CAMBRIDGE
UNIVERSITY PRESS

Physics

Books and Journals from
Cambridge University Press

Cambridge University Press is a leading publisher of textbooks, handbooks and monographs that span all areas of physics, from condensed matter physics, to theoretical and mathematical physics.

We also publish a key cluster of journals including the *Journal of Plasma Physics*, *Journal of Fluid Mechanics*, and *High Power Laser Science and Engineering*.

For further details visit:

CAMBRIDGE
UNIVERSITY PRESS

S 587 Hydrodynamic schooling of multiple self-propelled flapping plates
Z.-R. Peng, H. B. Huang & X.-Y. Lu

S 601 Duelling dry zones around hygroscopic droplets
S. Nath, C. E. Bisbano, P. Yue & J. B. Boreyko

621 Evolution of solute blobs in heterogeneous porous media
M. Dentz, F. P. J. de Barros, T. Le Borgne & D. R. Lester

647 Taylor state dynamos found by optimal control: axisymmetric examples
K. Li, A. Jackson & P. W. Livermore

JFM Rapids (online only)

R1 Core-pressure alleviation for a wall-normal vortex by active flow control
Q. Liu, B. An, M. Nohmi, M. Obuchi & K. Taira

R2 An elaborate experiment on the single-mode Richtmyer–Meshkov instability
L. Liu, Y. Liang, J. Ding, N. Liu & X. Luo

R3 Drag on flat plates of arbitrary porosity
K. Steiros & M. Hultmark

S indicates supplementary data or movies available online.

- S 1 Transition in a separation bubble under tonal and broadband acoustic excitation
J. W. Kurelek, M. Kotsonis & S. Yarusevych
- 37 Cones of silence, complex rays and catastrophes: high-frequency flow–acoustic interaction effects
J. T. Stone, R. H. Self & C. J. Howls
- S 72 Insights into the dynamics of conical breakdown modes in coaxial swirling flow field
K. Rajamanickam & S. Basu
- 111 Mean flow generation by an intermittently unstable boundary layer over a sloping wall
A. Ghasemi, M. Klein, A. Will & U. Harlander
- S 150 On the scaling of propagation of periodically generated vortex rings
H. Asadi, H. Asgharzadeh & I. Borazjani
- 171 Confinement effects on regular–irregular transition in shock-wave–boundary-layer interactions
I. J. Grossman & P. J. K. Bruce
- 205 The linear instability of the stratified plane Couette flow
G. Facchini, B. Favier, P. Le Gal, M. Wang & M. Le Bars
- 235 Spatio-temporal intermittency of the turbulent energy cascade
T. Yasuda & J. C. Vassilicos
- 253 Approximate solutions to droplet dynamics in Hele-Shaw flows
Y. Green
- S 271 Clarifying the relationship between efficiency and resonance for flexible inertial swimmers
D. Floryan & C. W. Rowley
- 301 Vibrations of a square cylinder submerged in a wake
R. Bhatt & Md. M. Alam
- 333 Jet–flap interaction tones
P. Jordan, V. Jaunet, A. Towne, A. V. G. Cavalieri, T. Colonius, O. Schmidt & A. Agarwal
- S 359 Optimal mixing in two-dimensional stratified plane Poiseuille flow at finite Péclet and Richardson numbers
F. Marcotte & C. P. Caulfield
- 386 Saturation of a turbulent mixing layer over a cavity: response to harmonic forcing around mean flows
E. Boujo, M. Bauerheim & N. Noiray
- 419 On the over-production of turbulence beneath surface waves in Reynolds-averaged Navier–Stokes models
B. E. Larsen & D. R. Fuhrman
- 461 A volume integral implementation of the Goldstein generalised acoustic analogy for unsteady flow simulations
V. A. Semiletov & S. A. Karabasov
- 488 Turbulent channel flow of an elastoviscoplastic fluid
M. E. Rosti, D. Izbassarov, O. Tammisola, S. Hormozi & L. Brandt
- 515 An analytic solution for the noise generated by gust–airfoil interaction for plates with serrated leading edges
L. J. Ayton & J. W. Kim
- 537 Large-eddy simulation of flow over an axisymmetric body of revolution
P. Kumar & K. Mahesh
- 564 High frequency resonant response of a monopile in irregular deep water waves
B. H. Riise, J. Grue, A. Jensen & T. B. Johannessen
