

THE VIRUS

Life's Enemy

By KENNETH SMITH

20 Illustrations. 8s. 6d. net

This, the third volume in The Cambridge Library of Modern Science, deals with a subject of which little was known or imagined until very recent times, but which may yet prove to be of paramount biological, economic, and philosophical importance. It has all the interest of stories of man's courageous and imaginative research, with the added importance that a proper understanding of virus diseases and viruses is essential for the future well-being of mankind.

THE FABRICIAN TYPES OF INSECTS IN
THE HUNTERIAN COLLECTION, VOLUME II

COLEOPTERA

By ROBERT A. STAIG

31 plates in colour

27s. 6d. net

(Glasgow University Publication)

This volume continues Dr Staig's systematic description and illustration of Hunter's collection of insects, made about 160 years ago and then classified by Fabricius, which was part of Hunter's bequest to Glasgow. The first volume was published in 1931 and began the description of Coleoptera, which this volume continues.

| | PAGE |
|--|------|
| REES, GWENDOLEN. The anatomy of <i>Anthobothrium auriculatum</i> (Rud.) (Cestoda) from <i>Raja batis</i> L. (With 17 Figures in the Text) . . . | 1 |
| CLAY, THERESA and MEINERTZHAGEN, COLONEL R. The relationship between Mallophaga and hippoboscoid flies. (With 2 Figures in the Text) . . . | 11 |
| LYSAGHT, AVERIL M. The incidence of larval trematodes in males and females of the gastropod <i>Littorina neritoides</i> (L.) on the Plymouth Breakwater. (With 1 Figure in the Text) | 17 |
| ROBINSON, G. G. Cases of abnormal development in the argasid tick, <i>Ornithodoros moubata</i> . (With 3 Figures in the Text) | 23 |
| KEILIN, D. and TATE, P. The larval stages of the celery fly (<i>Acidia heraclei</i> L.) and of the braconid <i>Adelura apii</i> (Curtis), with notes upon an associated parasitic yeast-like fungus. (With 18 Figures in the Text) | 27 |
| TATE, P. The larva of <i>Phaonia palpata</i> Stein (Diptera, Anthomyiidae). (With 4 Figures in the Text) | 37 |
| JONES, DILYS O. The anatomy of three digenetic trematodes, <i>Skrjabiniella aculeatus</i> (Odhner), <i>Lecithochirium rufoviride</i> (Rud.) and <i>Sterrhurus fusiformis</i> (Lühe) from <i>Conger conger</i> (Linn.). (With 11 Figures in the Text) | 40 |
| RADFORD, CHARLES D. Genera and species of parasitic mites (Acarina) | 58 |
| BISHOP, ANN. Variation in gametocyte production in a strain of <i>Plasmodium relictum</i> in canaries. (With 2 Figures in the Text) | 82 |

PARASITOLOGY is published about four times a year. The numbers afterwards are issued in volumes each containing four numbers.

Papers for publication should be sent to Professor D. KEILIN, Sc.D., F.R.S., Moltano Institute, Downing Street, Cambridge. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editors for publication are understood to be offered to *PARASITOLOGY* alone, unless the contrary is stated.

Contributors receive twenty-five copies of their papers free. Additional copies, not exceeding twenty-five (except in special cases), may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £2. 15s. per volume (post-free), payable in advance; single numbers 18s. 6d. net (double number 37s. net). Subscriptions may be sent to any Bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, N.W. 1.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of *Parasitology* in the United States of America.
