

THE COMMONWEALTH AND INTERNATIONAL LIBRARY
OF SCIENCE, TECHNOLOGY AND ENGINEERING

Chairman of the Honorary Editorial Advisory Board:

Sir ROBERT ROBINSON, O.M., F.R.S.

The first volume of a 1000 volume original paperback series in aid of education

On Teaching Mathematics

A report on some present-day problems in the teaching of mathematics, being the outcome of discussions and lectures at the Southampton Mathematical Conference, April 1961, under the Chairmanship of

Professor BRYAN THWAITES

Can Britain survive in a technological age?

Ultimately it all depends on education, and upon school mathematics in particular. Today British schools are desperately short of mathematics teachers, of whom British universities are not producing enough. The weakening foundations of our educational structure are swaying beneath the ever-increasing load of science and technology. Even the best and fastest rescue operation will take a decade to right it all. Questions in the House of Lords, in the Commons, and letters in 'The Times' have foretold the anxious years ahead.

What are our chances of remaining a first-class industrial power? How bad are things? What must be done? ON TEACHING MATHEMATICS (7/6 net. [\$1.25]) contains the findings and recommendations produced in answer to these questions by professional mathematicians drawn from schools, universities and industry at the 10-day Southampton Conference.

It is most appropriate that the first volume to be issued in this Library should be this important book on the teaching of mathematics, which will undoubtedly have a profound effect on, and be a great help to, everyone who teaches mathematics or is interested in the wider field of education.

Pergamon Press leads the international scientific publishing houses, and is proud to play its part in current affairs of great moment.

This valuable paperback is available from all booksellers.

Price — 7/6 net (\$1.25)

THE QUARTERLY JOURNAL OF MATHEMATICS

OXFORD SECOND SERIES

Edited by T. W. CHAUNDY, U. S. HASLAM-JONES, E. C. THOMPSON

VOLUME 12

No. 48

DECEMBER 1961

CONTENTS

- K. A. Hardie:** Higher Whitehead products
J. M. Hammersley: On the rate of convergence to the connective constant of the hypercubical lattice
H. Ruben: A multidimensional generalization of the inverse sine function
P. J. McCarthy: Approximate location of the zeros of generalized Bessel polynomials
W. D. Barcus: On the cohomology of an Eilenberg-MacLane space
J. F. C. Kingman: A convexity property of positive matrices
B. Gordon: Some identities in combinatorial analysis
J. B. McLeod: Eigenfunction expansions associated with a complex differential operator of the second order
H. Davenport, D. J. Lewis and A. Schinzel: Equations of the form $f(x) = g(y)$
P. Erdős, Chao Ko and R. Rado: Intersection theorems for systems of finite sets

Quarterly Journal of Mathematics (Oxford Second Series) is published in March, June, September and December at 18s. 6d. net for a single number with an annual subscription (for four numbers) of 65s. post free. Orders may be placed with any bookseller or sent direct to the Publisher.

OXFORD UNIVERSITY PRESS

AMEN HOUSE, WARWICK SQUARE, LONDON, E. C. 4.

PROCEEDINGS

OF THE

EDINBURGH MATHEMATICAL SOCIETY

VOLUME 12 (Series 2)

December 1961

PART 4

- LL. G. CHAMBERS:** The Angular Momentum of an Electromagnetic Field.
A. M. MACBEATH: On Measure of Sumsets. III. The continuous $(\alpha + \beta)$ -Theorem.
J. B. MCLEOD: On an Integral in the Distribution of Eigenvalues.
E. W. ROSS, JR.: Asymptotic Representation of Certain Real Integrals with Parameter-dependent Limits of Integration.
T. SCOTT: Combinantal Forms of a Quadric Net Applied to Irreducible Concomitant Systems.
T. SCOTT: The Complete Irreducible System of Invariants of Three Quadrics.
W. E. WILLIAMS: The Solution of Certain Dual Integral Equations.

Series I of the PROCEEDINGS consists of forty-four volumes published from 1886 to 1926.

Series II consists of twelve complete volumes to date.

The PROCEEDINGS are published in parts and issued twice yearly. Four parts complete a volume of approximately 200 pages and the Title Pages and Index are published in Part 4 of each volume.

The prepaid subscription per volume is 60s. (U.S.A. and CANADA \$10.00) post free. Single parts 15s. (U.S.A. and CANADA \$2.50) net. Orders, and requests for prices of in-print back numbers, should be addressed to Oliver and Boyd Ltd., Tweeddale Court, 14, High Street, Edinburgh, 1.
