The contributors to this volume are: An Hong-Zhi,
C. F. Ansley, M. S. Bartlett, P. Bloomfield,
D. R. Brillinger, M. A. Cameron, Chen Zhao-Guo,
M. Deistler, J. Durbin, J. Gani, J. Henstridge,
S. M. Heravi, C. C. Heyde, Y. Hosoya, R. H. Jones,
K. Katsura, R. Kohn, P. A. P. Moran, D. F. Nicholls,
Y. Ogata, M. R. Osborne, T. Ozaki, E. Parzen,
J. H. W. Penm, M. B. Priestley, B. G. Quinn,
J. Rissanen, P. M. Robinson, M. Rosenblatt, R. Shibata,
G. K. Smyth, V. Solo, T. P. Speed, K. Tanaka,
R. D. Terrell, P. J. Thomson, P. Tin, J. G. Veitch,
G. S. Watson and P. Whittle.

A complete list of publications by Professor
E. J. Hannan, from 1955 to 1984, is included at the
beginning of the book.

The Applied Probability Trust

The Applied Probability Trust is a non-profit making organisation established in 1963 by three Australian sponsors with the collaboration of the London Mathematical Society. Its object is the advancement of research and publication in probability and more generally mathematics.

The *Journal of Applied Probability* was launched by the Trust in 1964. With an international editorial board, it was one of the first journals in the world devoted entirely to papers in probability theory and its applications. Starting from a fairly modest two issues in its first year, with about 400 pages, the *Journal* expanded rapidly, and in 1969 it was joined by a companion publication, *Advances in Applied Probability.* Like the *Journal, Advances* contains papers in applications of probability theory to the biological, physical, social and technological sciences; while the *Journal* is now reserved for shorter research papers and notes, the *Advances* is devoted to review papers, longer research papers, the proceedings of conferences, and letters to the editor.

The Trust also publishes *Mathematical Spectrum,* a magazine for student mathematicians in schools, colleges and universities, as well as the general reader interested in mathematics.

The office of the Applied Probability Trust is located in the Department of Probability and Statistics, University of Sheffield, England.
