

CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Cambridge

The city of Cambridge received its royal charter in 1201, having already been home to Britons, Romans and Anglo-Saxons for many centuries. Cambridge University was founded soon afterwards and celebrates its octocentenary in 2009. This series explores the history and influence of Cambridge as a centre of science, learning, and discovery, its contributions to national and global politics and culture, and its inevitable controversies and scandals.

War Record of the Cambridge University Press 1914–1919

First published in 1920, this War Record gives the military service details of the 252 Cambridge University Press employees who joined the armed forces during the First World War. The records are of variable length, with the most comprehensive giving the employee's full name, the regiments in which he served, the areas where he was based, positions held, promotions received and injuries sustained. Out of the 41 employees who lost their lives, photographic portraits of 40 are included. From advertisement department worker Vincent Cummings, killed by a sniper in 1917 while carrying an injured comrade to safety, to Charles Woods, a member of the Press Secretary's department who survived the Somme, Arras, Ypres, Cambrai and Mons, the records pay a moving tribute to the men who risked their lives to serve their country during the First World War.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value across a wide range of disciplines in the humanities and social sciences and in science and technology.
