## Editors

Papers in *Economics and Philosophy* explore the foundations of economics as both a predictive/explanatory enterprise and a normative one. They examine the relevance of economic techniques, methods and conclusions to philosophical questions in ethics and social theory. The journal is designed to foster collaboration between economists and philosophers and to bridge the increasingly artificial boundaries between them. Each issue contains review essays, detailed book reviews, and continuing discussion on topics previously covered.

# Studies in American Political Development

*Studies in American Political Development* publishes high quality scholarship covering American political change and institutional development from a historical perspective. Articles focus on government institutions and their social, economic and cultural environment. The journal features in-depth original articles, which allow scholars to elaborate on the complex patterns of state-society relations. These longer articles also encourage an interdisciplinary approach—tying in relevant issues and related themes. In addition, *SAPD* recognizes the importance of comparative politics to the study of American institutions.
