# Nutrition Research Reviews

Volume 26, 2013 ISSN: 0954-4224

## Aims and Scope

*Nutrition Research Reviews* publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

*Nutrition Research Reviews* is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at [www.cambridge.org/nrr](http://www.cambridge.org/nrr)

---

## Editor-in-Chief

J V Woodside, *Belfast, UK*

## Deputy Editor

Jos Houdijk, *Scottish Agricultural College, UK*

## Editorial Board

M Ashwell, *Baldock, UK*

D A Bender, *London, UK*

N Binns, *Drogheda, Ireland*

J L Black, *Warrimoo, Australia*

D Dardevet, *Theix, France*

C Edwards, *Glasgow, UK*

J M Hibbert, *Atlanta, GA, USA*

T Hill, *Newcastle-upon-Tyne, UK*

J K Lodge, *Newcastle-upon-Tyne, UK*

H C Lukaski, *Grand Forks, ND, USA*

S McCann, *Buffalo, NY, USA*

M Pufulete, *Bristol, UK*

P Rogers, *Bristol, UK*

N W Solomons, *Guatemala City, Guatemala*

M Versteegen, *Wageningen, Netherlands*

C M Weaver, *West Lafayette, IN, USA*

K M Younger, *Dublin, Ireland*

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Tel: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756, Email: [office@nutsoc.org.uk](mailto:office@nutsoc.org.uk)

The Nutrition Society Home Page is at <http://www.nutritionssociety.org>

**CAMBRIDGE**  
UNIVERSITY PRESS

**Nutrition Research Reviews**  
**Volume 26, 2013 ISSN: 0954-4224**

**Publishing, Production, Marketing, and**

**Subscription Sales Office:**

Cambridge University Press  
The Edinburgh Building  
Shaftesbury Road  
Cambridge CB2 8RU, UK

**For Customers in North America:**

Cambridge University Press  
Journals Fulfillment Department  
100 Brook Hill Drive  
West Nyack  
New York 10994-2133  
USA

**Publisher:** Katy Christomanou

*Nutrition Research Reviews* is an international journal published biannually (June and December) by Cambridge University Press on behalf of the Nutrition Society.

**Subscription information:**

Volume 26 2013 (2 issues)  
Internet/print package: £236/\$461 American only/€367 EU only  
Internet only: £169/\$313 Americas only/€253 EU only

**Back volumes** are available. Please contact Cambridge University Press for further information.

**Claims** for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

**US POSTMASTERS:** please send address corrections to *Nutrition Research Reviews*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

**Information for Authors:** The journal publishes both solicited and unsolicited review articles. For unsolicited material, authors are asked to submit a summary of the article to the Editor-in-chief in the first instance:

Dr Graham C Burdge,  
Editor-in-Chief, Nutrition Research Reviews,  
Institute of Human Nutrition / DOHaD Division,  
Institute of Developmental Sciences Building,  
Mail point 887, Southampton General Hospital,  
Tremona Road,  
Southampton SO16 6YD, UK  
Tel: +44(0)23 80798663  
Fax: +44(0)23 80795255  
Email: [G.C.Burdge@soton.ac.uk](mailto:G.C.Burdge@soton.ac.uk)

**Directions to Contributors:** are available from the Editor-in-chief.

**Offprints:** The author (or main author) of an accepted paper will receive a free PDF of their paper and a voucher copy of the issue in which their paper has been published. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges are levied by this journal.**

**Copyright:** As of July 2000 the copyright of all articles submitted to *Nutrition Research Reviews* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

**Disclaimer:** The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication.

This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd., Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

Subscribers may register for free access to the electronic version of *Nutrition Research Reviews*. For more information visit the website at [journals.cambridge.org](http://journals.cambridge.org)

*Nutrition Research Reviews* is covered by the Science Citation Index<sup>®</sup>, Current Contents<sup>®</sup> / Agriculture, Biology & Environmental Sciences, SciSearch<sup>®</sup>, Research Alert<sup>®</sup>, Index to Scientific Reviews<sup>®</sup>, EMBASE/Excerpta Medica, Chemical Abstracts Services, CINAHL<sup>®</sup> Database, CAB ABSTRACTS<sup>®</sup>, Global Health, BIOSIS<sup>®</sup> Database, SIIC Databases

