

Continued from back cover

- Phase mixing and surface-wave decay in an inhomogeneous plasma
P. S. CALLY AND Z. SEDLÁČEK 145
- Effect of warm beam electrons on electrostatic-shock solutions
M. DEY, U. N. DAS, K. S. GOSWAMI AND S. BUJARBARUA 159
- The kinetic theory of the nonlinear low-frequency response of a collisionless plasma to high-frequency electromagnetic radiation
YU. M. ALIEV, V. YU. BYCHENKOV, M. S. JOVANOVIĆ AND A. A. FROLOV 167

INSTRUCTIONS TO AUTHORS

Authors wishing to have papers published in the *JOURNAL* should communicate them to any one of the editorial board, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the *JOURNAL* free of charge, and additional offprints can be purchased if ordered in advance.

JOURNAL OF PLASMA PHYSICS

Volume 48 Part 1 August 1992

CONTENTS

| | |
|--|-----|
| Editorial notice J. P. DOUGHERTY | 1 |
| Second-harmonic excitation of a Gould-Trivelpiece mode in a beam-plasma system G. PRABURAM AND A. K. SHARMA | 3 |
| An action principle for the Vlasov equation and associated Lie perturbation equations. Part 1. The Vlasov-Poisson system JONAS LARSSON | 13 |
| Modelling of a plasma column sustained by a travelling circularly polarized electromagnetic wave ($m = 1$ mode) in the presence of a constant axial magnetic field E. BENOVA, P. STAIKOV AND I. ZHELYAZKOV | 37 |
| Exact solution of the dispersion equation for electromagnetic waves in sheared, relativistic electron beams S. CUPERMAN AND D. HERISTCHI | 59 |
| Nonlinear generation of the fundamental radiation in plasmas: the influence of induced ion-acoustic and Langmuir waves F. B. RIZZATO AND A. C.-L. CHIAN | 71 |
| The equations of reduced magnetohydrodynamics G. P. ZANK AND W. H. MATTHAEUS | 85 |
| Modulational instability of an ion wave packet in a cylindrical plasma-filled waveguide B. GHOSH | 101 |
| Steady-state self-focusing of rippled laser beams in plasmas: arbitrary nonlinearity M. S. SODHA, S. KONAR AND K. P. MAHESHWARI | 107 |
| Intense propagation in a magnetized cold plasma: modulational instabilities of fully relativistic electromagnetic waves R. E. KATES AND D. J. KAUP | 119 |
| Nonlinear interaction of an intense electromagnetic wave with an unmagnetized electron-positron plasma V. I. BEREZHIANI, L. N. TSINTSADZE AND P. K. SHUKLA | 139 |
