

OXOID PEPTONES

The Oxoid Laboratories have developed a range of peptones differing widely in their properties so as to meet the requirements of workers in many varied fields.

OXOID PEPTONE L37

is used extensively for all routine purposes in laboratories throughout the world. It is a high-quality peptone which gives consistently good results with standard culture media.

OXOID PROTEOSE PEPTONE L46,

a more specialized peptone, is prepared by the papain digestion of selected fresh meat, for use in media for the production of bacterial toxins.

OTHER OXOID PEPTONES AND HYDROLYSATES :

Peptone L6, Tryptose, Soya Peptone, Mycological Peptone, Tryptone, Tryptone "T," Casein Hydrolysate (Acid), Peptone "P," Liver Digest Peptonized Milk.

**For progressive
laboratories**

Burroughs Wellcome & Co.*

FOR BIOLOGICAL DIAGNOSTIC REAGENTS

★ Burroughs Wellcome & Co. supply a large range of Biological Diagnostic Reagents.

A complete list of these products of the Wellcome Research Laboratories is available on request.

Normal Horse Blood
(oxalated or defibrinated)

Normal Horse Sera

Sheep Blood, defibrinated
(formolised, no preservative or Alsever solution)

Standard Agglutinable Suspensions

Diagnostic Sera
(specific for slide or tube test)
for—*E. coli*
 Salmonella
 Shigella
 H. influenzae, etc.

Streptococcus Grouping Sera

Wassermann, Kahn and Cardiolipin Antigens

Gonococcus Antigen

Hæmolytic Serum

Preserved Complement
(liquid or dried)

Species Precipitating Sera

Penicillinase

Rabbit Plasma, dried
(for coagulase test)

Coombs's Reagent

Streptolysin-O, dried

Staphylococcus a-hæmolysin

Thyroglobulin Tanned Red Cells

Receptor-Destroying Enzyme
(*V. cholerae*)

BURROUGHS WELLCOME & CO. (The Wellcome Foundation Ltd
THE WELLCOME BUILDING, EUSTON ROAD, LONDON, N.W)

The Journal of General Microbiology

Editors: B. C. J. G. KNIGHT and A. F. B. STANDFAST

Vol. 27, No. 3

35s.

March 1962

- B. C. J. G. KNIGHT. The growth of microbiology. The Fifth Marjory Stephenson Memorial Lecture.
- A. C. HASTIE. Genetic recombination in the hop-wilt fungus *Verticillium albo-atrum*.
- P. PEASE and N. LAUGHTON. Observations on Corynebacteria and related pleuropneumonia-like organisms (PPLO).
- A. A. IMSHENETSKY and V. V. ALFEROV. Electron microscopic study of the nuclei in a *Sorangium* species.
- T. H. MEAD. Purification of rabies soluble antigens.
- T. H. MEAD. The characterization of rabies soluble antigens.
- M. GRIFFITHS. Further mutational changes in the photosynthetic pigment system of *Rhodospseudomonas spheroides*.
- S. SENTHESHANMUGANATHAN and W. J. NICKERSON. Nutritional control of cellular form in *Trigonopsis variabilis*.
- S. SENTHESHANMUGANATHAN and W. J. NICKERSON. Composition of cells and cell walls of triangular and ellipsoidal forms of *Trigonopsis variabilis*.
- S. SENTHESHANMUGANATHAN and W. J. NICKERSON. Transaminase and D-amino acid oxidase of *Trigonopsis variabilis*.
- B. M. GUPTA and J. KLECKOWSKA. A study of some mutations in a strain of *Rhizobium trifolii*.
- B. KASSANIS. Properties and behaviour of a virus depending for its multiplication on another.
- E. O. POWELL and P. J. STOWARD. A photometric method for following changes in length of bacteria.
- P. REEVE and J. TAVERNE. Some properties of the complement-fixing antigens of the agents of trachoma and inclusion blennorrhoea and the relationship of the antigens to the developmental cycle.
- B. MOSSE. The establishment of vesicular-arbuscular mycorrhiza under aseptic conditions.
- R. B. YEE, S. PAN and H. M. GEZON. Effect of chloramphenicol on protein and nucleic acid synthesis by *Shigella flexneri*.

Subscription 80s. per volume of 3 parts.

SPINK, M. S. Staphylococcal sepsis in mothers and newborn babies	105
BEALE, A. J. and MASON, P. J. The measurement of the D-antigen in poliovirus preparations (with 2 plates)	113
FANTES, K. H. Concentration and partial purification of poliomyelitis viruses.	123

The Journal of Hygiene is issued in four parts to a volume.

Quotations can be given for back volumes on application.

Papers for publication should be sent to Lt.-Col. H. J. BENSTED, c/o Lister Institute of Preventive Medicine, Chelsea Bridge Road, London, S.W. 1. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editor for publication are understood to be offered to *The Journal of Hygiene* alone, unless the contrary is stated.

Contributors receive twenty-five copies of their paper free. Additional copies, not exceeding two hundred (except in special cases) may be purchased; these should be ordered when the final proof is returned.

The subscription price is £4. 10s. per volume (post-free), payable in advance; single numbers 30s. net. Subscriptions may be sent to any Bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

The subscription price in the U.S.A., is \$17.50. Single parts \$5.00. Enquiries should be addressed to the American Branch of the Press at 32 East 57th Street, New York 22, N.Y.