## Contents

Vol. 26 No. 2 December 2013

Energy balance and obesity: a UK perspective on the gluttony <i>v.</i> sloth debate	
<i>D. Joe Millward</i>	
Introduction	89
Drivers of obesity: the current gluttony <i>v.</i> sloth debate	91
Direct measurements of energy expenditure	93
Body weight influence on physical activity energy expenditure and physical activity behaviour	97
What does physical activity level represent and should it be corrected for body weight?	97
How is physical activity level related to actual behavioural changes when body weight is changing?	98
Changes in food intake in the UK	99
Direct evidence of physical activity–weight gain interactions	103
Conclusions	105
Acknowledgements	106
References	106
Iodine deficiency, thyroid function and hearing deficit: a review	
<i>Alida Melse-Boonstra &amp; Ian Mackenzie</i>	
Introduction	110
Iodine and thyroid metabolism in a nutshell	111
The auditory system	111
Genetic factors, thyroid metabolism and auditory function	111
Congenital and acquired hypothyroidism, development of the auditory system and hearing function	112
Animal studies	112
Human studies	112
Iodine deficiency and hearing function in children	113
Conclusion	114
Acknowledgements	114
References	114
Non-extractable polyphenols, a major dietary antioxidant: occurrence, metabolic fate and health effects	
<i>Jara Pérez-Jiménez, M. Elena Díaz-Rubio &amp; Fulgencio Saura-Calixto</i>	
Introduction	118
Non-extractable polyphenols	119
Occurrence of non-extractable polyphenols in foodstuffs and diets	119
Occurrence of non-extractable polyphenols in individual foodstuffs	119
Occurrence of non-extractable polyphenols in diets	120
Non-extractable polyphenols through the human gut	121
Bioaccessibility of non-extractable polyphenols	121
Colonic transformation and bioavailability of non-extractable polyphenols	122
Health-related properties of non-extractable polyphenols	123
Gastrointestinal health	124
CVD risk factors	125
Concluding remarks	126
Acknowledgements	126
References	126
The Maillard reaction and pet food processing: effects on nutritive value and pet health	
<i>Charlotte van Rooijen, Guido Bosch, Antonius F. B. van der Poel, Peter A. Wierenga, Lucille Alexander &amp; Wouter H. Hendriks</i>	
Introduction	130
The Maillard reaction	131
Determining Maillard reaction products in processed foods and ingredients	132
The Maillard reaction in model systems	133
Effects of the Maillard reaction on the nutritive value of pet foods	133
Effects of glycated Maillard reaction products on health	136
Early Maillard reaction products in ingredients and during processing of pet foods	138
Early Maillard reaction products in pet food ingredients	138

Contents

Effect of processing of pet foods	138
Extrusion	138
Drying and storage	143
Retorting	143
Pelleting	144
Conclusions	144
Acknowledgements	144
References	145
Nutritional strategies to counteract muscle atrophy caused by disuse and to improve recovery	
<i>Hugues Magne, Isabelle Savary-Auzeloux, Didier Rémond &amp; Dominique Dardevet</i>	
Introduction	149
Protein turnover during muscle disuse	149
Cellular turnover during muscle disuse	151
Metabolic abnormalities associated with disuse	152
Protein and cellular turnover during the muscle recovery phase	153
Nutrition: a key factor for preserving muscle from atrophy and improving recovery?	154
Nutritional intervention to exceed the increased anabolic threshold during immobilisation	154
Amino acid/protein supplementation	154
Nutritional interventions to reduce the anabolism threshold during immobilisation	156
Antioxidant and anti-inflammatory compounds	156
Energy intake	156
Nutritional intervention to improve muscle mass recovery	157
Ageing and bed rest: impact of nutritional interventions during disuse and following rehabilitation	157
Overall conclusion and future directions	158
Acknowledgements	159
References	159
Social influences on eating: implications for nutritional interventions	
<i>Eric Robinson, Jackie Blissett &amp; Suzanne Higgs</i>	
Introduction	166
Modelling of food choices and intake	166
Early food intake modelling studies	166
Recent food intake modelling studies	167
Intake modelling during main meals	167
What drives intake modelling: high or low eaters?	167
Modelling of food choices	168
What factors influence modelling?	168
Modelling for appropriateness	168
Modelling for ingratiation	168
Modelling for reasons unrelated to appropriateness or ingratiation?	169
Perceived eating norms	169
Manipulating context-specific perceived eating norms	170
Experimentally manipulating non-context-specific eating norms	171
Using perceived eating norms to reduce intake of 'unhealthy' foods	171
Effect of norm types	172
When will perceived eating norms influence dietary behaviour?	172
Perceived eating norms as behavioural guides	172
Perceived eating norms and identity signalling	172
General discussion	173
Applied relevance: perceived eating-norm messages	173
Applied relevance: positive social image and healthy eating	173
Future research	173
Conclusions	174
Acknowledgements	174
References	174
The impact of milk proteins and peptides on blood pressure and vascular function: a review of evidence from human intervention studies	
<i>Ágnes A. Fekete, D. Ian Givens &amp; Julie A. Lovegrove</i>	
Introduction	177

