Plant Genetic Resources: Characterization and Utilization

Volume 9 2011 ISSN: 1479-2621

Aims and Scope

The journal provides a forum for describing the application of novel genomic technologies, as well as their integration with established techniques, towards the understanding of the genetic variation captured in both *in situ* and *ex situ* collections of crop and non-crop plants; and for the airing of wider issues relevant to plant germplasm conservation and utilisation. We particularly welcome multi-disciplinary approaches that incorporate both a technical and a socio-economic focus.

Technical aspects can cover developments in technologies of potential or demonstrated relevance to the analysis of variation and diversity at the phenotypic and genotypic levels; the development of rational germplasm collection, evaluation and conservation strategies; and the impact of crop genetic modification and biotechnology on plant genetic resources. Authors should note that the journal will not review submissions using the RAPD marker system, except where very large numbers of assays place a cost limitation on the analysis, or where RAPD data is combined with, and is co-analysed with other forms of descriptive data, which allows an objective means of assessing the credibility of the RAPDs.

Non-technical aspects can include ethical, legal, commercial and social issues of relevance, in particular relating to farmers' rights, intellectual property and ethnobotany.

Plant Genetic Resources Characterization and Utilization

Contents

Germplasm resources in legumes <i>T. H. Noel Ellis</i>	1
Phylogeny, phylogeography and genetic diversity of the <i>Pisum</i> genus <i>Petr Smýkal, Gregory Kenicer, Andrew J. Flavell, Jukka Corander, Oleg Kosterin, Robert J. Redden, Rebecca Ford, Clarice J. Coyne, Nigel Maxted, Mike J. Ambrose and Noel T.H. Ellis</i>	4
Genetic and genomic resources of lentil: status, use and prospects <i>Abebe Tullu, Axel Diederichsen, Galina Suworova and Albert Vandenberg</i>	19
Review Article	
Genetic resources of lentil and its utilization in India <i>Mobar Singh, Saroj Sardana and Shyam Kumar Sharma</i>	30
Genetic resources in <i>Trifolium</i> and their utilization in plant breeding <i>Michael T. Abberton and Ian Thomas</i>	38
Genomic tools and germplasm diversity for chickpea improvement <i>Hari D. Upadhyaya, Mahendar Thudi, Naresh Dronavalli, Neha Gujaria, Sube Singh, Shivali Sharma and Rajeev K. Varshney</i>	45
Large genetic variation for heat tolerance in the reference collection of chickpea (<i>Cicer arietinum</i> L.) germplasm <i>L. Krishnamurthy, P. M. Gaur, P. S. Basu, S. K. Chaturvedi, S. Tripathi, V. Vadez, A. Rathore, R. K. Varshney and C. L. L. Gowda</i>	59
Sainfoin (<i>Onobrychis viciifolia</i>): a beneficial forage legume <i>Christine Hayot Carbonero, Irene Mueller-Harvey, Terence A. Brown and Lydia Smith</i>	70
Genetic diversity of Colombian landraces of common bean as detected through the use of silver-stained and fluorescently labelled microsatellites <i>Lucy M. Díaz, Héctor F. Buendía, Myriam C. Duque and Matthew W. Blair</i>	86
Pigeonpea composite collection and identification of germplasm for use in crop improvement programmes <i>H. D. Upadhyaya, K. N. Reddy, Shivali Sharma, R. K. Varshney, R. Bhattacharjee, Sube Singh and C. L. L. Gowda</i>	97
The worldwide utilization of the Chinese soybean germplasm collection <i>Li-Juan Qiu, Peng-Yin Chen, Zhang-Xiong Liu, Ying-Hui Li, Rong-Xia Guan, Li-Hui Wang and Ru-Zhen Chang</i>	109
Managing self-pollinated germplasm collections to maximize utilization <i>Randall L. Nelson</i>	123
An overview of peanut and its wild relatives <i>David J. Bertioli, Guillermo Seijo, Fabio O. Freitas, José F. M. Valls, Soraya C. M. Leal-Bertioli and Marcio C. Moretzsohn</i>	134

Publisher: Katy Christomanou

Plant Genetic Resources: Characterization and Utilization is an international journal published tri-annually by Cambridge University Press in April, August and December on behalf of NIAB. The online edition is available at journals.cambridge.org/pgr.

Special sales and supplements:

This Journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The Journal also publishes proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at the Cambridge address above.

Subscription information:

The subscription rates for Volume 9, 2011 (3 issues) are:

Institutional subscription

Internet/Print Package £321.00/\$616.00 (Americas only)

Internet only £252.00/\$486.00 (Americas only)

Print only £297.00/\$535.00 (Americas only)

Any **supplements** to this Journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact CUP Publishing for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of

publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections Plant Genetic Resources USA address.

Information for Authors:

Please email manuscript (with any accompanying figures or tables) to the Journal Administrator Faye Kalloniatis at plantgeneticresources@googlemail.com

Notes for Authors are available on the internet at journals.cambridge.org/pgr

Offprints: The corresponding author of an accepted paper will receive a pdf offprint. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges or submission charges are levied by this journal.**
