Nutritional Physiology of Farm Animals

Edited by J. A. F. Rook & P. C. Thomas

This book uses a new, dynamic approach to the way in which the supply of nutrients determines the efficiency of characteristics of animal production, and is presented in terms of the underlying principles wherever possible. Written by a team of recognised research workers and teachers in the field, coverage includes:

- ★ The provision of and regulation of nutrients
- ★ The role of nutrient supply in the regulation of metabolism
- ★ Diet and animal performance

Invaluable as a reference text to all students and workers concerned with animal science.

This book can be ordered from your bookseller or in case of difficulty please complete this form and return it to: Deborah Burtenshaw, Longman Group Limited, Longman House, Burnt Mill, Harlow, Essex CM20 2JE, UK.

Please send me _____ copy/copies of Nutritional Physiology of Farm Animals at £25.00 + £1.15 post and packing.

I enclose my remittance of _____ (please make cheques payable to Longman Group Ltd).

For credit card holders. Please Charge to Access Barclaycard Diners American Express

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be avoided as far as possible but if unavoidable it should be included on a fly-leaf. Marginal lettering should be inserted lightly in pencil on the original diagram or on a fly-leaf.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

Tables should be as simple and as few as possible. Each table should be typed on a separate sheet.

Abstract. Every article should have a short abstract (not more than 250 words) complete in itself and understandable without reference to the paper. *The abstract will be printed at the beginning of the paper.*

References. Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. The arrangement of references should be as in recent papers in *Animal Production*; details are given in the notes for guidance.

Proofs are supplied once and must be returned corrected to the Editors *within 3 days*. Only essential corrections should be made.

Reprints. Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the proof-stage.

Animal Production is published six times a year in two volumes. Annual subscription is £56.00 (or \$120.00 in the USA and Canada) and the price for a single part is £10.00 (or \$22.00) net.

Proceedings of the British Society of Animal Production (New Series) ceased publication in 1975 and the material is now published as a separate section in the June issue of *Animal Production*.

Correspondence regarding subscriptions and sales (current and back numbers of the Journal and the Proceedings), should be addressed to: Scottish Academic Press Ltd, 33 Montgomery Street, Edinburgh, Scotland EH7 5JX.

Other enquiries, including those concerning copyright, should be addressed to: Durrant Periodicals, Winton Lea, Pencaitland, East Lothian, Scotland EH34 5AY.