*Contents*

High blood pressure as an important, modifiable CVD risk factor	177
A holistic marker of CVD risk: vascular dysfunction	178
Impact of milk consumption on cardiovascular health	178
Evidence from human interventional trials on the antihypertensive effects of milk proteins	179
Effects of casein and casein-derived peptides on blood pressure	179
Effects of whey and whey-derived peptides on blood pressure	181
Evidence from human interventional trials on the effects of milk proteins on vascular function	181
Discussion	185
Putative mechanisms underlying the impact of milk peptides on hypertension and vascular function	186
Bioavailability	187
Conclusions and future recommendations	187
Acknowledgements	188
References	188
Use of pigs as a potential model for research into dietary modulation of the human gut microbiota	
<i>Sonja N. Heinritz, Rainer Moseenthin &amp; Eva Weiss</i>	
Introduction	191
Anatomy of the gastrointestinal tract and body constitution – similarities and differences between humans and pigs	192
Intestinal microbiota of humans and pigs: microbial fermentation and composition	192
The human gut microbiota: a brief overview	193
The porcine gut microbiota	193
Main determinants affecting intestinal microbiota composition	194
Environment	194
Nutrition	195
Age	195
Sanitary conditions and coprophagy	195
Role of the intestinal microbiota in host health and disease development and its dietary modulation in studies with pigs	195
Diarrhoea: occurrence after weaning in human infants and piglets	196
Dietary strategies as therapeutic tools for diarrhoeal diseases	196
Necrotising enterocolitis	198
Dietary strategies as therapeutic tools for necrotising enterocolitis	198
Obesity	200
Dietary strategies as therapeutic tools for obesity	201
Further options for the application of the pig as a model for research into microbiota-associated diseases	202
Possible improvement of the pig as an animal model: human flora-associated pigs	202
Conclusions	203
Acknowledgements	203
References	203
The effects of dietary nitrate on blood pressure and endothelial function: a review of human intervention studies	
<i>Ditte A. Hobbs, Trevor W. George &amp; Julie A. Lovegrove</i>	
Introduction	210
Sources of dietary nitrate	211
Acceptable daily intake	211
Metabolism of dietary nitrate	212
Endothelial function	212
Role of nitric oxide	212
Clinical assessment of endothelial function	213
Endothelial dysfunction	213
Dietary nitrate and blood pressure	213
Dietary nitrate and endothelial function	218
Potential mechanisms by which dietary nitrate may reduce blood pressure and increase endothelial function	218
Acting as a substrate to endothelial nitric oxide synthase	218
Inhibitor of mitochondrial reactive oxygen species	219
Increasing vasodilation	219
Inhibition of platelet aggregation	219

Conclusion	219
Acknowledgements	220

Food-derived serotonergic modulators: effects on mood and cognition	
<i>Sjoerd Hulsken, Antje Märtin, M. Hasan Mohajeri &amp; Judith Regina Homberg</i>	
Introduction	223
The serotonergic system	224
Tryptophan	225
Acute tryptophan depletion	225
Effects of acute tryptophan depletion on mood and cognitive functions in healthy subjects	226
Mood	226
Cognition	226
Effects of acute tryptophan depletion on mood and cognitive functions in vulnerable subjects	226
Mood	226
Cognition	226
Effects of acute and (sub-)chronic tryptophan depletion in animal models	226
Summary of acute tryptophan depletion	227
Acute tryptophan supplementation	227
Effects of acute tryptophan supplementation on mood and cognitive functions in healthy subjects	227
Mood	227
Cognition	228
Effects of acute tryptophan supplementation on mood and cognitive functions in vulnerable subjects	228
Mood	228
Cognition	228
Effects of acute and (sub-)chronic tryptophan supplementation in animal models	228
Summary of acute tryptophan supplementation	229
Triple monoamine inhibitors	229
Summary and conclusion	229
