

ADDENDUM

Modeling stratospheric polar vortex variation and identifying vortex extremes using explainable machine learning – ADDENDUM

Z. Wu , T. Beucler, E. Székely, W.T. Ball and D.I.V. Domeisen

<https://doi.org/10.1017/eds.2022.19>, Published by Cambridge University Press, 21 November 2022

Keywords: Explainable neural networks; feature selection; polar vortex extreme events; prediction; stratospheric variation

Cambridge University Press & Assessment regrets the omission of four ORCID iDs in the above article. The authors ORCID iDs are listed below:

Tom Beucler: 0000-0002-5731-1040

Eniko Székely: 0000-0001-5710-9814

William T. Ball: 0000-0002-1005-3670

Daniela I.V. Domeisen: 0000-0002-1463-929X
