

INDEX OF SUBJECTS.

	PAGE
Air, <i>see</i> Atmospheric conditions, Compressed air illness, Dioxan, Footwear, Kata-thermometer, Respiration, Silicosis.	
Antigens of cholera group of vibrios	262
Antitoxin, <i>see</i> Immunity, Precipitation reaction.	
Atmospheric conditions, effects on industrial worker	78
Bacteria:	
<i>Bacillus typhosus</i> in faeces, isolation of	38
<i>Bacterium aerogenes</i> , <i>see coli</i> and.	
<i>coli</i> and <i>Bact. aerogenes</i> in water. Method for rapid enumeration	437
<i>paratyphosum</i>	354
<i>typhi flavum</i> (so-called)	354
<i>typhosum</i>	354
containing Vi antigen in typhoid cases with Vi antigen in their sera	42
virulence and immunogenic activities of, in relation to its antigenic constituents	429
Staphylococci and their products clot plasma	549
Streptococci in bovine mastitis, bacteriology of	504
in scarlatina carriers and return cases	283
scarlatinal, toxic fractions of	93
<i>see</i> Bovine mastitis.	
Streptococcus of Aronson	23
<i>Vibrio cholerae</i> , its Q proteins and non-specific antigens	498
Vibrios (rough), serological grouping of	347
<i>see</i> Cholera.	
Bovine mastitis, streptococci isolated from 50 cases	238
streptococcus mastitis, bacteriology of	504
Cancer and inflammation, violence of animal's reaction in relation to etiology 404	
Lanolin protective against mineral-oil and tar dermatitis and	130
recommendations	138
Mortality, in one house or neighbouring houses	46
is it increasing or decreasing?	327
<i>see</i> Carcinogenicity.	
Carcinogenicity, new method for measuring	125
Chemotherapeutic susceptibility, <i>see Trypanosoma brucei</i> .	
Cholera group of vibrios, antigens of	262
<i>see</i> Bacteria.	
Compressed air illness, prevention of	318
Deaths, <i>see</i> Cancer.	
Dermatitis, <i>see</i> Cancer.	
Dietary of man fed to rats for 2½ years, effects observed	476
Dioxan poisoning, effects on kidney and liver (experimental)	540

	PAGE
Diphtheria, pseudo-Schick reaction	512
toxoid-reaction test (Moloney and Fraser)	449, 512
<i>see</i> Immunity.	
Disinfectants, testing them in the presence of organic matter	219, 534
Dust, <i>see</i> Silica.	
England and Wales, <i>see</i> Mortality.	
Footwear in relation to perspiration	199
Germicidal tests, <i>see</i> Disinfectants	
Heating, <i>see</i> Atmospheric conditions, Kata-thermometer, Man's body.	
Hong Kong, <i>see</i> Scarletina.	
Hypophysectomised animals, immunity experiments on	372
Immunity:	
Antigens of cholera group of vibrios	262
Diphtheria, toxoid-reaction test (Moloney)	449, 512
pseudo-Schick reaction	512
experiments with hypophysectomised animals	372
Precipitation reaction:	
Antiserum containing two antibodies (experiments with)	69
Multiple zones (experiments on)	169
Globulin increase in diphtheria antitoxin shown	174
<i>see Bact. typhosum</i> , Scarletina, Tuberculin, Tuberculo-protein, <i>Vibrio cholerae</i> .	
Impetigo contagiosa, epidemiology and control	150
Industrial, <i>see</i> Air.	
Kata-thermometer, errors in testing cooling powers and air velocities with	255
Kenya, <i>see</i> Typhus-like disease.	
Louping-ill, virus disease of sheep, infection of rhesus monkeys by the nose	339
Lung, <i>see</i> Silica.	
Man's body, effective radiating surface of	303
skin temperature in relation to warmth of environment	307
<i>see</i> Atmospheric conditions, Kata-thermometer.	
Mastitis, <i>see</i> Bovine.	
Mineral-oils and tars, <i>see</i> Cancer, Carcinogenicity.	
Mortality decrease in early adult male life in England and Wales	375
<i>see</i> Cancer.	
Nose-opening and -closing rays	75, 185
Perspiration in relation to footwear	199
Plague in East Africa, relation of cotton crop as vehicle to rats and fleas	388
Plasma, clotted by Staphylococci or their products	549
Poisons in industries, <i>see</i> Dioxan.	
Precipitation reaction, <i>see</i> Immunity.	
Psittacosis (enzootic) in wild Australian parrots	412

	PAGE
Rats and fleas in relation to plague in East Africa	388
on human dietary, a long-term experiment	476
Respiration: nose-opening and -closing rays	75, 185
<i>Rhipicephalus sanguineus</i> , vector of "tropical" typhus	1
Scarlatina, carriers and return cases	283
Immunity in Hong Kong	161
Scarlatinal, <i>see</i> Bacteria; Streptococci.	
Silica content of lung, method of expressing	64
Silicosis, modern views on	207
<i>see</i> Silica.	
South Africa, <i>see</i> Typhus-like disease.	
Statistics, <i>see</i> Cancer, Mortality.	
Ticks, <i>see</i> <i>Rhipicephalus</i> .	
<i>Trypanosoma brucei</i> , variation in chemotherapeutic susceptibility with change in virulence	180
Tuberculin reactions of Chinese in Hong Kong	300
Tuberculo-protein, use of, <i>see</i> Tuberculin.	
Typhoid fever, <i>see</i> Bacteria: <i>Bact. typhosum</i> .	
Typhus-like disease ("fièvre boutonneuse"?) in Kenya, tick vector	1
in South Africa	116
Three viruses distinguished	120
Virulence, <i>see</i> <i>Trypanosoma brucei</i> .	
Virus diseases, <i>see</i> Psittacosis.	
Water, <i>see</i> Bacteria: <i>Bact. aerogenes</i> and <i>Bact. coli</i> .	
Corrections	160
