Bibliographic citations in the text must include the author's last name and date of publication, and may include page references. Examples of in-text citation styling are: Brown (1983), Ingram (1976, 54–55), Smith and Miller (1966), (Smith & Miller, 1966), (Peterson, Danner, & Flavell, 1972), and subsequently

(Peterson et al., 1972). If more than one, citations must be in *alphabetical* order. Every in-text citation must be included in the reference section; every reference must be cited in the text. Examples of reference styling are:

Journal Article

Sroufe, L. A., & Rutter, M. (1984). The domain of developmental psychopathology. *Child Development*, 55, 17–29.

Book

Piaget, J. (1962). *Play, dreams, and imitation in childhood*. New York: Norton.

Chapter in an Edited Book

Cicchetti, D., & Pogge-Hesse, P. (1982). Possible contributions of the study of organically retarded persons to developmental theory. In E. Zigler & D. Balla (Eds.), *Mental retardation: The developmental-difference controversy* (pp. 277–318). Hillsdale, NJ: Erlbaum.

Appendix (optional). Use only if needed. May be useful for review, but not appropriate for publication.

Tables. Tables must appear as a unit following the reference section. Each table should be typed double-space on a separate sheet, numbered consecutively with an Arabic numeral and a short title. (Example: Table 5. Comparisons on language variables.) All tables must be cited in the text.

Figures. Figures must appear as a unit following the tables. Each figure must be numbered consecutively with an Arabic numeral and a descriptive legend. Legends must be typed double-space on a separate sheet preceding the artwork. (Example: Figure 3. Progress in language development.) Figures must be supplied no larger than 8" × 10", be black and white, and be ready for photographic reproduction. Diagrams must be professionally rendered or computer generated. All labels and details must be clearly printed and large enough to remain legible at a 50% reduction. Artwork should be identified by figure number and short title, and carefully packaged in a protective envelope. All figures must be cited in the text.

Copyediting and Page Proofs

The publisher reserves the right to copyedit manuscripts to conform to journal style. The lead author will receive page proofs for correction of typographical errors only. No rewriting of the original manuscript as submitted is allowed in the proof stage. Authors must return proofs to Cambridge within 48 hours of receipt or approval will be assumed.

Offprints

The lead author will receive 25 free article offprints of his or her article. A form accompanying page proofs allows the lead author to order complete copies of the issue and/or purchase of additional offprints. All coauthor offprint requirements must be included on this form. Orders received after the issue is printed are subject to a 50% reprint surcharge.

Copyright and Originality

It is a condition of publication that all manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. All authors must sign the Transfer of Copyright Agreement, available from the Editor, before an article can be published. Government authors whose articles were created in the course of their employment must so certify in lieu of copyright transfer. Authors are responsible for obtaining written permission from the copyright owners to reprint any previously published material included in their article.
