SCIENCES

June 20 - 24, 1995
Victoria,
British Columbia

The official Journal of: The Canadian Neurological Society, The Canadian Neurosurgical Society,
The Canadian Society of Clinical Neurophysiologists, The Canadian Association for Child Neurology

To a parkinsonian patient, a little help means a lot.

Adding Parlodel to levodopa can improve symptom control. Because you want to help your patient get more out of life's little pleasures.

Add

PARLODEL[®] 
(bromocriptine mesylate)

Because quality of life
is the issue.

Supplement

Antiepileptic Drug Selection and Adverse Effects: Current Issues, Future Options

Toronto, June 1993

The Satellite Symposium "Antiepileptic Drug Selection and Adverse Effects: Current Issues, Future Options" was held during the 28th Canadian Congress of Neurological Sciences in Toronto on June 15, 1993. The symposium consisted of five separate presentations by North American leaders in the field of epilepsy.

Antiepileptic Drug Selection: An Overview	Joseph Bruni	Pages S3-S6
Acute and Chronic Toxicity of Antiepileptic Medications: A Selective Review	Peter Camfield	Pages S7-S11
Cognitive Side Effects of Antiepileptic Drugs	Kimford Meador	Pages S12-S16
How About the New Antiepileptic Drugs?	B. Joe Wilder	Pages S17-S20

ACKNOWLEDGEMENTS

The authors express their gratitude to the following individuals and organizations: Mrs Lucile Edwards, Secretariat, The Canadian Congress of Neurological Sciences, for her assistance in planning the meeting; Parke-Davis for financial support for the meeting and publication of this symposium; and all the attendees of the symposium for their interest and active participation.
