Aims and Scope

The National Institute Economic Review is the peer-reviewed quarterly publication of the National Institute of Economic and Social Research, one of Britain's oldest and most prestigious independent research organisations. The Institute's objective is to promote, through quantitative research, a deeper understanding of the interaction of economic and social forces that affect peoples' lives so that they may be improved. It has no political affiliation, and receives no core funding from government. Its research programme is organised under the headings of Economic Modelling and Analysis; Productivity; Education and Training and the International Economy. The Review has a long history of publishing leading articles in macroeconomics, forecasting and the impact of events such as Brexit and Covid-19 on households and specific industries.
