

EDITORS' NOTE

The Proceedings have been reproduced from the original manuscripts with an edited transcript of the discussion following each paper. The exception is an extended discussion which took place after paper number 13. This has been incorporated into the final discussion (see p.35-1).

In editing the transcripts of questions, answers and comments we have endeavoured to preserve the speaker's intentions as we understood them but we apologise for any errors or omissions on our part.

It is a pleasure to acknowledge the assistance we have received in preparing the Proceedings for publication. In particular we would like to thank Miss Vera Raymond for preparing the typescripts for printing, Mr. Peter Elliott for preparing the cover and Mr. G. Preston and his staff for advice and for printing the Proceedings. Finally, it would not have been possible to publish the Proceedings without the support of Professor H. Messel and the Science Foundation for Physics within the University of Sydney.
